

Have you heard about HMP Grendon and would like to know more?

HMP Grendon is a Therapeutic Community, which aims to reduce re-offending through challenging offence related risk factors and is accredited by the Correctional Services Accreditation panel. The treatment includes cognitive, psychodynamic, behavioural therapy, and social learning, through which residents challenge all aspects of their behaviour.

If you would like to visit HMP Grendon and find out more about how it runs there are regular visitors days, and social evenings, which enables you to spend time in the units and hearing from the residents and staff how it works.
