

Industrial Action and extension of completion of training date

The College has been asked if trainees taking part in Industrial Action (IA) will have their completion of training (CCT/CESR CP) dates extended. The decision for each individual trainee will be made in the Deaneries at ARCP when competencies are assessed. However, the College believes that the relatively small amount of time taken out of training by trainees taking part in IA is unlikely to significantly interfere with the gaining of competencies and would expect most trainees to progress without additional time being needed.
