

Psychological Interventions: Hitting the Target

REGISTER NOW!

Wednesday 17 March 2010

**James Watt Centre 1
Heriot Watt University, Edinburgh**

About the event

With the prospect of a Psychological Therapies access target for inclusion in HEAT 2011/2012, NES is organising this conference to support NHS Boards and their staff to plan and deliver the increase in capacity required to meet any future demands.

The conference, which will be opened by Shona Robison, Minister for Public Health and Sport, aims, through a combination of presentations, workshops and posters:

- To increase awareness of the NES PIs training programme and infrastructure, and to engage staff in the planning and roll-out of key educational initiatives
- To examine some of the key issues in the planning and delivery of effective care in the future, and to provide up-to-date information on strategic developments and emerging evidence.

Who is this event for?

This conference will be relevant to everyone who has an interest in the efficient and effective delivery of Psychological Interventions, including:

- Service planners, managers and commissioners.
- Staff delivering psychological interventions at a range of levels, and from a range of professional backgrounds.

To register, or see draft programme

Please click on the following link:
