The British Journal of Psychiatry

Published monthly by *The Royal College of Psychiatrists*, this is one of the world's leading psychiatric journals. It covers all branches of the subject, with particular emphasis on the clinical aspects of each topic. In addition to a large number of authoritative papers from both the UK and around the world, the journal includes editorials, review articles, commentaries on contentious articles, short reports, a comprehensive book review section and a lively and well-informed correspondence column. A series of supplements, sent free to subscribers, provides in-depth coverage of selected areas.

Originally founded in 1853 by J.C. Bucknill as the *Asylum Journal*, from 1858 to 1963 it was known as the *Journal of Mental Science*, at which time the name was changed to the now familiar *British Journal of Psychiatry*. The complete archive of contents between 1855 and 2000 is now available online.

*The British Journal of Psychiatry* is essential reading for psychiatrists, clinical psychologists, and all professionals with an interest in mental health.

## Journal Information

- **ISSN** (Print): 0007-1250
- **ISSN** (Online): 1472-1465
