

Workshop: Active involvement of people with lived experience of learning disability in research and service development

Sarah

Amy

Sonal

Heidi

Russel

Conflicts of Interest

We have no conflicts of interest to declare

We have designed a board game called Co-opoly!

Each colour represents a step in research or service development

- Design or Planning
- Recruitment
- Data collection or Feedback
- Analysis or Evaluation
- Dissemination or Change

How to play Co-opoly

- The room will be split into 2 teams
- Throw the dice
- We will read a card that matches your colour square
- Your team needs to suggest what you could do in the situation

Let's Play!

Teams

Team Turtle

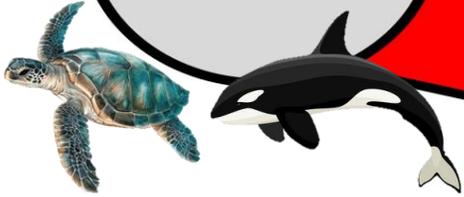

Team Orca

Co-opoly

The game of active involvement

START!

Steps of research and service development

- Design or Planning
- Recruitment
- Data collection or Feedback
- Analysis or Evaluation
- Dissemination or Change

FINISH!

These are some things we did

- Pre booked a Pre-paid taxi's

What is the DECODE research study about?

Some people with learning disabilities have health conditions that last a long time.

In this research study we will use computer systems to learn more about long term health conditions.

We want to talk to people with learning disabilities about the care they get for their health.
We want to find out what they like and don't like about it.

We will also talk to other people like:

- Families
- Carers
- Doctors, Nurses and Social workers

- Accessible information

- Professionals with experience

- Personalised communication support
