

# Health of the Nation Outcome Scales for People with Learning Disabilities (HoNOS-LD)

## Background

Health of the Nation Outcome Scales for People with Learning Disabilities (HoNOS-LD) are designed for use with people with a learning disability with mental health needs irrespective of the degree of their disability. HoNOS-LD has been tested for inter-rater reliability, convergent reliability, validity to change and acceptability in a national pilot study. Results demonstrate a good inter-rater reliability and a level of sensitivity to change that was acceptable to clinicians working in the field.

## Course times

**9.30am** Registration and coffee

**10.00am** Welcome

**4.30pm** Course Close

## Aims and Objectives

- Explain the rules and principles of rating the HoNOS-LD
- Provide experience in HoNOS-LD rating through the use of HoNOS-LD to rate clinical vignettes in group exercises
- Identify how outcome measurement can benefit clinical practice
- Describe the development of the tool and the results from the trials

## Brief list of content

- Introductions
- Aims and Objectives
- HoNOS-LD – (Glossary, rules and principles for rating)
- Rating practice
- Field trials and reliability
- Questions and answers

## Who should attend

Clinicians from a wide range of healthcare professions, for example, Consultant Psychiatrists, Occupational Therapists, Psychologists, Social Workers and Clinical Researchers.

## Course Fee

£3,000.00 plus VAT. This includes speaker fees, travel and all course materials.

## Maximum group size:

25 delegates

## Accreditation

This course is eligible for 5 CPD hours subject to your peer group approval.
