

Data security for online data submission using Formic Fusion survey software

Data will be submitted using the online data collection forms designed and hosted using Formic's Fusion solution. Formic abide by the stringent security requirements of the NHS for its systems and processes and are ISO27001 certified and IGSoC Level 2 Compliant.

The RCPsych has a bank level end-to-end SSL/Transport Layer Security with 128 bit encryption. Online audit tools used to collect the information required by the audit will be password protected. Passwords and usernames for participating services will be held by the local project leads for these services.
