

National Audit of Dementia Audit of Casenotes 2022 ASSESSMENT AND PLANNING

Thank you for participating in the National Audit of Dementia.

For this audit you will be submitting casenote audit data via the new platform CaseCapture on Netsolving. The NAD team have created a comprehensive guidance document which you should have received via email outlining how to find your sample, navigate the data collection tool and submit data for the pilot. If you have not received this or have any queries please contact nad@rcpsych.ac.uk.

This is Part TWO of the casenote audit. For this part of the audit you will take the first 80* patients admitted to your hospital over the 4 week period 19 September – 14 October and submit information about assessment and planning. Deadline for all data entry for Part Two is 3 January 2023.

*If you intend to split your sample between this data collection period and the optional March period you may take 40 patients. Please see guidance.

Entering the data: You can save and return to each record entered.

1.1 Audit allocated ID number [link from previously entered]

2A: SCREENING and diagnosis of delirium

2.1 Have any of the following screening assessments been carried out for this patient to identify recent changes or fluctuation in behaviour that may indicate the presence of delirium?

a. Single Question in Delirium (SQiD)

- Yes, within 24 hours of admission
- Yes, more than 24 hours after admission
- No

b. History taken from someone who knows the patient well in which they were asked about any recent changes in cognition/behaviour

- Yes, within 24 hours of admission
- Yes, more than 24 hours after admission
- No

c. 4AT (Rapid Clinical Test for delirium)

- Yes, within 24 hours of admission
- Yes, more than 24 hours after admission
- No

d. CAM (Confusion Assessment Method)

- Yes, within 24 hours of admission
- Yes, more than 24 hours after admission
- No

e. OSLA

- Yes, within 24 hours of admission
- Yes, more than 24 hours after admission
- No

f. Other (please specify)

- Yes, within 24 hours of admission
- Yes, more than 24 hours after admission
- No

i. Other details

2.2 Please enter the date of the first assessment identified above

2.3 Did the initial assessment selected above find evidence that delirium may be present?

- Yes, delirium may be present
- No evidence of delirium

(If found that delirium may be present):

2.4 Was a diagnosis of delirium confirmed?

- Yes, the patient was diagnosed with delirium
- No, it was confirmed that the patient did not have delirium

(If delirium diagnosis confirmed):

2.5 Was a management plan (for investigation and treatment) for delirium put in place?

- Yes
- No

2.6 Was a care plan (for nursing care) for delirium put in place?

- Yes
- No

2B: PAIN ASSESSMENT

2b.1 Has the patient been asked about, and/or has there been an assessment for presence of pain?

- Yes, within 24 hours of admission
- Yes, more than 24 hours after admission
- No
- Could not be assessed for recorded reasons

(if yes) Enter the date of the pain assessment

(if yes) Was this using:

- Question only
- The Abbey Pain scale
- Pain assessment in advanced dementia (PAINAID)
- Checklist of nonverbal pain indicators (CNPI) observation score
- Other

(If other) Please specify

2b.2 Was pain reassessed?

- Yes, within 24 hours of first pain assessment
- Yes, more than 24 hours after first pain assessment
- No

i. Date pain was first reassessed?

(if yes) Was this using:

- Question only
- The Abbey Pain scale
- Pain assessment in advanced dementia (PAINAID)
- Checklist of nonverbal pain indicators (CNPI) observation score
- Other

(If other) Please specify

2C: DISCHARGE PLANNING

2c.1 Were the required actions to prepare for discharge identified?

- Yes, within 24 hours of admission
- Yes, more than 24 hours after admission
- No

a. Please give the date that you began to identify these actions

2c.2 Has an expected date of discharge been recorded?

- Yes, within 24 hours of admission
- Yes, more than 24 hours after admission
- No

2c.3 Was a named member of staff (nurse/consultant/discharge coordinator) or named team responsible clearly identified to coordinate discharge?

- Yes, within 24 hours of admission
- Yes, more than 24 hours after admission
- No

4.4 If the discharge planning was not initiated within 24 hours of admission, please select the recorded reason why?

- Patient acutely unwell
- Patient awaiting assessment
- Patient awaiting history/results
- Patient awaiting surgery
- Patient presenting confusion

- o Patient on end of life plan
- o Patient transferred to another hospital
- o Patient unresponsive
- o Patient being discharged to nursing/ residential care
- o Other (please specify)
- o No reason recorded

i. Other details
