

# National Audit of Dementia Care in General Hospitals 2018-2019

## Midlands Regional report

## Authors

This report was prepared by Chloë Hood, Aimee Morris, Samantha Ofili, Jhermaine Capistrano, Lori Bourke and Jessica Butler.

Content is advised and approved by all members of the Steering Group. Please see our website for full details of the [Steering Group members](#) and the [Project Team](#).

## Partner Organisations

Age UK  
Alzheimer's Society  
British Geriatrics Society (BGS)  
John's Campaign  
National Dementia Action Alliance (NDAA)  
Royal College of Nursing (RCN)  
Royal College of Physicians (RCP)

## Acknowledgements

We would like to thank everyone who contributed to this report. We would especially like to mention:

- The carers for people with dementia and staff working in hospitals who completed a questionnaire for this round of the audit.
- The audit leads, champions, and clinical audit staff for their hard work organising the data collection in their hospitals. (A list of participating hospitals is on our [website](#)).
- The participants in the Service User Review Panels held following Round 3, for their contribution to the content of Round 4 (a report on the panel discussions is on our [website](#)).
- All the members of the [Steering Group](#) and especially our Chair, Peter Crome.

## Artwork

Cover design features View over Derwent water by Peter Montgomery. All entries in the NAD art prize can be seen on our [website](#). We would like to thank all entrants for sending us their impressive work and permitting us to display it.

# Introduction

## Background

The National Audit of Dementia (NAD) care in general hospitals examines aspects of care received by people with dementia in general hospitals in England and Wales. The audit is commissioned by the Healthcare Quality Improvement Partnership on behalf of NHS England/NHS Improvement and the Welsh Government, as part of the National Clinical Audit Programme. The audit is managed by the Royal College of Psychiatrists in partnership with:

- Age UK
- Alzheimer's Society
- British Geriatrics Society (BGS)
- John's Campaign
- National Dementia Action Alliance (NDAA)
- Royal College of Nursing (RCN)
- Royal College of Physicians (RCP)

## Audit standards

The NAD measures the performance of general hospitals against standards relating to care delivery which are known to impact upon people with dementia while in hospital. These standards are derived from national and professional guidance, including NICE Quality Standards and guidance, the Dementia Friendly Hospitals charter, and reports from Alzheimer's Society, Age UK and Royal Colleges. A full list of these standards and associated references can be found in the 'Round 4 resources' section on the NAD [website](#).

## Data collection

Round 4 of NAD collected data between April and October 2018. The audit was open to all general acute hospitals in England and Wales providing acute services on more than one ward which admit adults over the age of 65.

Participating hospitals were asked to complete:

- A hospital level organisational checklist
- A retrospective casenote audit with a minimum target of 50 sets of patient notes
- A survey of carer experience of quality of care
- A staff questionnaire on providing care and support to people with dementia

## Reporting for Wales and England

In England and Wales, 195 hospitals (97% of eligible hospitals) took part in this round, a list of participating hospitals is on our [website](#). For this report, data in Round 4 has been grouped into 7 NHS England and NHS Improvement regions and Wales:

**Table 1:** Data received across England and Wales in Round 4 of audit

	Hospitals	Organisational checklist	Casenotes	Staff questionnaires	Carer questionnaires
National	195	195	9782	14154	4736
East of England	17	17	882	1529	467
London	27	27	1247	1638	873
Midlands	30	30	1531	1888	757
North East and Yorkshire	34	34	1699	2588	713
North West	25	25	1352	2197	660
South East	29	29	1468	2144	659
South West	17	17	865	1428	478
Wales	16	16	738	742	129

Please note: in Round 3 the regions in England were previously London, Midlands, North and South. This has been re-analysed to be comparable to Round 4 regional scores.

Data are presented in two ways in this report:

1. Key findings, scores and recommendations from the national results alongside results for your region
2. A full breakdown of data by audit theme across England and Wales

# National key findings

Shown below are the five key findings derived from the national data set for the fourth round of the National Audit of Dementia.

**58%** of casenotes had an **initial assessment or delirium noted** on admission

**Personal information** collected in casenotes to support care:

**36%** noted factors which cause distress

**32%** noted actions which could calm or reassure

**53%** of hospitals were able to submit data on the number of staff who had received Tier 1/informed **dementia awareness training**

Trust /Health Boards can identify the proportion of people with dementia who experience:

**inpatient falls**  
**64%**

of Trust/Health Boards

**delayed discharges**  
**40%** of

Trust/Health Boards

**re-admissions**  
**37%** of

Trust/Health Boards

Overall, many results show **improvements** from those reported in Round 3 (2017).

# Key findings and your region

Each figure shows the national mean average results next to the data for your region to allow for easy comparison. All percentages have been rounded up to a whole number which means some results may calculate to just under or over 100%. The national averages include data collected from 195 hospitals across England and Wales. Null responses were not included at both national and hospital level, therefore sample sizes can differ between questions from the same tool. Round 3 results are also shown where applicable.

## Key finding: assessments for delirium

Effective prevention, diagnosis and management of delirium in people with dementia admitted to hospital is essential. People with dementia are at considerable risk of developing delirium<sup>1</sup>. When delirium is superimposed on dementia, it can be challenging to distinguish<sup>2</sup>. As a result, it is important that hospitals have robust mechanisms in place for identifying indications of delirium in people with dementia.

**Figure 1:** Initial assessment for indications of delirium.

**NB:** 87 patient(s) had delirium noted on admission and were also considered to have an initial assessment for indications of delirium.

[NICE guidelines for delirium](#)<sup>1</sup> specify that when indications of delirium are identified a clinical assessment should be carried out to confirm diagnosis.

**Table 2:** Full assessment for delirium

	National average %	Your region % Round 4	Your region % Round 3
Initial assessment for indications of delirium	58% (n=9147)	43% (n=651)	36% (n=567)
Clinical assessment following indications of delirium	66% (n=2458)	68% (n=203)	82% (n=265)

**NB:** 52 patient(s) was/were not included in this figure as they went straight to assessment

### Key recommendations: Delirium

**Medical Directors and Directors of Nursing** should ensure that people with dementia admitted as an emergency are assessed for delirium using a standardised tool such as the 4AT or Confusion Assessment Method (CAM) (NICE CG 103 1.2)<sup>1</sup> and consider the symptom of pain as a contributory factor.

## Key finding: personal information collected to support care

Details recorded about the person with dementia should help staff to understand and anticipate their needs and involve them in decisions about their care. Nearly all hospitals (97%, 190/195) said that they had a formal system in place for collecting personal information (99%, Round 3). This included documents such as [This is Me<sup>3</sup>](#), [Forget-me-Not](#) and the [Butterfly Scheme<sup>4</sup>](#).

When looking at casenotes of people with dementia, 61% (5955/9782) contained this type of information, a slight increase from Round 3 (57%). However, not all the information relevant to providing care was consistently collected (Figure 2).

**Figure 2:** Percentage of casenotes where information about the person with dementia had been collected. National sample and your region.

A patient's casenotes may not always provide an accurate record of whether personal information is available to staff. In Rounds 3 and 4 of the audit, hospitals were asked to complete a mini audit on the three wards with the highest admissions of patients with dementia. Hospitals audited a total of 10 patients, checking to see if a personal information document was present at the bed side or in the daily notes folder. Figure 3 shows the percentage of patient casenotes which were checked and had a personal information document.

**Figure 3:** Results from the 'mini audit' on personal information documents.

**Figure 4:** Carers' perspective on how well informed staff were about the needs of the person with dementia.

**Figure 5:** Staff perspective on the availability of personal information to help them care for/support people with dementia.

**Figure 6:** Staff perspective on the opportunity to use personal information when available to help them care for/support people with dementia.

### Key recommendation: Personal information

**Directors of Nursing** should ensure that initial routine assessment of people with dementia includes:

- Information about factors that can cause distress or agitation
- Steps that can be taken to prevent these

## Key finding: dementia awareness training

The Alzheimer's Society's Fix Dementia Care hospitals campaign<sup>5</sup> and the Dementia Friendly Hospital Charter (2018)<sup>6</sup> state that all hospitals should publish reports which monitor dementia training among staff. We asked how many staff were provided with training in at least Tier 1/informed dementia awareness during a one-year period. Staff training data is still not being consistently recorded so it is not possible to calculate the proportion of dementia trained staff in hospitals. On a national level only 53% of hospitals were able to provide any figures on the proportion of staff trained.

**Table 3:** Number of staff equipped with at least Tier 1/basic awareness training between 1<sup>st</sup> April 2017 and 31<sup>st</sup> March 2018.

	National average (Interquartile range)	Your region
Average number of staff equipped with at least tier 1/basic awareness training identified at <b>Trust level</b> (n=151)	2128 (754-3015)	1590
Average number of staff equipped with at least tier 1/basic awareness training identified at <b>hospital level</b> (n=104)	1100 (433-1238)	1063
Average number of adult beds excluding maternity and mental health beds at 31 <sup>st</sup> March 2018 at hospital level (n=195)	506 (325-650)	552

**NB:** Average number of adult beds according to Organisational Checklist.

The staff questionnaire also collected data on training formats, staff preparedness, and the level of staff who received training (Tables 3 and 4 and Figure 7).

**Table 4:** Proportion of staff reporting that they received some form of dementia training from the hospital they currently work at and what form of training(s)

	National average % (n=13407)	Your region % Round 4 (n=1760)	Your region % Round 3 (n=1513)
eLearning	52%	43%	32%
Workbook	8%	7%	5%
Workshop/study day	55%	56%	57%
Higher education module	5%	6%	7%
Other form of training	8%	9%	8%
Did not receive dementia training	11%	14%	21%

**Figure 7:** Staff response on level of preparedness following training provided by their current hospital.

**Key recommendation: Dementia awareness training**

**Trust Chief Executive Officer** should demonstrate that all staff providing care for people with dementia receive mandatory dementia training at a level (Tier 1, 2, 3) appropriate to their role and that:

- Delirium and its relationship to dementia is included in the training
- Information about the number of staff who received dementia training is recorded
- The proportion of staff who have received dementia training is included in the annual Quality Account Report

## Key finding: Trust/Health Boards involvement in dementia care

More Trust/Health Boards can identify the patient population with dementia, when reviewing collated information on patient safety indicators. Although there have been notable increases, less than half of Trust/Health Boards were able to identify patients with dementia when reviewing readmissions and delayed discharges.

**Table 5:** Trust/Health Board involvement when reviewing information.

Health boards can identify patients with dementia when looking at information about:	National average % (n=195)	Your region % Round 4 (n=30)	Your region % Round 3 (n=32)
Your region in-hospital falls	64%	57%	44%
Your region delayed discharges	40%	20%	31%
Your region re-admissions	37%	23%	19%

### Key recommendation: Trust/Health Boards involvement in dementia care

**Trust Executive Directors** should ensure that information is presented to the Board which clearly identifies the proportion of people with dementia within reporting on patients who experience:

- A fall during their admission
- A delay to their discharge
- Readmission within 30 days of discharge

## Key finding: overall improvement in care in general hospitals

Overall, Round 4 results show slight improvements from those reported in Round 3 (2017). Average hospital scores across England and Wales have increased across all seven scoring items since Round 3.

Below is the breakdown of scores in your region according to the seven scoring items explored in the National Audit of Dementia. Scores are derived from separate data sources and should be viewed independently. The method for the scoring can be found on the audit [website](#).

**Table 6:** Scores and rankings for your region

Scoring	National score Round 4	Your region score Round 4	Range of scores for your region Round 4	Your region score Round 3	Range of scores for your region Round 3
Governance	<b>68%</b>	<b>63</b>	13 - 100	<b>60</b>	13 - 100
Nutrition	<b>89%</b>	<b>91</b>	61 - 100	<b>85</b>	49 - 100
Discharge	<b>76%</b>	<b>70</b>	36 - 100	<b>63</b>	27 - 87
Assessment	<b>87%</b>	<b>87</b>	73 - 96	<b>82</b>	69 - 99
Staff rating communication	<b>66%</b>	<b>64</b>	48 - 75	<b>64</b>	48 - 75
Carer rating: communication	<b>66%</b>	<b>64</b>	36 - 87	<b>63</b>	48 - 86
Carer rating of patient care	<b>73%</b>	<b>72</b>	52 - 91	<b>72</b>	58 - 88

**Figure 8:** Scores in your region against the national range.

The dashed bar and call-out box indicate your region’s score for each scoring item. The middle section (yellow) represents the interquartile range where 50% of hospitals have scored. The cut off values for the interquartile range are indicated on each bar. If your region’s score is in the top quarter (green), your score is in the top 25% of scores. The bottom quarter (red) represents the lowest 25% of scores.

**Key recommendation:**

**Trust/Health Boards and their Chief Executive Officers** should:

- Work to implement these recommendations by World Alzheimer’s Day 2020
- Publish progress made on implementing dementia recommendations in an annual Trust statement on dementia care
- Include other dementia friendly hospital initiatives, such as self-assessment based on the Dementia Action Alliance 2018 charter

# Data breakdown by audit theme

Audit standards are measured across the audit tools. Therefore, data submitted are presented thematically, with data from different tools presented together.

## 1. Carer rating of patient care

Data from the carer questionnaire. This looks at how carers would rate the care received by the person they look after during the hospital stay.

## 2. Assessment

Data from the casenote audit. This looks at whether people with dementia admitted to hospital have received a comprehensive assessment, and how well each element of assessment is carried out.

## 3. Information and communication

Data from the organisational checklist, casenote audit, staff and carer questionnaires. This looks at communication systems in use in the hospital, evidence of their use in casenotes and presents feedback from carers and staff about the quality of communication.

## 4. Staffing and training

Data from the organisational checklist, staff questionnaire and carer questionnaire. This looks at staffing provision, the extent of training delivery in hospitals and presents feedback from staff on training quality.

## 5. Nutrition

Data from the organisational checklist and staff questionnaire. This looks at whether hospitals have services that provide for the needs of people with dementia and presents feedback from staff on service quality.

## 6. Discharge

Data from the organisational checklist and casenote audit. This looks at the extent of planning for discharge from hospital for people with dementia and whether they and their carers are adequately informed.

## 7. Governance

Data from the organisational checklist, staff questionnaire and carer questionnaire. This looks at the involvement of hospital leads and the Executive Board in leading, planning and monitoring care, review of the environment and carer engagement.

## Data tables in audit theme chapters

**Table 7:** Explanation of how data tables are presented in audit theme chapters

Question number, tool and text		National audit Round 4	Region
Round 4 question number and audit tool that item appears in	Wording of question as in Round 4 tool	% (Interquartile Range*) (Num/Den) This refers to all hospitals from England and Wales that participated in Round 4 of the audit	% (Num/Den) Data for each region in Round 4

\* For casenote audit questions only.

Audit tool abbreviations shown with the question number will come from 1 of the 4 audit tools used in Round 4:

- OC – Organisational Checklist
- CA – Casenote Audit
- SQ – Staff Questionnaire
- CQ – Carer Questionnaire

We have provided:

- Percentage 'yes' response (unless otherwise indicated)
- Numerator/denominator (num/den).

The denominator will change throughout the report, depending on:

- Whether questions were routed (not asked in some instances)
- 'N/A' responses chosen (these have been excluded from the analyses)
- Staff and carers did not respond to a question.

When comparing Round 3 data with Round 4 data, please be aware that differences in sample sizes and slight wording changes to some questions, can affect results in both rounds. Comparison of the data should be made with caution.

# Carer Rating of Patient Care

Items presented in this section are from the carer questionnaire (CQ). The questions ask about carer opinion on patient care.

Question number and text		National audit Round 4	East of England	London	Midlands	North East and Yorkshire	North West	South East	South West	Wales
8 CQ	Rating of the care received by the person they care for during the hospital stay									
	Excellent	<b>38.2%</b> (1798/4704)	<b>36.8%</b> (171/465)	<b>30.6%</b> (266/869)	<b>39.5%</b> (297/751)	<b>39.4%</b> (278/706)	<b>42.5%</b> (277/652)	<b>39.5%</b> (260/658)	<b>40.2%</b> (191/475)	<b>45.3%</b> (58/128)

# Information and Communication

Items presented in this theme are from the organisational checklist (OC), casenote audit (CA), staff questionnaire (SQ) and carer questionnaire (CQ). The questions relate to personal information collected about people with dementia, communication between staff members and communication between staff and carers.

## Using personal information to improve care

Question number and text		National audit Round 4	East of England	London	Midlands	North East and Yorkshire	North West	South East	South West	Wales
13 OC	There is a formal system (pro-forma or template) in place in the hospital for gathering information pertinent to caring for a person with dementia	<b>97.4%</b> (190/195)	<b>100%</b> (17/17)	<b>100%</b> (27/27)	<b>93.3%</b> (28/30)	<b>91.2%</b> (31/34)	<b>100%</b> (25/25)	<b>100%</b> (29/29)	<b>100%</b> (17/17)	<b>100%</b> (16/16)

# Staffing and Training

Items presented in this theme are from the organisational checklist (OC), staff questionnaire (SQ) and carer questionnaire (CQ). Questions relate to hospital staffing levels and the training available to staff on dementia care.

## Staffing levels

Question number and text	National audit Round 4	East of England	London	Midlands	North East and Yorkshire	North West	South East	South West	Wales	
8 OC	Ward staffing levels (nurses, midwives and care staff) are made available for the public to view on a monthly basis									
Yes, on the trust website	<b>46.7%</b> (91/195)	<b>47.1%</b> (8/17)	<b>44.4%</b> (12/27)	<b>46.7%</b> (14/30)	<b>61.8%</b> (21/34)	<b>48%</b> (12/25)	<b>62.1%</b> (18/29)	<b>29.4%</b> (5/17)	<b>6.3%</b> (1/16)	
Yes, on the wards	<b>71.8%</b> (140/195)	<b>94.1%</b> (16/17)	<b>70.4%</b> (19/27)	<b>73.3%</b> (22/30)	<b>73.5%</b> (25/34)	<b>68%</b> (17/25)	<b>62.1</b> (18/29)	<b>76.5%</b> (13/17)	<b>62.5%</b> (10/16)	
9 OC	An evidence-based tool is used for establishing ward staffing levels	<b>96.9%</b> (189/195)	<b>100%</b> (17/17)	<b>88.9%</b> (24/27)	<b>100%</b> (30/30)	<b>100%</b> (34/34)	<b>92%</b> (23/25)	<b>96.6%</b> (28/29)	<b>100%</b> (17/17)	<b>100%</b> (16/16)
9a OC	The tool takes into account patient dependency and acuity	<b>99.5%</b> (188/189)	<b>100%</b> (17/17)	<b>100%</b> (24/24)	<b>100%</b> (30/30)	<b>100%</b> (34/34)	<b>95.7%</b> (22/23)	<b>100%</b> (28/28)	<b>100%</b> (17/17)	<b>100%</b> (16/16)

6 SQ	The ward is able to respond to the individual needs of people with dementia as they arise									
	Yes, always	<b>27.2%</b> (3689/13577)	<b>28.7%</b> (420/1465)	<b>37.1%</b> (592/1594)	<b>26.9%</b> (488/1812)	<b>26.3%</b> (654/2489)	<b>25.1%</b> (518/2061)	<b>25.7%</b> (531/2067)	<b>23.7%</b> (327/1382)	<b>22.5%</b> (159/707)
	Yes, most of the time	<b>43.5%</b> (5903/13577)	<b>44.6%</b> (654/1465)	<b>40.9%</b> (652/1594)	<b>41.1%</b> (745/1812)	<b>44.7%</b> (1113/2489)	<b>43.9%</b> (904/2061)	<b>44.1%</b> (911/2067)	<b>45.6%</b> (630/1382)	<b>41.6%</b> (294/707)
	Yes, sometimes	<b>23.3%</b> (3160/13577)	<b>22.3%</b> (326/1465)	<b>18%</b> (287/1594)	<b>25.2%</b> (457/1812)	<b>22.5%</b> (560/2489)	<b>24.7%</b> (510/2061)	<b>23.7%</b> (490/2067)	<b>25%</b> (345/1382)	<b>26.2%</b> (185/707)
	No	<b>6.1%</b> (825/13577)	<b>4.4%</b> (65/1465)	<b>4.0%</b> (63/1594)	<b>6.7%</b> (122/1812)	<b>6.5%</b> (162/2489)	<b>6.3%</b> (129/2061)	<b>6.5%</b> (135/2067)	<b>5.8%</b> (80/1382)	<b>9.8%</b> (69/707)
7 SQ	Additional staffing support is provided if dependency needs on the ward(s) increase									
	Yes, always	<b>10.4%</b> (1340/12942)	<b>12%</b> (168/1399)	<b>17.6%</b> (268/1523)	<b>10.1%</b> (174/1727)	<b>7.8%</b> (186/2370)	<b>10.3%</b> (202/1956)	<b>9.1%</b> (180/1973)	<b>7.9%</b> (104/1316)	<b>8.6%</b> (58/678)
	Yes, most of the time	<b>26.3%</b> (3405/12942)	<b>27.6%</b> (386/1399)	<b>30.5%</b> (464/1523)	<b>28.5%</b> (492/1727)	<b>24.7%</b> (586/2370)	<b>25.7%</b> (503/1956)	<b>25.5%</b> (503/1973)	<b>25%</b> (329/1316)	<b>20.9%</b> (142/678)
	Yes, sometimes	<b>42.8%</b> (5538/12942)	<b>41.5%</b> (581/1399)	<b>38.4%</b> (585/1523)	<b>40.4%</b> (698/1727)	<b>42.1%</b> (997/2370)	<b>43.8%</b> (856/1956)	<b>44.1%</b> (871/1973)	<b>47%</b> (619/1316)	<b>48.8%</b> (331/678)
	No	<b>20.5%</b> (2659/12942)	<b>18.9%</b> (264/1399)	<b>13.5%</b> (206/1523)	<b>21 %</b> (363/1727)	<b>25.4%</b> (601/2370)	<b>20.2%</b> (395/1956)	<b>21.2%</b> (419/1973)	<b>20.1%</b> (264/1316)	<b>21.7%</b> (147/678)
3 CQ	The person you look after was given enough help with personal care from hospital staff									
	Yes, definitely	<b>58.5%</b> (2641/4518)	<b>57.5%</b> (256/445)	<b>57.8%</b> (481/832)	<b>58.3%</b> (418/717)	<b>57%</b> (386/677)	<b>60.8%</b> (387/637)	<b>58.8%</b> (376/639)	<b>59%</b> (266/451)	<b>59.2%</b> (71/120)
	Yes, to some extent	<b>32.6%</b> (1473/4518)	<b>33.7%</b> (150/445)	<b>34.5%</b> (287/832)	<b>31.5%</b> (226/717)	<b>34.9%</b> (236/677)	<b>30.1%</b> (192/637)	<b>32.6%</b> (208/639)	<b>30.2%</b> (136/451)	<b>31.7%</b> (38/120)
	No	<b>8.9%</b> (404/4518)	<b>8.8%</b> (39/445)	<b>7.7%</b> (64/832)	<b>10.2%</b> (73/717)	<b>8.1%</b> (55/677)	<b>9.1%</b> (58/637)	<b>8.6%</b> (55/639)	<b>10.9%</b> (49/451)	<b>9.2%</b> (11/120)

## Guidance for staff

Question number and text		National audit Round 4	East of England	London	Midlands	North East and Yorkshire	North West	South East	South West	Wales
27 OC	There is a named dignity lead to provide guidance, advice and consultation to staff	<b>73.8%</b> (144/195)	<b>88.2%</b> (15/17)	<b>59.3%</b> (16/27)	<b>63.3%</b> (19/30)	<b>85.3%</b> (29/34)	<b>80%</b> (20/25)	<b>75.9%</b> (22/29)	<b>70.6%</b> (12/17)	<b>68.8%</b> (11/16)

## Training and knowledge framework

Question number and text		National audit Round 4	East of England	London	Midlands	North East and Yorkshire	North West	South East	South West	Wales
19 OC	There is a training and knowledge framework or strategy that identifies necessary skill development in working with and caring for people with dementia	<b>95.9%</b> (187/195)	<b>94.1%</b> (16/17)	<b>96.3%</b> (26/27)	<b>90%</b> (27/30)	<b>100%</b> (34/34)	<b>92%</b> (23/25)	<b>96.6%</b> (28/29)	<b>100%</b> (17/17)	<b>100%</b> (16/16)
21 OC	The dementia awareness training includes input from/makes use of the experiences of people with dementia and their carers	<b>81.5%</b> (159/195)	<b>94.1%</b> (16/17)	<b>77.8%</b> (21/27)	<b>70%</b> (21/30)	<b>85.3%</b> (29/34)	<b>84%</b> (21/25)	<b>79.3%</b> (23/29)	<b>88.2%</b> (15/17)	<b>81.3%</b> (13/16)

## Dementia training formats

Question number and text	National audit Round 4	East of England	London	Midlands	North East and Yorkshire	North West	South East	South West	Wales	
22 OC	Format used to deliver basic dementia awareness training

## Governance

Items presented in this theme are from the organisational checklist (OC), staff questionnaire (SQ) and carer questionnaire (CQ). The questions relate to such topics as the environment in the hospital, involvement of the executive board, services available to carers and patients and engagement with carers.

### Care pathway

Question number and text		National audit Round 4	East of England	London	Midlands	North East and Yorkshire	North West	South East	South West	Wales
1 OC	A care pathway or bundle for patients with dementia is in place									
	Yes	<b>76.9%</b> (150/195)	<b>70.6%</b> (12/17)	<b>70.4%</b> (19/27)	<b>70%</b> (21/30)	<b>91.2%</b> (31/34)	<b>88.0%</b> (22/25)	<b>79.3%</b> (23/29)	<b>82.4%</b> (14/17)	<b>50%</b> (8/16)
	In development	<b>15.4%</b> (30/195)	<b>29.4%</b> (5/17)	<b>25.9%</b> (7/27)	<b>23.3%</b> (7/30)	<b>5.9%</b> (2/34)	<b>8.0%</b> (2/25)	<b>6.9%</b> (2/29)	<b>11.8%</b> (2/17)	<b>18.8%</b> (3/16)
1a OC	(If Q1=Yes or In development) A senior clinician is responsible for implementation and/ or review of the care pathway	<b>97.8%</b> (176/180)	<b>94.1%</b> (16/17)	<b>100%</b> (26/26)	<b>100%</b> (28/28)	<b>93.9%</b> (31/33)	<b>100%</b> (24/24)	<b>100.0%</b> (25/25)	<b>100%</b> (16/16)	<b>90.9%</b> (10/11)
1b OC	(If Q1=Yes or In development) There is a care pathway/bundle for Delirium									
	Yes	<b>64.4%</b> (116/180)	<b>82.4%</b> (14/17)	<b>76.9%</b> (20/26)	<b>60.7%</b> (17/28)	<b>75.8%</b> (25/33)	<b>41.7%</b> (10/24)	<b>56%</b> (14/25)	<b>75.0%</b> (12/16)	<b>36.4%</b> (4/11)
	Pathway in development	<b>27.8%</b> (50/180)	<b>17.6%</b> (3/17)	<b>23.1%</b> (6/26)	<b>32.1%</b> (9/28)	<b>18.2%</b> (6/33)	<b>45.8%</b> (11/24)	<b>28%</b> (7/25)	<b>6.3%</b> (1/16)	<b>63.6%</b> (7/11)
	Stroke									

Question number and text		National audit Round 4	East of England	London	Midlands	North East and Yorkshire	North West	South East	South West	Wales	
	Yes	<b>93.9%</b> (169/180)	<b>100%</b> (17/17)	<b>100%</b> (26/26)	<b>89.3%</b> (25/28)	<b>90.9%</b> (30/33)	<b>95.8%</b> (23/24)	<b>88%</b> (22/25)	<b>93.8%</b> (15/16)	<b>100.0%</b> (11/11)

# Recommendations

## Assessment

- 1 **Medical Directors and Directors of Nursing** should ensure that people with dementia admitted as an emergency are assessed for delirium using a standardised tool such as the 4AT or Confusion Assessment Method (CAM) (NICE CG 103 1.2)<sup>1</sup> and consider the symptom of pain as a contributory factor.

## Information and communication

- 2 **Directors of Nursing** should ensure that initial routine assessment of people with dementia includes:
  - Information about factors that can cause distress or agitation
  - Steps that can be taken to prevent these.
- 3 **Trust Chief Executive Officers** should ensure that, throughout the hospital, there is clear ongoing communication with the families and carers of people with dementia, including:
  - Information and written resources on admission
  - A private space for discussions
  - A record of discussions in patient notes
  - Provision for out of hours visiting.

## Staffing and training

- 4 **Trust Chief Executive Officers** should demonstrate that all staff providing care for people with dementia receive mandatory dementia training at a level (Tier 1, 2, 3) appropriate to their role and that:
  - Delirium and its relationship to dementia is included in the training
  - Information about the number of staff who received dementia training is recorded
  - The proportion of staff who have received dementia training is included in the annual Quality Account Report.
- 5 **Trust Chief Executive Officers** should ensure that contracts with external providers of services to the hospital include the requirement that service staff regularly working with people with dementia have received at least Tier 1 training in dementia (or higher, appropriate to their role).

## Nutrition

- 6 **Directors of Nursing** should ensure that the nutrition and hydration needs of patients with dementia are included in the nurse shift handovers.
- 7 **Trust Chief Executive Officers** should ensure that hospital external catering contracts and internal catering provision includes the requirement for the ready availability of finger foods and snacks for people with dementia

## Discharge

- 8 **Hospital discharge teams** should ensure that discussions take place with people with dementia and their carers and include:
  - The place of discharge
  - Support needs
  - A record of discussions should be recorded in the notes.
- 9 **Medical Directors** should ensure implementation of NICE guidance on continuity of care (NG 27, recommendation 1.5.10)<sup>7</sup> and the transmission of information at transfer home including:
  - The occurrence of delirium and behavioural symptoms of dementia
  - Recommendations for ongoing assessment or referral (for example to a memory clinic or community team) post-discharge.

## Governance

- 10 **Trust Chief Executive Officers** should use the King's Fund environmental assessment tools or another structured tool such as PLACE<sup>8</sup> to:
  - Conduct environmental reviews across the hospital
  - Implement improvements based upon the review findings.
- 11 **Trust Chief Executive Officers, Medical Directors and Directors of Nursing** should ensure that hospitals have developed policies that cover 'minimising moving patients at night' including information about:
  - Only moving patients with dementia between wards when there is a clinical need
  - Collation of information about inappropriate moves and reporting this to the Trust Board for review on at least an annual basis.

12 **Trust Executive Directors** should ensure that information is presented to the Board which clearly identifies the proportion of people with dementia within reporting on patients who experience:

- A fall during their admission
- A delay to their discharge
- Readmission within 30 days of discharge.

13 **Trust Dementia Leads** should ensure that people with dementia/carers are represented and can comment on aspects of the hospital's dementia strategy and action plans via the Dementia Working Group, Patient Experience Group or other appropriate forum.

## Overall

14 **Trust/Health Boards and their Chief Executive Officers** should:

- Work to implement these recommendations by World Alzheimer's Day 2020
- Publish progress made on implementing dementia recommendations in an annual Trust statement on dementia care
- Include other dementia friendly hospital initiatives, such as self-assessment based on the National Dementia Action Alliance 2018 charter<sup>6</sup>.

The National Audit of Dementia (care in general hospitals) is commissioned by the Healthcare Quality Improvement Partnership (HQIP) as part of the National Clinical Audit and Patient Outcomes Programme (NCAPOP). HQIP is led by a consortium of the Academy of Medical Royal Colleges, the Royal College of Nursing, and National Voices. Its aim is to promote quality improvement in patient outcomes, and in particular, to increase the impact that clinical audit, outcome review programmes and registries have on healthcare quality in England and Wales. HQIP holds the contract to commission, manage and develop the National Clinical Audit and Patient Outcomes Programme (NCAPOP), comprising around 40 projects covering care provided to people with a wide range of medical, surgical and mental health conditions. The programme is funded by NHS England/NHS Improvement, the Welsh Government and, with some individual projects, other devolved administrations and crown dependencies [www.hqip.org.uk/national-programmes](http://www.hqip.org.uk/national-programmes).

This audit was commissioned by the Healthcare Quality Improvement Partnership (HQIP). The report is produced and published by the Royal College of Psychiatrists' Centre for Quality Improvement.
