Many thanks to Hwyl for permission to use the cover artwork. Hwyl is an art project run by Dementia Matters in Powys (DMiP) and Arts Alive Wales based at the Brecon War Memorial Hospital. The project focuses on working with elderly patients on hospital wards, with their families, carers, the ward staff and artists on a weekly basis.

With thanks to Rhiannon Davies (DMiP) and Tessa Waite (Arts Alive Wales).

Introduction to the appendices

This is the appendices for your local report. Your local report is in a separate document. The appendices present data from Round 3 of the National Audit of Dementia, both at a national level and for your hospital. Data for your hospital in Round 2 is also shown where applicable. When comparing Round 2 data with Round 3 data, please be aware that differences in sample sizes and slight wording changes to some questions, can affect results in both rounds. Therefore, conclusions made from comparing the data should be with caution. Hospitals with less than five returns for the carer or staff questionnaires have not received any data and returns of 5 to 9 questionnaires have not received demographic information. The table below shows how the data tables in the appendices are laid out and what information you can find in each cell.

Std no. [Type]	Question number and text		National audit Round 3: % Num/Den	Your hospital Round 3: % Num/Den	Your hospital Round 2: % Num/Den
Standard reference and type. Standards document can be found on the audit website .	Question number. Orange items in the casenote audit appendix show low inter-rater reliability.	Question wording as in tool.	The national audit refers to all hospitals from England and Wales that participated in the Round 3 audit.	Data for your hospital from Round 3.	If the same question or a similar question was asked in Round 2, we have provided your Round 2 response for comparison. The carer and staff questionnaires are new tools and therefore this column has been excluded in these appendices.
			We have provided the percentage 'yes' response (unless otherwise indicated) and the numerator/denominator. The denominator will change throughout the appendices, depending on whether questions were routed (not asked in some instances), 'N/A' responses were chosen (these have been excluded from the analyses), or where staff and carers did not respond.		

For the organisational checklist, data from 199 hospitals are included in the national audit column (all the registered participants).

195 hospitals participated in the casenote audit, returning 10047 casenotes and this is shown in the national audit column. The national audit column for the casenote audit also shows the median and the inter quartile range for each question (where applicable). Question items which were found to have lower agreement in the inter-rater reliability analysis (see audit [website](#)) have been coloured orange.

196 hospitals returned carer questionnaires. Data from all questionnaires (4664) is presented in the carer questionnaire data tables in Appendix E.

198 hospitals returned staff questionnaires. Data from all questionnaires (14416) is presented in Appendix G. For some questionnaire items, the data for the two most positive answers have been combined, as well as being presented separately. This is provided both at a national level and for your hospital.

Appendix H: Staff suggestions for your hospital

The staff questionnaire included a question asking staff to make one suggestion on how their hospital could improve care and support provided to people with dementia. Below, all suggestions from staff at Nevill Hall Hospital are provided.

Registered Nurses (Band 5 or 6)

A single quiet room/ TV room with historic books, DVDs, games, etc.
By having more awareness.
Employment of a nurse that specialises in dementia care.
Having time to spend with patients that have dementia. As ward is an acute ward, there is lack of time to even sit and talk to them. More staff to come in and liaise with the patients.
Increase in staff.
Locked doors on care of elderly wards to allow dementia/ confused patients to be more mobile around ward without restriction.
More staff to help care!
More time allowed i.e. more staff.
More time with patients.
Provide more training. More available people to spend time with them.
Study days.

Registered Nurses (Band 7 or above)

Better care plans to guide individualised care planning. Outside agencies would be welcome to come and help with activities.
Further training for all staff.

Healthcare Assistants

A specialised nurse for dementia.
More mind stimulating tasks. Outside agencies to come into hospital (dementia trained).
More one to one care (specialing). More specials needed for assistance with feeding while ward is busy.
More specials needed.
More staff on the wards.
More staff.
More time given to interact.
More up to date training or any training/ courses available. It would be nice to have the ward adapted for dementia patients and the amenities e.g. Toilet too low. More board displays for staff and relatives to read and have insight into dementia. Unless extra snack menu is requested it is not always possible to get food for patients especially at night. I suggested that we have a separate snack fridge or cupboard for patients if they fancy something in the evening. We share with another ward and the biscuits don't seem to last and care of the elderly need more nutrition as they only eat small amounts of food.

Healthcare Assistants

Offer more training.

Proper staffing levels - not equipped to deal with dementia patients and most are 1-4 or 1-8 not 1-1. The ward is very unsafe due to staffing levels. Management don't care.

Provide more staff to accommodate their complex needs.

Support staff that try their hardest. Extra staffing numbers. Families willing to help. Dementia wards. Earlier mealtimes not having lunch at 12:00 then waiting 7 hours before dinner comes. Better profiling beds.

Updated equipment. Secure units/ wards as patients wander due to no staff or lack of staff.

Up to date training in this area.

Doctors

Orientation information in each bay e.g. time, date, hospital name.

Training junior doctors about how to deal with people with dementia.

Allied Healthcare Professionals

"This is Me" booklets completed promptly for all dementia patients.

More people with dementia could have a "this is me" book at their bedside whilst they are an inpatient.

Students

Compulsory "This is Me" documentation on admission. Extra staff to provide 1 to 1 care for those with dementia who require it i.e. feeding, supervision around the ward, talk with the patient.

Day room improved to be dementia friendly environment.

Enable more time to be spent with patients and have family/ friend support when necessary.

Therapy Assistants & Allied Healthcare Professional Assistants

More dementia friendly areas, for activities and reminiscence etc.

Ward-based Administrators

No comments from ward-based administrators for your hospital.
