

National Audit of Dementia
Care in General Hospitals 2016-2017
Local report appendices for:
Chesterfield Royal Hospital
Chesterfield Royal Hospital NHS Foundation Trust
July 2017

Commissioned by:

Many thanks to Hwyl for permission to use the cover artwork. Hwyl is an art project run by Dementia Matters in Powys (DMiP) and Arts Alive Wales based at the Brecon War Memorial Hospital. The project focuses on working with elderly patients on hospital wards, with their families, carers, the ward staff and artists on a weekly basis.

With thanks to Rhiannon Davies (DMiP) and Tessa Waite (Arts Alive Wales).

Introduction to the appendices

This is the appendices for your local report. Your local report is in a separate document. The appendices present data from Round 3 of the National Audit of Dementia, both at a national level and for your hospital. Data for your hospital in Round 2 is also shown where applicable. When comparing Round 2 data with Round 3 data, please be aware that differences in sample sizes and slight wording changes to some questions, can affect results in both rounds. Therefore, conclusions made from comparing the data should be with caution. Hospitals with less than five returns for the carer or staff questionnaires have not received any data and returns of 5 to 9 questionnaires have not received demographic information. The table below shows how the data tables in the appendices are laid out and what information you can find in each cell.

Std no. [Type]	Question number and text		National audit Round 3: % Num/Den	Your hospital Round 3: % Num/Den	Your hospital Round 2: % Num/Den
Standard reference and type. Standards document can be found on the audit website .	Question number. Orange items in the casenote audit appendix show low inter-rater reliability.	Question wording as in tool.	The national audit refers to all hospitals from England and Wales that participated in the Round 3 audit.	Data for your hospital from Round 3.	If the same question or a similar question was asked in Round 2, we have provided your Round 2 response for comparison. The carer and staff questionnaires are new tools and therefore this column has been excluded in these appendices.
			We have provided the percentage 'yes' response (unless otherwise indicated) and the numerator/denominator. The denominator will change throughout the appendices, depending on whether questions were routed (not asked in some instances), 'N/A' responses were chosen (these have been excluded from the analyses), or where staff and carers did not respond.		

For the organisational checklist, data from 199 hospitals are included in the national audit column (all the registered participants).

195 hospitals participated in the casenote audit, returning 10047 casenotes and this is shown in the national audit column. The national audit column for the casenote audit also shows the median and the inter quartile range for each question (where applicable). Question items which were found to have lower agreement in the inter-rater reliability analysis (see audit [website](#)) have been coloured orange.

196 hospitals returned carer questionnaires. Data from all questionnaires (4664) is presented in the carer questionnaire data tables in Appendix E.

198 hospitals returned staff questionnaires. Data from all questionnaires (14416) is presented in Appendix G. For some questionnaire items, the data for the two most positive answers have been combined, as well as being presented separately. This is provided both at a national level and for your hospital.

Appendix H: Staff suggestions for your hospital

The staff questionnaire included a question asking staff to make one suggestion on how their hospital could improve care and support provided to people with dementia. Below, all suggestions from staff at Chesterfield Royal Hospital are provided.

Registered Nurses (Band 5 or 6)

Ability to have more communal areas to take patients with dementia so they can eat and talk together. Memory rooms.
Being able to spend more time reassuring patients with dementia. increase staff nurses.
Better staffing to enable staff to spend quality time with dementia patients.
Better ward environment.
Give good quality of care. Make the time easy.
I think an activities room (possibly with access to a garden) where visitors and enhanced support workers can take patients with dementia and their carers would be invaluable for people with dementia. I also think it would give our staff more job satisfaction, improve nutrition and hydration (if there was access to drinks, snacks and finger food there), reduce confusion and challenging behaviour and engage patients and help staff to build relationships with them. I think we need more day rooms with facilities to make drinks and provide snacks. Also, more picture menus to assist people with dementia in picking their meals.
Increased staffing to allow time for activities whilst inpatient.
More input from the team initially. From A+E to direct ward base transfer.
More intervention from day number 1 of admission from mental health team.
More staff would enable us to have more time to spend with patients.
More staff, or less patients, to give more time to spend with patients. Provide separate areas for eating and therapy instead of at the side of the bed. Coloured plates and cups, signage for toilets and bathrooms would be advantageous.
Not always time to provide reassurance and time to talk with them due to other responsibilities on the ward.
Not on general wards. No secure areas to allow walking around ward, not near exit to outside. Activities geared towards dementia, possibly activities coordinator,
Provide sufficient staffing to provide general care as well as more supervision of patients with dementia.
Reminiscence rooms to help stimulate patients, keep them calm and help them retain long term memory.
To prepare more of the staff like staff nurses/ HCAs - how to behave with the patients with dementia.

Registered Nurses (Band 7 or above)

Activity coordinators.
More HCAs, activity coordinator.

Healthcare Assistants

Being able to have more time to sit and speak and listen to our patients, but with other workload it is hard. Giving more staff would probably help with this.

Extra staff for patients with higher demands, more staff for activities.

Improve wards - make them more dementia friendly. Bright colours, bigger, picture signs and made more 'homely'.

Make sure that healthcare support staff have time to spend with patients and not rushed.

More day rooms, televisions.

More staff so can make sure all patients are safe. We have a lot of patients with dementia who wander but are unsteady on their feet but unfortunately don't have enough staff to safely watch every one which results in a lot of falls.

More staff to provide activities to some patients to enable patients to walk around aided.

More training to most wards.

Doctors

Easily accessible simple guidelines.

More availability of sources of stimulation and interest and the space and staff to allow people to explore these things. More work could be done to make ward layouts and decor/ signage more dementia-friendly.

More time to spend with patients with dementia.

Volunteers to help with feeding and companionship on ward.

Allied Healthcare Professionals

More compulsory training for dementia as majority of patients on some wards have it. e-learning access and managers accommodating to enable us to do this (training).

Students

Talking more about dementia and encouraging patients to engage in activities.

Therapy Assistants & Allied Healthcare Professional Assistants

No comments from therapy assistants and allied healthcare professional assistants for your hospital.

Ward-based Administrators

No comments from ward-based administrators for your hospital.

Other / Unknown

Having more day rooms, so that daily activities can be carried out with our dementia patients.

More staff so they could spend time with dementia patients in a calm environment. More activities. Have a specialist dementia ward.
