NATIONAL AUDIT OF
DEMENTIA

National Audit of Dementia
Care in General Hospitals 2016-2017
Local report appendices for:
Cheltenham General Hospital
Gloucestershire Hospitals NHS Foundation Trust
July 2017

Commissioned by:

Many thanks to Hwyl for permission to use the cover artwork. Hwyl is an art project run by Dementia Matters in Powys (DMiP) and Arts Alive Wales based at the Brecon War Memorial Hospital. The project focuses on working with elderly patients on hospital wards, with their families, carers, the ward staff and artists on a weekly basis.

With thanks to Rhiannon Davies (DMiP) and Tessa Waite (Arts Alive Wales).

Table of Contents

Introduction to the appendices	2
Appendix A: Organisational checklist data	3
Appendix B: Patient demographics	15
Appendix C: Casenote audit data	19
Appendix D: Carer demographics	28
Appendix E: Carer questionnaire data	29
Appendix F: Staff demographics	32
Appendix G: Staff questionnaire data	34
Appendix H: Verbatim staff suggestions for your hospital, presented by job role	40

Introduction to the appendices

This is the appendices for your local report. Your local report is in a separate document. The appendices present data from Round 3 of the National Audit of Dementia, both at a national level and for your hospital. Data for your hospital in Round 2 is also shown where applicable. When comparing Round 2 data with Round 3 data, please be aware that differences in sample sizes and slight wording changes to some questions, can affect results in both rounds. Therefore, conclusions made from comparing the data should be with caution. Hospitals with less than five returns for the carer or staff questionnaires have not received any data and returns of 5 to 9 questionnaires have not received demographic information. The table below shows how the data tables in the appendices are laid out and what information you can find in each cell.

Std no. [Type]	Question number and text		National audit Round 3: % Num/Den	Your hospital Round 3: % Num/Den	Your hospital Round 2: % Num/Den
Standard reference and type. Standards document can be found on the audit website .	Question number. Orange items in the casenote audit appendix show low inter-rater reliability.	Question wording as in tool.	The national audit refers to all hospitals from England and Wales that participated in the Round 3 audit.	Data for your hospital from Round 3.	If the same question or a similar question was asked in Round 2, we have provided your Round 2 response for comparison. The carer and staff questionnaires are new tools and therefore this column has been excluded in these appendices.
			We have provided the percentage 'yes' response (unless otherwise indicated) and the numerator/denominator. The denominator will change throughout the appendices, depending on whether questions were routed (not asked in some instances), 'N/A' responses were chosen (these have been excluded from the analyses), or where staff and carers did not respond.		

For the organisational checklist, data from 199 hospitals are included in the national audit column (all the registered participants).

195 hospitals participated in the casenote audit, returning 10047 casenotes and this is shown in the national audit column. The national audit column for the casenote audit also shows the median and the inter quartile range for each question (where applicable). Question items which were found to have lower agreement in the inter-rater reliability analysis (see audit [website](#)) have been coloured orange.

196 hospitals returned carer questionnaires. Data from all questionnaires (4664) is presented in the carer questionnaire data tables in Appendix E.

198 hospitals returned staff questionnaires. Data from all questionnaires (14416) is presented in Appendix G. For some questionnaire items, the data for the two most positive answers have been combined, as well as being presented separately. This is provided both at a national level and for your hospital.

Appendix A: Organisational checklist data

Governance and delivery of care

Std no. [Type]	Question number and text	National audit Round 3: % Num/Den	Your hospital Round 3: % Num/Den	Your hospital Round 2: % Num/Den	
4.1 [2]	1	A care pathway or bundle for patients with dementia is in place:			
		Yes	60.8% 121/199	Yes	Yes
		In development	26.1% 52/199		
4.2 [2]	1a	<i>(If Q1=Yes or In development)</i> A senior clinician is responsible for implementation and/ or review of the care pathway: (y/n)	97.1% 168/173	Yes	Yes
4.1 [2]	1b	<i>(If Q1=Yes or In development)</i> The dementia care pathway/ bundle is integrated within or linked to the following care pathways:			
		Delirium			
		Yes	65.9% 114/173	Yes	New question for Round 3
		Pathway in development	26.6% 46/173		
		Stroke			
		Yes	32.9% 57/173	Yes	New question for Round 3
		Pathway in development	21.4% 37/173		
		Fractured neck of femur			
		Yes	43.6% 75/172	Yes	New question for Round 3
Pathway in development	24.4% 42/172				
4.7 [2]	2	The Executive Board regularly reviews information collected on:			
	2a	Re-admissions, in which patients with dementia can be identified in the total number of patients re-admitted (y/n)	31.7% 63/199	Yes	Yes
	2b	Delayed discharge/ transfers, in which patients with dementia can be identified in the total number of patients with delayed discharge/ transfers (y/n)	31.7% 63/199	Yes	Yes
4.4 [2]	3	The Executive Board regularly reviews the number of in-hospital falls and the breakdown of the immediate causes, in which patients with dementia can be identified (y/n)	60.3% 120/199	Yes	Yes

Std no. [Type]	Question number and text	National audit Round 3: % Num/Den	Your hospital Round 3: % Num/Den	Your hospital Round 2: % Num/Den	
4.5 [2]	4	The Executive Board regularly receives feedback from the following:			
	4a	Clinical Leads for older people and people with dementia including Modern Matrons/ Nurse Consultant (y/n)	84.9% 169/199	Yes Yes	
	4b	Complaints – analysed by age (y/n)	52.3% 104/199	Yes Yes	
	4c	Patient Advice and Liaison Services (PALS) – in relation to the services for older people and people with dementia (y/n/na (hospitals in Wales))	58.6% 106/181	Yes Yes	
	4d	Patient/ public forums or local Healthwatch – in relation to services for older people and people with dementia (y/n)	67.3% 134/199	Yes Yes	
4.11 [2]	5	There are champions for dementia at:			
	5a	Directorate level (y/n)	81.9% 163/199	Yes Yes	
	5b	Ward level (y/n)	93.5% 186/199	Yes Yes	
N4a [3]	6	Dementia specialist nurses are employed in line with Royal College of Nursing guidance (there is at least one full time dementia specialist nurse for every 300 admissions of people with dementia per year): (y/n)	This question is not reported on as feedback showed hospitals found it difficult to interpret.		
N4b [3]	7	Has a strategy or plan for carer engagement been produced (e.g. using Triangle of Care self-assessment tool)? (y/n)	76.9% 153/199	Yes New question for Round 3	
	8	<i>(If Q7=Yes)</i> Is implementation of the strategy or plan scheduled for review?			
		Yes, more than once a year	41.2% 63/153	Yes, once a year	New question for Round 3
		Yes, once a year	34.6% 53/153		
Yes, less than once a year	20.3% 31/153				

Std no. [Type]	Question number and text	National audit Round 3: % Num/Den	Your hospital Round 3: % Num/Den	Your hospital Round 2: % Num/Den	
N4c [3]	9	A Dementia Working Group is in place and reviews the quality of services provided in the hospital: (y/n)	93.5% 186/199	Yes	New question for Round 3
	9a	<i>(If Q9=Yes)</i> The group meets:			
		Annually	0.5% 1/186	Quarterly	New question for Round 3
		Bi-annually	0.5% 1/186		
		Quarterly	30.1% 56/186		
		Six-weekly	4.3% 8/186		
		Monthly	33.3% 62/186		
		Bi-monthly	29% 54/186		
		Weekly	0.5% 1/186		
		Unknown	1.6% 3/186		
	9b	<i>(If Q9=Yes)</i> The group includes:			
		Healthcare professionals	100% 186/186	√	New question for Round 3
		Organisations e.g. Alzheimer's Society	64% 119/186	√	
Carer/ service user representation	66.1% 123/186	√			
N7a [3]	10	Ward staffing levels (nurses, midwives and care staff) are made available for the public to view on a monthly basis: (y/n)	88.4% 176/199	Yes	New question for Round 3
	11	An evidence-based tool is used for establishing ward staffing levels: (y/n)	99% 197/199	Yes	New question for Round 3
3.7 [1]	12	Protected mealtimes are established in all wards that admit adults with known or suspected dementia: (y/n)	98% 195/199	Yes	Yes
	12a	<i>(If Q12=Yes)</i> Wards' adherence to protected mealtimes is reviewed and monitored: (y/n)	88.7% 173/195	Yes	Yes
3.8 [1]	13	The hospital has in place a scheme/ programme which allows identified carers of people with dementia to visit at any time including at mealtimes (e.g. Carer's Passport): (y/n)	88.9% 177/199	Yes	New question for Round 3

Discharge and transfer monitoring

Std no. [Type]	Question number and text		National audit Round 3: % Num/Den	Your hospital Round 3: % Num/Den	Your hospital Round 2: % Num/Den
N5a [3]	14	Instances where less than 24 hours notice of discharge has been given to carers or family are compiled and reported to the Executive Board:			
		Yes, within the past 6 months	4% 8/199	No	New question for Round 3
		Yes, within the last year	1.5% 3/199		
N3c [3]	15	Instances of night time bed moves (i.e. between the evening meal and breakfast the next morning) are noted and reported at Executive Board level: (y/n)	38.2% 76/199	Yes	New question for Round 3

Use of personal information documents

Std no. [Type]	Question number and text		National audit Round 3: % Num/Den	Your hospital Round 3: % Num/Den	Your hospital Round 2: % Num/Den
1.14 [1]	16	There is a formal system (pro-forma or template) in place in the hospital for gathering information pertinent to caring for a person with dementia: (y/n)	98.5% 196/199	Yes	Yes
	17a	<i>(If Q16=Yes)</i> Information collected by the pro-forma includes personal details, preferences and routines: (y/n)	100% 196/196	Yes	Yes
	17b	<i>(If Q16=Yes)</i> Information collected by the pro-forma includes reminders or support with personal care: (y/n)	98.5% 193/196	Yes	Yes
	17c	<i>(If Q16=Yes)</i> Information collected by the pro-forma includes recurring factors that may cause or exacerbate distress: (y/n)	100% 196/196	Yes	Yes
	17d	<i>(If Q16=Yes)</i> Information collected by the pro-forma includes support or actions that can calm the person if they are agitated: (y/n)	99% 194/196	Yes	Yes
1.15 [3]	17e	<i>(If Q16=Yes)</i> Information collected by the pro-forma includes life details which aid communication: (y/n)	99.5% 195/196	Yes	Yes
1.14 [1]	18	<i>(If Q16=Yes)</i> Information collected by the pro-forma includes how the person with dementia communicates with others/ understands communication: (y/n)	99.5% 195/196	Yes	New question for Round 3

Std no. [Type]	Question number and text		National audit Round 3: % Num/Den	Your hospital Round 3: % Num/Den	Your hospital Round 2: % Num/Den
1.14 [1]	19	(If Q16=Yes) The form prompts staff to approach carers or relatives to collate necessary information: (y/n)	93.4% 183/196	Yes	Yes
20	Documenting use of personal information in practice: Hospitals selected three wards (not mental health wards) which had the highest admissions of people with dementia. 10 patients in these wards were checked to see if the personal information document was present. Included were patients with dementia who needed a personal information document such as "This is Me" (any patients with dementia who did not require a personal information document were excluded).				
	Ward 1:		Ryeworth		New question for Round 3
	Ward 2:		Woodmancote		
	Ward 3:		Hazleton		
	Number of patients checked:		-	10	New question for Round 3
	Range		0-40	-	-
	Median		10	-	-
	Number of these patients where the information was present:		-	2	New question for Round 3
	Percentage of patients where the information was present:		-	20%	New question for Round 3
	Range		0-100%	-	-
	Mean		49%	-	-
Median		50%	-	-	

Recognition of dementia

Std no. [Type]	Question number and text		National audit Round 3: % Num/Den	Your hospital Round 3: % Num/Den	Your hospital Round 2: % Num/Den
9.3 [1]	21	There is a system in place across the hospital that ensures that all staff in the ward or care area are aware of the person's dementia or condition and how it affects them: (y/n)	90.5% 180/199	Yes	Yes

Std no. [Type]	Question number and text	National audit Round 3: % Num/Den	Your hospital Round 3: % Num/Den	Your hospital Round 2: % Num/Den	
9.3 [1]	<i>(If Q21=Yes)</i> Please say what this is:				
	21a	A visual indicator, symbol or marker	91.1% 164/180	√	A visual indicator, symbol or marker
		Alert sheet or electronic flag	23.9% 43/180	-	
		A box to highlight or alert dementia condition in the notes or care plan	33.9% 61/180	-	
		Other	18.9% 34/180	-	
	22	There is a system in place across the hospital that ensures that staff from other areas are aware of the person's dementia or condition whenever the person accesses other treatment areas: (y/n)	70.4% 140/199	Yes	No
	<i>(If Q22=Yes)</i> Please say what this is:				
	22a	A visual indicator, symbol or marker	87.1% 122/140	√	N/A
		Alert sheet or electronic flag	18.6% 26/140	-	
		A box to highlight or alert dementia condition in the notes or care plan	20.7% 29/140	-	
Other		17.9% 25/140	-		
9.13 [2]	23	The dementia lead or dementia working group collates feedback from carers on the written and verbal information provided to them: (y/n)	81.9% 163/199	Yes	New question for Round 3

Training, learning and development

Std no. [Type]	Question number and text	National audit Round 3: % Num/Den	Your hospital Round 3: % Num/Den	Your hospital Round 2: % Num/Den	
7.2 [2]	24	There is a training and knowledge framework or strategy that identifies necessary skill development in working with and caring for people with dementia: (y/n)	95.5% 190/199	Yes	Yes

Std no. [Type]	Question number and text	National audit Round 3: % Num/Den	Your hospital Round 3: % Num/Den	Your hospital Round 2: % Num/Den	
7.4 [2]	25	The following questions are about training that is provided to acute healthcare staff who are involved in the care of people with dementia (or suspected dementia):			
		Dementia awareness training:			
		Doctors			
		Mandatory	46.2% 92/199	√	√
		Provided on induction	63.3% 126/199	√	√
		Provided in the last 12 months	58.8% 117/199	-	√
		Not provided in the last 12 months	8.5% 17/199	-	-
		Nurses			
		Mandatory	51.8% 103/199	√	√
		Provided on induction	74.4% 148/199	√	√
		Provided in the last 12 months	68.3% 136/199	-	√
		Not provided in the last 12 months	1% 2/199	-	-
		Healthcare assistants			
		Mandatory	51.8% 103/199	√	√
		Provided on induction	71.4% 142/199	√	√
		Provided in the last 12 months	68.3% 136/199	-	√
		Not provided in the last 12 months	1% 2/199	-	-
		Other allied healthcare professionals, e.g. physiotherapists, dieticians			
		Mandatory	47.7% 95/199	√	√
		Provided on induction	64.8% 129/199	√	√
		Provided in the last 12 months	67.8% 135/199	-	√
		Not provided in the last 12 months	3.5% 7/199	-	-

Std no. [Type]	Question number and text	National audit Round 3: % Num/Den	Your hospital Round 3: % Num/Den	Your hospital Round 2: % Num/Den	
7.4 [2]	25	Support staff in the hospital, e.g. housekeepers, porters, receptionists			
		Mandatory	41.2% 82/199	√	√
		Provided on induction	57.8% 115/199	√	√
		Provided in the last 12 months	63.8% 127/199	-	√
		Not provided in the last 12 months	11.1% 22/199	-	-
7.11 [3]	26	Involvement of people with dementia and carers and use of their experiences is included in the training for ward staff: (y/n)	82.4% 164/199	Yes	Yes
7.5 [3]	27	What format is used to deliver basic dementia awareness training?			
		eLearning module	72.9% 145/199	√	New question for Round 3
		Workshop or study day	91% 181/199	√	
		Higher education module	22.6% 45/199	-	
		Other	29.1% 58/199	-	

7.5 [3]	28	Hospitals were asked to provide figures on the number of staff trained in dementia awareness. Only 34 hospitals could provide this for at least one of the years specified. Therefore, there is no data on training figures.
N7b [3]	29	What is the total number of adult beds excluding maternity and mental health beds in your hospital at 31 March 2016? This information was to compare with question 28 so is therefore not included.

Specific resources supporting people with dementia

Std no. [Type]	Question number and text		National audit Round 3: % Num/Den	Your hospital Round 3: % Num/Den	Your hospital Round 2: % Num/Den
6.2 [2]	30	The hospital has access to intermediate care services, which will admit people with dementia: (y/n)	93% 185/199	Yes	No
6.3 [3]	30a	<i>(If Q30=Yes)</i> Access to intermediate care services allows people with dementia to be admitted to intermediate care directly and avoid unnecessary hospital admission: (y/n)	84.3% 156/185	Yes	N/A
7.1 [2]	31	There is a named dignity lead to provide guidance, advice and consultation to staff: (y/n)	70.4% 140/199	Yes	Yes
6.4 [2]	32	There is a named person/ identified team who takes overall responsibility for complex needs discharge and this includes people with dementia: (y/n)	95.5% 190/199	Yes	Yes
6.5 [2]	33a	<i>(If Q32=Yes)</i> This person/ team has training in ongoing needs of people with dementia: (y/n)	92.6% 176/190	Yes	Yes
6.6 [3]	33b	<i>(If Q32=Yes)</i> This person/ team has experience of working with people with dementia and their carers: (y/n)	98.4% 187/190	Yes	Yes
6.7 [2]	34	There is a social worker or other designated person or team responsible for working with people with dementia and their carers, and providing advice and support, or directing to appropriate organisations or agencies: (y/n)	75.9% 151/199	Yes	No

Std no. [Type]	Question number and text	National audit Round 3: % Num/Den	Your hospital Round 3: % Num/Den	Your hospital Round 2: % Num/Den	
N3b [2]	35	The hospital can provide finger foods for people with dementia (please select one option only):			New question for Round 3
		Patients can choose a complete meal option (including vegetarian) that can be eaten without cutlery (finger food) on every day	65.3% 130/199	-	
		Patients can choose a complete meal option (including vegetarian) that can be eaten without cutlery on four to six days per week or more	1% 2/199	-	
		Patients can choose a complete meal option (including vegetarian) that can be eaten without cutlery on two or three days per week or more	0% 0/199	-	
		Patients can choose a complete meal option (including vegetarian) that can be eaten without cutlery on only one day per week	0% 0/199	-	
		Finger food consists of sandwiches/wraps only	33.7% 67/199	√	
		Patients who may be unable to use cutlery will never be admitted to the hospital	0% 0/199	-	
3.11 [2]	36	The hospital can provide 24 hour food services for people with dementia (please select one option only):			New question for Round 3
		In addition to the main meals, other food, for example toast, sandwiches, cereals, soup, and lighter hot dish(es) are available 24 hours a day	50.8% 101/199	-	
		In addition to the main meals, other food, for example toast, sandwiches, cereals, soup are available, but less than 24 hours a day	10.6% 21/199	√	
		Simple food supplies for example bread, cereal, yoghurt and biscuits are available 24 hours a day	32.2% 64/199	-	
		Only snacks (biscuits, cake) are available 24 hours a day	3% 6/199	-	
Food is not available 24 hours a day	3.5% 7/199	-			
6.10 [2]	37	There is access to advocacy services with experience and training in working with people with dementia: (y/n)	95% 189/199	Yes	Yes

Environment

Std no. [Type]	Question number and text	National audit Round 3: % Num/Den	Your hospital Round 3: % Num/Den	Your hospital Round 2: % Num/Den		
6.11 [3]	Opportunities for social interaction for patients with dementia are available (e.g. to eat/ socialise away from their bed area with other patients):					
	38	On all adult wards	15.1% 30/199	-	New question for Round 3	
		On care of the elderly wards	38.7% 77/199	√		
		Other	30.2% 60/199	-		
		No	16.1% 32/199	-		
N8a [3]	The physical environment within the hospital has been reviewed using an appropriate tool (e.g. King's Fund Enhancing the Healing Environment) to establish whether it is "dementia-friendly":					
	39	Throughout the hospital	42.7% 85/199	√	New question for Round 3	
		All adult wards/ areas	13.6% 27/199	-		
		All care of the elderly wards/ areas	18.1% 36/199	-		
		Designated dementia wards only	3% 6/199	-		
		Other	13.1% 26/199	-		
		No	9.5% 19/199	-		
	40	<i>(If Q39=Yes)</i> Environmental changes based on the review are:				
			Completed	15% 27/180	-	New question for Round 3
			Underway	56.7% 102/180	√	
			Planned but not yet underway	10% 18/180	-	
			Planned but funding has not been identified	15.6% 28/180	-	
			Plans are not in place	2.8% 5/180	-	

Std no. [Type]	Question number and text	National audit Round 3: % Num/Den	Your hospital Round 3: % Num/Den	Your hospital Round 2: % Num/Den	
N8a [3]	<i>(If Q39=Yes)</i> Service users/ carers/ lay volunteers have been part of the team reviewing the environment:				
	41	Throughout the hospital	36.7% 66/180	√	New question for Round 3
		All adult wards/ areas	9.4% 17/180	-	
		All care of the elderly wards/ areas	13.3% 24/180	-	
		Designated dementia wards only	5% 9/180	-	
		Other	13.3% 24/180	-	
		They have not been part of the team	22.2% 40/180	-	
	<i>(If Q39=Yes)</i> There are plans to further review the changes implemented:				
	42	Yes, we are already undertaking/ have already done this	49.4% 89/180	-	New question for Round 3
		Yes, once the work is completed	40% 72/180	√	
		No plans are in place	10.6% 19/180	-	

Appendix B: Patient demographics

Age range	National audit Round 3: % (N)	Your hospital Round 3: % (N)
34 - 65	2.2% (221)	0% (0)
66 - 80	24.3% (2445)	36.7% (11)

Assessment

Multidisciplinary assessment

Std no. [Type]	Question number and text		National audit Round 3: % Num/Den (Median, IQR)	Your hospital Round 3: % Num/Den	Your hospital Round 2: % Num/Den	
1.9 [1]	14	An assessment of mobility was performed by a healthcare professional: (y/n/could not be assessed for recorded reasons)	93.8% 8558/9126 (96%, 91-98%)	100% 28/28	100% 25/25	
	15	An assessment of nutritional status was performed by a healthcare professional: (y/n/could not be assessed for recorded reasons)	89.8% 8832/9837 (93%, 86-96%)	75% 21/28	87.2% 34/39	
	15a	(If Q15=Yes) The assessment of nutritional status includes recording of BMI (Body Mass Index) or weight:				
			Yes, there is a recording of the patient's BMI or weight	85.9% 7580/8822 (89%, 79-96%)	76.2% 16/21	38.2% 13/34
		Other action taken	4% 352/8822 (2%, 0-5%)	0% 0/21	New answer options for Round 3	
	Yes or other action taken	89.9% 7932/2288 (93%, 85-98%)	76.2% 16/21			
1.10 [1]	16	Has a formal pressure ulcer risk assessment been carried out and score recorded? (y/n)	95.5% 9590/10044 (98%, 94-100%)	96.7% 29/30	100% 40/40	
1.12 [1]	17	As part of the multidisciplinary assessment has the patient been asked about any continence needs? (y/n/could not be assessed for recorded reasons)	88% 8572/9744 (92%, 85-97%)	96.4% 27/28	100% 34/34	
1.11 [1]	18	As part of the multidisciplinary assessment has the patient been assessed for the presence of any pain? (y/n/could not be assessed for recorded reasons)	83.2% 8185/9840 (90%, 77-98%)	100% 30/30	100% 34/34	

Std no. [Type]	Question number and text		National audit Round 3: % Num/Den (Median, IQR)	Your hospital Round 3: % Num/Den	Your hospital Round 2: % Num/Den
1.13 [1]	19	Has an assessment of functioning been carried out?			
		Yes, a standardised assessment has taken place	45.3% 4212/9294 (45%, 23-66%)	89.3% 25/28	39.4% 13/33
		Yes, an occupational therapy and/or a physiotherapy assessment has taken place	42.8% 3977/9294 (44%, 26-58%)	7.1% 2/28	New answer options for Round 3
		Yes, other	1.7% 161/9294 (0%, 0-2%)	3.6% 1/28	
		Yes (all options)	89.8% 8350/9294 (92%, 85-96%)	100% 28/28	

Mental state assessment

Std no. [Type]	Question number and text		National audit Round 3: % Num/Den (Median, IQR)	Your hospital Round 3: % Num/Den	Your hospital Round 2: % Num/Den
1.3 [2]	20	Has a standardised mental status test been carried out? (y/n/could not be assessed for recorded reasons)	54% 4684/8682 (55%, 38-72%)	66.7% 18/27	52.8% 19/36
1.4 [2]	21	Has an assessment been carried out for recent changes or fluctuation in behaviour that may indicate the presence of delirium?			
		Yes, and there were indications that delirium may be present	25.9% 2603/10047 (24%, 14-36%)	30% 9/30	5% 2/40
		Yes, but there was no indication that delirium may be present	18.5% 1863/10047 (15%, 6-25%)	36.7% 11/30	0% 0/40
		Yes (both options)	44.5% 4466/10047 (42%, 27-60%)	66.7% 20/30	5% 2/40
1.5 [2]	21a	(If Q21=Yes) Has the patient been clinically assessed for delirium by a healthcare professional? (y/n)	85.3% 2220/2603 (90%, 78-100%)	88.9% 8/9	50% 1/2

Information about the person with dementia

Std no. [Type]	Question number and text	National audit Round 3: % Num/Den (Median, IQR)	Your hospital Round 3: % Num/Den	Your hospital Round 2: % Num/Den	
1.14 [1]	22	Does the care assessment contain a section dedicated to collecting information from the carer, next of kin or a person who knows the patient well? (y/n)	57.2% 5727/10010 (58%, 31-85%)	36.7% 11/30	15% 6/40
	22a	<i>(If Q22=Yes)</i> Has information been collected about the patient regarding personal details, preferences and routines?			
		Yes	47.4% 2669/5626 (53%, 30-77%)	63.6% 7/11	100% 6/6
		Unknown*	33.1% 1865/5626 (14%, 0-44%)	27.3% 3/11	New answer option for Round 3
	22b	<i>(If Q22=Yes)</i> Has information been collected about the patient's food and drink preferences?			
		Yes	44.1% 2476/5616 (50%, 29-71%)	54.5% 6/11	New question for Round 3
		Unknown*	34.1% 1916/5616 (16%, 3-48%)	36.4% 4/11	
	22c	<i>(If Q22=Yes)</i> Has information been collected about the patient regarding reminders or support with personal care?			
		Yes	55.3% 3116/5631 (64%, 42-80%)	45.5% 5/11	100% 6/6
		Unknown*	29.9% 1685/5631 (13%, 0-37%)	27.3% 3/11	New answer option for Round 3
	22d	<i>(If Q22=Yes)</i> Has information been collected about the patient regarding recurring factors that may cause or exacerbate distress?			
		Yes	32.6% 1818/5583 (35%, 18-56%)	45.5% 5/11	66.7% 4/6
		Unknown*	37.8% 2110/5583 (20%, 5-50%)	27.3% 3/11	New answer option for Round 3

Std no. [Type]	Question number and text		National audit Round 3: % Num/Den (Median, IQR)	Your hospital Round 3: % Num/Den	Your hospital Round 2: % Num/Den
1.14 [1]	22e	(If Q22=Yes) Has information been collected about the patient regarding support or actions that can calm the person if they are agitated?			
		Yes	28.2% 1564/5539 (26%, 13-50%)	36.4% 4/11	66.7% 4/6
		Unknown*	39.1% 2167/5539 (20%, 7-52%)	27.3% 3/11	New answer option for Round 3
1.15 [3]	22f	(If Q22=Yes) Has information been collected about the patient regarding life details which aid communication?			
		Yes	43.1% 2413/5598 (50%, 25-70%)	45.5% 5/11	66.7% 4/6
		Unknown*	35.3% 1977/5598 (17%, 3-46%)	36.4% 4/11	New answer option for Round 3

*Unknown response options refer to situations in which the information is usually recorded in a document which accompanies the patient (e.g. "This is Me" or patient passport) and no copy is available in the notes.

Discharge

Assessment before discharge

Std no. [Type]	Question number and text	National audit Round 3: % Num/Den (Median, IQR)	Your hospital Round 3: % Num/Den	Your hospital Round 2: % Num/Den	
5.3 [2]	23	At the point of discharge the patient's level of cognitive impairment, using a standardised assessment, was summarised and recorded: (y/n)	22.4% 1639/7329 (17%, 9-30%)	8.3% 2/24	6.7% 1/15
	23a	<i>(If 23=No)</i> Please comment:			
		Patient too unwell/ not responsive	3.3% 189/5690	0% 0/22	New question for Round 3
		Patient has advanced dementia (i.e. patient's advanced dementia makes the assessment not appropriate)	1.9% 110/5690	0% 0/22	
		Not routine/ not standard practice	5.8% 331/5690	0% 0/22	
		Not documented/ unknown reason	78.1% 4444/5690	100% 22/22	
	Dementia diagnosis (i.e. dementia diagnosis mentioned as a reason for not completing assessment)	10.8% 616/5690	0% 0/22		
	24	At the point of discharge the cause of cognitive impairment was summarised and recorded: (y/n)	69.1% 5067/7329 (72%, 57-84%)	66.7% 16/24	93.3% 14/15
	25	Have there been any symptoms of delirium? (y/n)	32.3% 2367/7329 (33%, 22-41%)	45.8% 11/24	6.7% 1/15
	25a	<i>(If Q25=Yes)</i> Have the symptoms of delirium been summarised for discharge? (y/n)	47.9% 1133/2367 (45%, 33-64%)	45.5% 5/11	100% 1/1
26	Have there been any persistent behavioural and psychiatric symptoms of dementia (wandering, aggression, shouting) during this admission? (y/n)	19.4% 1425/7329 (19%, 13-26%)	4.2% 1/24	20% 3/15	
26a	<i>(If Q26=Yes)</i> Have the symptoms of behavioural and psychiatric symptoms of dementia been summarised for discharge? (y/n)	44.5% 635/1426 (40%, 23-60%)	100% 1/1	33.3% 1/3	

Std no. [Type]	Question number and text		National audit Round 3: % Num/Den (Median, IQR)	Your hospital Round 3: % Num/Den	Your hospital Round 2: % Num/Den
5.3 [2]	27	Is there a recorded referral to a social worker for assessment of housing and care needs due to a proposed change in residence?	65.5% 1649/2519 (71%, 53-89%)	44.4% 4/9	New question for Round 3
	27a (i)	<i>(If Q27=Yes):</i> There are documented concerns about the patient's capacity to consent to the referral:	70.4% 1161/1649 (75%, 50-89%)	50% 2/4	New question for Round 3
	27a (ii)	The patient had capacity on assessment and their consent is documented	11.9% 138/1161 (0%, 0-20%)	0% 0/2	
		The patient lacked requisite capacity and evidence of a best interests decision has been recorded	69.9% 811/1161 (75%, 50-90%)	50% 1/2	
		There is no record of either consent or best interest decision making*	18.3% 212/1161 (14%, 0-33%)	50% 1/2	
	27a (i)	There are no documented concerns about the patient's capacity to consent to the referral:	29.6% 488/1649 (25%, 11-50%)	50% 2/4	
	27a (iii)	The patients consent was requested and this is recorded	29.1% 142/488 (25%, 0-50%)	50% 1/2	
		There is no record of the patients consent*	70.9% 346/488 (75%, 50-100%)	50% 1/2	
	27a (ii & iii)	Consent or best interests (responses options combined)	66.2% 1091/1649 (67%, 50-86%)	50% 2/4	
		No consent or best interests (response options combined)	33.8% 558/1649 (33%, 14-50%)	50% 2/4	

*Please note that these figures include 1.9% of casenotes where it was specified that the capacity assessment information is kept with social worker notes, which are unavailable to the auditor.

Discharge coordination and multi-disciplinary team input

		No	4.9% 444/9090	-	17.1% 6/35	-

Appendix H: Staff suggestions for your hospital

The staff questionnaire included a question asking staff to make one suggestion on how their hospital could improve care and support provided to people with dementia. Below, all suggestions from staff at Cheltenham General Hospital are provided.

Registered Nurses (Band 5 or 6)

Extra staff to sit and talk to patients who are confused, scared and worried.

Having additional people, volunteers around during the day to sit with the patients, work with them to entertain them, support them with activities, link in to their this is me document. Ensuring time and resources put into place to enable reasonable adjustments to care to be put into place and maintained throughout patient stay. Increased number of volunteers who could support meeting patients' nutritional needs would be beneficial to sit with them while eating.

In recovery, we find it very hard to know a patient's normal behaviour, as we only see them after an anaesthetic. The more information we receive from care plans, "this is me" document, and any other information provided by ward or anaesthetist, helps us to give the best care for each individual patient and enables us to understand their individual needs, so that we can provide a caring and safe environment for them whilst providing quality care. Would like to see more of the "This is me" documentation with each patient.

More staff so as to give us more time to care for people with dementia.

More staff.

More time to care for complex dementia patients equals more staff.

Suitable environment to allow freer movement. This would reduce the frustration of feeling restricted/trapped.

Supporting people with dementia and end of life care.

Training sessions face to face on the ward. Encourage more often relatives/ carers to stay with dementia patients out of visiting hours - if they can. Do encourage continuity of care [so] they have a familiar face at all times.

Registered Nurses (Band 7 or above)

By adhering to their own policy on the movement of dementia patients especially at night or when a rapport has already developed between the patient family and staff. To employ a dementia nurse practitioner who oversees the care provided for the patients whilst in hospital.

Having a photocopy of the patient's "This is me" in the health records.

Not always easy to let people with dementia wander freely in acute ward setting. We do not always have enough staff to give them the extra time/ supervision they need.

To be able to nurse patients with dementia in a more appropriate environment asap for their comfort and needs. To not have to transfer patients with dementia to other wards out of hours when it can distress them but with the pressures on hospital beds sometimes our decisions are overridden.

Healthcare Assistants

As a part of providing holistic care, we concentrate on individualised care - so [patients with dementia] are also considered individually.

Either more trained staff on the ward or patient placement to be considered i.e. a limit to the number of dementia patient on one ward at a time.

Have more time and get to know the main likes and dislikes of certain individuals rather than expecting all with dementia to be the same.

I feel rushed to do my eLearning - have to do it as well as working on ward so I get distracted and don't really absorb the info: I also feel rushed to do things quickly so feel cannot take my time.

I feel there's not always enough time to spend with all the patients. There's a "this is me" form but not all of them have families. There should be a bigger folder giving more information, or if they have a support worker and no family, perhaps their support worker could give us more information. Families should be encouraged to support individuals as coming into a hospital can be a scary experience.

More staff so we have time to meet their needs. Perhaps supply finger food snacks.

More staff to ensure people with dementia are cared for to the best standard and all their needs are met. More support from site managers and modern matrons so they appreciate how difficult and challenging it can be. More variety of food needs to be available. Food outside of mealtimes should be provided. Doctors do not follow protected mealtimes and patients' food often goes cold. Some more traditional meals such as porridge would be more attractive to older clients with dementia.

More staff, protect mealtimes, stop late discharges, be more efficient at care packages, encourage carers/ family to visit more.

More staffing could improve patient experience for all patients and offer more care to the dementia patient(s).

More support and training.

More training to help with understanding about dementia.

Not enough time to look after each patient correctly.

One staff member per shift who can sit and talk to dementia patient or their family so they feel supported.

Picture of foods and enabling environment at night. Lights off and minimal noise from the staff and patients transfer. Omitting use of labels in patients such as wandering, difficult etc.

Send more staff on dementia training.

Some patients require 1 to 1 24-hour care which isn't always available so they are left unattended. More staff or extra staff should be available if required.

Support for the families more and activities for dementia patients as nursing staff don't have a lot of time to help them as much as we'd like to.

Doctors

"This is me" document for more patients - they are great!

Allied Healthcare Professionals

Eliminate/ minimise ward transfers. For 'wanderers' who are distressed, specially/ dedicated staff member to support them would be very beneficial. Comfy recliner chairs to allow relatives to sleep next to their bed on ward (it's enabled in paediatric wards!) The little pots of marmalade jam and wrapped butter pats at

Allied Healthcare Professionals

breakfast are a nightmare for older people with cognitive impairment. This is not how they would recognise their foods at home. Cold porridge and soggy cornflakes is unappetising. How can we spend more time valuing mealtimes and normalising the food we offer? Bring back afternoon tea and cake, encourage social eating.

Enable one-to-one nursing care for those with dementia who are presenting with challenging behaviours. forcing people to remain seated/ in bed is causing them increased and unnecessary distress and multiplying their risk of falls constantly nursing staff are told there is no budget for one-to-one care for these patients.

I believe the use of primary colours can be helpful for people with dementia in locating doorways. Perhaps this could be done.

More carer involvement.

More information about patients with severe dementia from nursing homes re: likes, dislikes, preferred name, activities that will engage patients. More cognition and sensory groups.

Quiet areas to lower stimulation and provide a calm environment.

Students

No comments from students for your hospital.

Therapy Assistants & Allied Healthcare Professional Assistants

Ensuring early communication e.g. "this is me" booklet from care homes/ carers/ family.

Ward-based Administrators

A better, less clinical environment.
