Healthcare Quality  
Improvement Partnership

Many thanks to Hwyl for permission to use the cover artwork. Hwyl is an art project run by Dementia Matters in Powys (DMiP) and Arts Alive Wales based at the Brecon War Memorial Hospital. The project focuses on working with elderly patients on hospital wards, with their families, carers, the ward staff and artists on a weekly basis.

With thanks to Rhiannon Davies (DMiP) and Tessa Waite (Arts Alive Wales).

Introduction to the appendices .....	2
Appendix A: Organisational checklist data .....	3
Appendix B: Patient demographics .....	15
Appendix C: Casenote audit data .....	19
Appendix D: Carer demographics .....	28
Appendix E: Carer questionnaire data .....	29
Appendix F: Staff demographics .....	32
Appendix G: Staff questionnaire data .....	34
Appendix H: Verbatim staff suggestions for your hospital, presented by job role .....	40

## Introduction to the appendices

This is the appendices for your local report. Your local report is in a separate document. The appendices present data from Round 3 of the National Audit of Dementia, both at a national level and for your hospital. Data for your hospital in Round 2 is also shown where applicable. When comparing Round 2 data with Round 3 data, please be aware that differences in sample sizes and slight wording changes to some questions, can affect results in both rounds. Therefore, conclusions made from comparing the data should be with caution. Hospitals with less than five returns for the carer or staff questionnaires have not received any data and returns of 5 to 9 questionnaires have not received demographic information. The table below shows how the data tables in the appendices are laid out and what information you can find in each cell.

Std no. [Type]	Question number and text		National audit Round 3: % Num/Den	Your hospital Round 3: % Num/Den	Your hospital Round 2: % Num/Den
Standard reference and type. Standards document can be found on the <a href="#">audit website</a> .	Question number. Orange items in the casenote audit appendix show low inter-rater reliability.	Question wording as in tool.	The national audit refers to all hospitals from England and Wales that participated in the Round 3 audit.	Data for your hospital from Round 3.	If the same question or a similar question was asked in Round 2, we have provided your Round 2 response for comparison. The carer and staff questionnaires are new tools and therefore this column has been excluded in these appendices.
			We have provided the percentage 'yes' response (unless otherwise indicated) and the numerator/denominator. The denominator will change throughout the appendices, depending on whether questions were routed (not asked in some instances), 'N/A' responses were chosen (these have been excluded from the analyses), or where staff and carers did not respond.		

For the organisational checklist, data from 199 hospitals are included in the national audit column (all the registered participants).

195 hospitals participated in the casenote audit, returning 10047 casenotes and this is shown in the national audit column. The national audit column for the casenote audit also shows the median and the inter quartile range for each question (where applicable). Question items which were found to have lower agreement in the inter-rater reliability analysis (see audit [website](#)) have been coloured orange.

196 hospitals returned carer questionnaires. Data from all questionnaires (4664) is presented in the carer questionnaire data tables in Appendix E.

198 hospitals returned staff questionnaires. Data from all questionnaires (14416) is presented in Appendix G. For some questionnaire items, the data for the two most positive answers have been combined, as well as being presented separately. This is provided both at a national level and for your hospital.

# Appendix A: Organisational checklist data

## Governance and delivery of care

Std no. [Type]	Question number and text	National audit Round 3: % Num/Den	Your hospital Round 3: % Num/Den	Your hospital Round 2: % Num/Den	
4.1 [2]	1	A care pathway or bundle for patients with dementia is in place:			
		Yes	<b>60.8%</b> 121/199	<b>Yes</b>	In development
		In development	<b>26.1%</b> 52/199		
4.2 [2]	1a	<i>(If Q1=Yes or In development)</i> A senior clinician is responsible for implementation and/ or review of the care pathway: (y/n)	<b>97.1%</b> 168/173	<b>Yes</b>	Yes
4.1 [2]	1b	<i>(If Q1=Yes or In development)</i> The dementia care pathway/ bundle is integrated within or linked to the following care pathways:			
		Delirium			
		Yes	<b>65.9%</b> 114/173	<b>Yes</b>	New question for Round 3
		Pathway in development	<b>26.6%</b> 46/173		
		Stroke			
		Yes	<b>32.9%</b> 57/173	<b>Yes</b>	New question for Round 3
		Pathway in development	<b>21.4%</b> 37/173		
		Fractured neck of femur			
		Yes	<b>43.6%</b> 75/172	<b>Yes</b>	New question for Round 3
Pathway in development	<b>24.4%</b> 42/172				
4.7 [2]	2	The Executive Board regularly reviews information collected on:			
	2a	Re-admissions, in which patients with dementia can be identified in the total number of patients re-admitted (y/n)	<b>31.7%</b> 63/199	<b>No</b>	No
	2b	Delayed discharge/ transfers, in which patients with dementia can be identified in the total number of patients with delayed discharge/ transfers (y/n)	<b>31.7%</b> 63/199	<b>No</b>	No
4.4 [2]	3	The Executive Board regularly reviews the number of in-hospital falls and the breakdown of the immediate causes, in which patients with dementia can be identified (y/n)	<b>60.3%</b> 120/199	<b>No</b>	No

Std no. [Type]	Question number and text		National audit Round 3: % Num/Den	Your hospital Round 3: % Num/Den	Your hospital Round 2: % Num/Den
4.5 [2]	4	The Executive Board regularly receives feedback from the following:			
	4a	Clinical Leads for older people and people with dementia including Modern Matrons/ Nurse Consultant (y/n)	<b>84.9%</b> 169/199	<b>Yes</b>	Yes
	4b	Complaints – analysed by age (y/n)	<b>52.3%</b> 104/199	<b>Yes</b>	Yes
	4c	Patient Advice and Liaison Services (PALS) – in relation to the services for older people and people with dementia (y/n/na (hospitals in Wales))	<b>58.6%</b> 106/181	<b>Yes</b>	Yes
	4d	Patient/ public forums or local Healthwatch – in relation to services for older people and people with dementia (y/n)	<b>67.3%</b> 134/199	<b>Yes</b>	Yes
4.11 [2]	5	There are champions for dementia at:			
	5a	Directorate level (y/n)	<b>81.9%</b> 163/199	<b>Yes</b>	Yes
	5b	Ward level (y/n)	<b>93.5%</b> 186/199	<b>Yes</b>	Yes
N4a [3]	6	Dementia specialist nurses are employed in line with Royal College of Nursing guidance (there is at least one full time dementia specialist nurse for every 300 admissions of people with dementia per year): (y/n)	This question is not reported on as feedback showed hospitals found it difficult to interpret.		
N4b [3]	7	Has a strategy or plan for carer engagement been produced (e.g. using Triangle of Care self-assessment tool)? (y/n)	<b>76.9%</b> 153/199	<b>Yes</b>	New question for Round 3
	8	<i>(If Q7=Yes)</i> Is implementation of the strategy or plan scheduled for review?			
		Yes, more than once a year	<b>41.2%</b> 63/153	<b>Yes, once a year</b>	New question for Round 3
		Yes, once a year	<b>34.6%</b> 53/153		
Yes, less than once a year	<b>20.3%</b> 31/153				

Std no. [Type]	Question number and text	National audit Round 3: % Num/Den	Your hospital Round 3: % Num/Den	Your hospital Round 2: % Num/Den	
N4c [3]	9	A Dementia Working Group is in place and reviews the quality of services provided in the hospital: (y/n)	<b>93.5%</b> 186/199	<b>Yes</b>	New question for Round 3
	9a	<i>(If Q9=Yes)</i> The group meets:			
		Annually	<b>0.5%</b> 1/186	<b>Bi-monthly</b>	New question for Round 3
		Bi-annually	<b>0.5%</b> 1/186		
		Quarterly	<b>30.1%</b> 56/186		
		Six-weekly	<b>4.3%</b> 8/186		
		Monthly	<b>33.3%</b> 62/186		
		Bi-monthly	<b>29%</b> 54/186		
		Weekly	<b>0.5%</b> 1/186		
		Unknown	<b>1.6%</b> 3/186		
	9b	<i>(If Q9=Yes)</i> The group includes:			
		Healthcare professionals	<b>100%</b> 186/186	√	New question for Round 3
		Organisations e.g. Alzheimer's Society	<b>64%</b> 119/186	-	
Carer/ service user representation	<b>66.1%</b> 123/186	√			
N7a [3]	10	Ward staffing levels (nurses, midwives and care staff) are made available for the public to view on a monthly basis: (y/n)	<b>88.4%</b> 176/199	<b>Yes</b>	New question for Round 3
	11	An evidence-based tool is used for establishing ward staffing levels: (y/n)	<b>99%</b> 197/199	<b>Yes</b>	New question for Round 3
3.7 [1]	12	Protected mealtimes are established in all wards that admit adults with known or suspected dementia: (y/n)	<b>98%</b> 195/199	<b>Yes</b>	Yes
	12a	<i>(If Q12=Yes)</i> Wards' adherence to protected mealtimes is reviewed and monitored: (y/n)	<b>88.7%</b> 173/195	<b>Yes</b>	Yes
3.8 [1]	13	The hospital has in place a scheme/ programme which allows identified carers of people with dementia to visit at any time including at mealtimes (e.g. Carer's Passport): (y/n)	<b>88.9%</b> 177/199	<b>Yes</b>	New question for Round 3

## Discharge and transfer monitoring

Std no. [Type]	Question number and text		National audit Round 3: % Num/Den	Your hospital Round 3: % Num/Den	Your hospital Round 2: % Num/Den
N5a [3]	14	Instances where less than 24 hours notice of discharge has been given to carers or family are compiled and reported to the Executive Board:			
		Yes, within the past 6 months	<b>4%</b> 8/199	<b>No</b>	New question for Round 3
		Yes, within the last year	<b>1.5%</b> 3/199		
N3c [3]	15	Instances of night time bed moves (i.e. between the evening meal and breakfast the next morning) are noted and reported at Executive Board level: (y/n)	<b>38.2%</b> 76/199	<b>No</b>	New question for Round 3

## Use of personal information documents

Std no. [Type]	Question number and text		National audit Round 3: % Num/Den	Your hospital Round 3: % Num/Den	Your hospital Round 2: % Num/Den
1.14 [1]	16	There is a formal system (pro-forma or template) in place in the hospital for gathering information pertinent to caring for a person with dementia: (y/n)	<b>98.5%</b> 196/199	<b>Yes</b>	Yes
	17a	<i>(If Q16=Yes)</i> Information collected by the pro-forma includes personal details, preferences and routines: (y/n)	<b>100%</b> 196/196	<b>Yes</b>	Yes
	17b	<i>(If Q16=Yes)</i> Information collected by the pro-forma includes reminders or support with personal care: (y/n)	<b>98.5%</b> 193/196	<b>Yes</b>	Yes
	17c	<i>(If Q16=Yes)</i> Information collected by the pro-forma includes recurring factors that may cause or exacerbate distress: (y/n)	<b>100%</b> 196/196	<b>Yes</b>	Yes
	17d	<i>(If Q16=Yes)</i> Information collected by the pro-forma includes support or actions that can calm the person if they are agitated: (y/n)	<b>99%</b> 194/196	<b>Yes</b>	Yes
1.15 [3]	17e	<i>(If Q16=Yes)</i> Information collected by the pro-forma includes life details which aid communication: (y/n)	<b>99.5%</b> 195/196	<b>Yes</b>	Yes
1.14 [1]	18	<i>(If Q16=Yes)</i> Information collected by the pro-forma includes how the person with dementia communicates with others/ understands communication: (y/n)	<b>99.5%</b> 195/196	<b>Yes</b>	New question for Round 3

Std no. [Type]	Question number and text		National audit Round 3: % Num/Den	Your hospital Round 3: % Num/Den	Your hospital Round 2: % Num/Den
1.14 [1]	19	(If Q16=Yes) The form prompts staff to approach carers or relatives to collate necessary information: (y/n)	<b>93.4%</b> 183/196	<b>Yes</b>	Yes
20	Documenting use of personal information in practice: Hospitals selected three wards ( <b>not</b> mental health wards) which had the highest admissions of people with dementia. 10 patients in these wards were checked to see if the personal information document was present. Included were patients with dementia who needed a personal information document such as "This is Me" (any patients with dementia who did not require a personal information document were excluded).				
	Ward 1:		<b>226</b>		New question for Round 3
	Ward 2:		<b>78</b>		
	Ward 3:		<b>76a</b>		
	Number of patients checked:		-	<b>9</b>	New question for Round 3
	Range		<b>0-40</b>	-	-
	Median		<b>10</b>	-	-
	Number of these patients where the information was present:		-	<b>6</b>	New question for Round 3
	Percentage of patients where the information was present:		-	<b>67%</b>	New question for Round 3
	Range		<b>0-100%</b>	-	-
	Mean		<b>49%</b>	-	-
Median		<b>50%</b>	-	-	

## Recognition of dementia

Std no. [Type]	Question number and text		National audit Round 3: % Num/Den	Your hospital Round 3: % Num/Den	Your hospital Round 2: % Num/Den
9.3 [1]	21	There is a system in place across the hospital that ensures that all staff in the ward or care area are aware of the person's dementia or condition and how it affects them: (y/n)	<b>90.5%</b> 180/199	<b>Yes</b>	Yes

Std no. [Type]	Question number and text	National audit Round 3: % Num/Den	Your hospital Round 3: % Num/Den	Your hospital Round 2: % Num/Den	
9.3 [1]	<i>(If Q21=Yes)</i> Please say what this is:				
	21a	A visual indicator, symbol or marker	<b>91.1%</b> 164/180	√	A visual indicator, symbol or marker
		Alert sheet or electronic flag	<b>23.9%</b> 43/180	-	
		A box to highlight or alert dementia condition in the notes or care plan	<b>33.9%</b> 61/180	-	
		Other	<b>18.9%</b> 34/180	-	
	22	There is a system in place across the hospital that ensures that staff from other areas are aware of the person's dementia or condition whenever the person accesses other treatment areas: (y/n)	<b>70.4%</b> 140/199	<b>Yes</b>	No
	<i>(If Q22=Yes)</i> Please say what this is:				
	22a	A visual indicator, symbol or marker	<b>87.1%</b> 122/140	√	N/A
		Alert sheet or electronic flag	<b>18.6%</b> 26/140	-	
		A box to highlight or alert dementia condition in the notes or care plan	<b>20.7%</b> 29/140	-	
Other		<b>17.9%</b> 25/140	-		
9.13 [2]	23	The dementia lead or dementia working group collates feedback from carers on the written and verbal information provided to them: (y/n)	<b>81.9%</b> 163/199	<b>No</b>	New question for Round 3

## Training, learning and development

Std no. [Type]	Question number and text	National audit Round 3: % Num/Den	Your hospital Round 3: % Num/Den	Your hospital Round 2: % Num/Den	
7.2 [2]	24	There is a training and knowledge framework or strategy that identifies necessary skill development in working with and caring for people with dementia: (y/n)	<b>95.5%</b> 190/199	<b>Yes</b>	No

Std no. [Type]	Question number and text	National audit Round 3: % Num/Den	Your hospital Round 3: % Num/Den	Your hospital Round 2: % Num/Den	
7.4 [2]	25	The following questions are about training that is provided to acute healthcare staff who are involved in the care of people with dementia (or suspected dementia):			
		Dementia awareness training:			
		Doctors			
		Mandatory	<b>46.2%</b> 92/199	-	-
		Provided on induction	<b>63.3%</b> 126/199	√	-
		Provided in the last 12 months	<b>58.8%</b> 117/199	-	√
		Not provided in the last 12 months	<b>8.5%</b> 17/199	-	-
		Nurses			
		Mandatory	<b>51.8%</b> 103/199	-	-
		Provided on induction	<b>74.4%</b> 148/199	√	√
		Provided in the last 12 months	<b>68.3%</b> 136/199	-	-
		Not provided in the last 12 months	<b>1%</b> 2/199	-	-
		Healthcare assistants			
		Mandatory	<b>51.8%</b> 103/199	-	-
		Provided on induction	<b>71.4%</b> 142/199	√	√
		Provided in the last 12 months	<b>68.3%</b> 136/199	-	-
		Not provided in the last 12 months	<b>1%</b> 2/199	-	-
		Other allied healthcare professionals, e.g. physiotherapists, dieticians			
		Mandatory	<b>47.7%</b> 95/199	-	-
		Provided on induction	<b>64.8%</b> 129/199	√	-
		Provided in the last 12 months	<b>67.8%</b> 135/199	-	√
		Not provided in the last 12 months	<b>3.5%</b> 7/199	-	-

Std no. [Type]	Question number and text	National audit Round 3: % Num/Den	Your hospital Round 3: % Num/Den	Your hospital Round 2: % Num/Den	
7.4 [2]	25	Support staff in the hospital, e.g. housekeepers, porters, receptionists			
		Mandatory	<b>41.2%</b> 82/199	-	-
		Provided on induction	<b>57.8%</b> 115/199	√	-
		Provided in the last 12 months	<b>63.8%</b> 127/199	-	-
		Not provided in the last 12 months	<b>11.1%</b> 22/199	-	√
7.11 [3]	26	Involvement of people with dementia and carers and use of their experiences is included in the training for ward staff: (y/n)	<b>82.4%</b> 164/199	<b>Yes</b>	Yes
7.5 [3]	27	What format is used to deliver basic dementia awareness training?			
		eLearning module	<b>72.9%</b> 145/199	-	New question for Round 3
		Workshop or study day	<b>91%</b> 181/199	√	
		Higher education module	<b>22.6%</b> 45/199	√	
		Other	<b>29.1%</b> 58/199	√	

7.5 [3]	28	Hospitals were asked to provide figures on the number of staff trained in dementia awareness. Only 34 hospitals could provide this for at least one of the years specified. Therefore, there is no data on training figures.
N7b [3]	29	What is the total number of adult beds excluding maternity and mental health beds in your hospital at 31 March 2016? This information was to compare with question 28 so is therefore not included.

## Specific resources supporting people with dementia

Std no. [Type]	Question number and text		National audit Round 3: % Num/Den	Your hospital Round 3: % Num/Den	Your hospital Round 2: % Num/Den
6.2 [2]	30	The hospital has access to intermediate care services, which will admit people with dementia: (y/n)	<b>93%</b> 185/199	<b>Yes</b>	No
6.3 [3]	30a	<i>(If Q30=Yes)</i> Access to intermediate care services allows people with dementia to be admitted to intermediate care directly and avoid unnecessary hospital admission: (y/n)	<b>84.3%</b> 156/185	<b>Yes</b>	N/A
7.1 [2]	31	There is a named dignity lead to provide guidance, advice and consultation to staff: (y/n)	<b>70.4%</b> 140/199	<b>No</b>	No
6.4 [2]	32	There is a named person/ identified team who takes overall responsibility for complex needs discharge and this includes people with dementia: (y/n)	<b>95.5%</b> 190/199	<b>Yes</b>	No
6.5 [2]	33a	<i>(If Q32=Yes)</i> This person/ team has training in ongoing needs of people with dementia: (y/n)	<b>92.6%</b> 176/190	<b>Yes</b>	N/A
6.6 [3]	33b	<i>(If Q32=Yes)</i> This person/ team has experience of working with people with dementia and their carers: (y/n)	<b>98.4%</b> 187/190	<b>Yes</b>	N/A
6.7 [2]	34	There is a social worker or other designated person or team responsible for working with people with dementia and their carers, and providing advice and support, or directing to appropriate organisations or agencies: (y/n)	<b>75.9%</b> 151/199	<b>Yes</b>	Yes

Std no. [Type]	Question number and text	National audit Round 3: % Num/Den	Your hospital Round 3: % Num/Den	Your hospital Round 2: % Num/Den	
N3b [2]	35	The hospital can provide finger foods for people with dementia (please select one option only):			New question for Round 3
		Patients can choose a complete meal option (including vegetarian) that can be eaten without cutlery (finger food) on every day	<b>65.3%</b> 130/199	√	
		Patients can choose a complete meal option (including vegetarian) that can be eaten without cutlery on four to six days per week or more	<b>1%</b> 2/199	-	
		Patients can choose a complete meal option (including vegetarian) that can be eaten without cutlery on two or three days per week or more	<b>0%</b> 0/199	-	
		Patients can choose a complete meal option (including vegetarian) that can be eaten without cutlery on only one day per week	<b>0%</b> 0/199	-	
		Finger food consists of sandwiches/wraps only	<b>33.7%</b> 67/199	-	
		Patients who may be unable to use cutlery will never be admitted to the hospital	<b>0%</b> 0/199	-	
3.11 [2]	36	The hospital can provide 24 hour food services for people with dementia (please select one option only):			New question for Round 3
		In addition to the main meals, other food, for example toast, sandwiches, cereals, soup, and lighter hot dish(es) are available 24 hours a day	<b>50.8%</b> 101/199	√	
		In addition to the main meals, other food, for example toast, sandwiches, cereals, soup are available, but less than 24 hours a day	<b>10.6%</b> 21/199	-	
		Simple food supplies for example bread, cereal, yoghurt and biscuits are available 24 hours a day	<b>32.2%</b> 64/199	-	
		Only snacks (biscuits, cake) are available 24 hours a day	<b>3%</b> 6/199	-	
Food is not available 24 hours a day	<b>3.5%</b> 7/199	-			
6.10 [2]	37	There is access to advocacy services with experience and training in working with people with dementia: (y/n)	<b>95%</b> 189/199	<b>Yes</b>	No

## Environment

Std no. [Type]	Question number and text	National audit Round 3: % Num/Den	Your hospital Round 3: % Num/Den	Your hospital Round 2: % Num/Den	
6.11 [3]	Opportunities for social interaction for patients with dementia are available (e.g. to eat/ socialise away from their bed area with other patients):				
	38	On all adult wards	<b>15.1%</b> 30/199	√	New question for Round 3
		On care of the elderly wards	<b>38.7%</b> 77/199	-	
		Other	<b>30.2%</b> 60/199	-	
		No	<b>16.1%</b> 32/199	-	
N8a [3]	The physical environment within the hospital has been reviewed using an appropriate tool (e.g. King's Fund Enhancing the Healing Environment) to establish whether it is "dementia-friendly":				
	39	Throughout the hospital	<b>42.7%</b> 85/199	-	New question for Round 3
		All adult wards/ areas	<b>13.6%</b> 27/199	√	
		All care of the elderly wards/ areas	<b>18.1%</b> 36/199	-	
		Designated dementia wards only	<b>3%</b> 6/199	-	
		Other	<b>13.1%</b> 26/199	-	
		No	<b>9.5%</b> 19/199	-	
	40	<i>(If Q39=Yes)</i> Environmental changes based on the review are:			
		Completed	<b>15%</b> 27/180	-	New question for Round 3
		Underway	<b>56.7%</b> 102/180	√	
		Planned but not yet underway	<b>10%</b> 18/180	-	
		Planned but funding has not been identified	<b>15.6%</b> 28/180	-	
		Plans are not in place	<b>2.8%</b> 5/180	-	

Std no. [Type]	Question number and text	National audit Round 3: % Num/Den	Your hospital Round 3: % Num/Den	Your hospital Round 2: % Num/Den	
N8a [3]	<i>(If Q39=Yes)</i> Service users/ carers/ lay volunteers have been part of the team reviewing the environment:				
	41	Throughout the hospital	<b>36.7%</b> 66/180	-	New question for Round 3
		All adult wards/ areas	<b>9.4%</b> 17/180	√	
		All care of the elderly wards/ areas	<b>13.3%</b> 24/180	-	
		Designated dementia wards only	<b>5%</b> 9/180	-	
		Other	<b>13.3%</b> 24/180	-	
		They have not been part of the team	<b>22.2%</b> 40/180	-	
	<i>(If Q39=Yes)</i> There are plans to further review the changes implemented:				
	42	Yes, we are already undertaking/ have already done this	<b>49.4%</b> 89/180	-	New question for Round 3
		Yes, once the work is completed	<b>40%</b> 72/180	√	
		No plans are in place	<b>10.6%</b> 19/180	-

## Appendix H: Staff suggestions for your hospital

The staff questionnaire included a question asking staff to make one suggestion on how their hospital could improve care and support provided to people with dementia. Below, all suggestions from staff at The Royal Stoke University Hospital are provided.

<b>Registered Nurses (Band 5 or 6)</b>
A nursing assistant to float between bays who can support with feeding, and who has time to speak to patients, like a play leader does on children's wards, so that we do not have to divide time between clinical things and caring for individuals.
Activities – hairdressing - there is no stimulation in the ward setting.
Although we have access to specialist support in the form of mental health nurses as part of the rapid, assessment, intervention and discharge team, they do not promptly attend and this can mean we don't have the support at the point we need it. Dementia patients cannot just wait.
Always short staffed on the ward which doesn't enable nursing staff to give the support and time we would like to patients with dementia.
By providing more training for all the staff, providing more staff in work place therefore staff have time to spend with the patients.
Could do with some formal training on dementia care, especially with the different types and stages of their disease.
Dementia specific pathway for urgent elective surgical interventions.
Dementia training to be made mandatory in all adult trained nurses because no matter which wards/ departments, there will always be at least one patient with dementia.
Encouraging families to bring in their relatives own clothes, make the ward more secure, education regarding the reasons for wandering, what behavioural and psychological symptoms of dementia and sundowning are. Get staff to think how these issues affect the patient, the surrounding patients and staff, and think of ways to improve the experience. Clearer guidelines on completing deprivation of liberty safeguards.
I feel the support we have for dementia patients is good. We have a specialist nurse and many other trained nurses and healthcare assistants who are trained as link nurses to support patients and other staff.
I think we should have some form of dementia care training incorporated into mandatory training as the population life expectancy is increasing; we will be seeing more dementia patients on the wards in the future. Family interaction is most important in allowing staff to understand the patient's level of understanding and personal preferences.
If care homes sent a carer who actually knew the patient as an escort, this may assist us in delivering a more individual style of care. We also need greater numbers of staff to facilitate 1 to 1 care as required.
Increase staffing levels in elderly nursing to allow the nurse and nursing assistants to accommodate the needs of each patient appropriately.
Increased number of staff when patients with dementia have challenging behaviour and the patients need extra support. Staff are not taken off the ward leaving the ward short.
Involve the families more.
It would be beneficial to have the patient areas decorated to suit patients' needs with dementia e.g. red doors so patients can see the bright colour and know it's a door.
John's Campaign.
More leaflets could be accessible for all the wards.

## Registered Nurses (Band 5 or 6)

More staff are required to care for their individual needs.
More staff to escort patients, or allow family members to escort, for tests procedures etc. This may help to relieve anxiety for dementia patients.
More ward based daily facilities to occupy patients with dementia/ activities coordinator.
On the dialysis unit, we have patients with dementia, and often their condition worsens over their time with us. This can be difficult when the patients are attached to the dialysis machine and often don't realise why. As they deteriorate, they need more care and maybe someone to sit with them, and this is hard to achieve.
People employed to help feed patients within the emergency department.
Placing a butterfly symbol at the cubicle bed space will highlight the need for support. It is on the paperwork but not always at the bed space. Ensuring housekeepers are aware and trained in what this symbol means could improve diet and fluids for the patient, especially if there isn't a visitor with the patient. This would prompt housekeepers to bring to the attention of the nursing and healthcare support workers, that the food is now at the bedside and assistance is required. Also, providing a food chart at the bedside prompting recording when the food/ plates/ cups are cleared away, especially as patients are spending longer in the area.
Possible activity coordinator. Ladies get bored and wander.
Possibly a dayroom facility or access to watch a television.
Provide enough staff when working with wandering and agitated dementia patients.
Sensory and quiet room for patients/ family to get away from the busyness of the ward. Staff increase/ support at night for patients who have sundowning.
Time and staffing constraints can sometimes be a problem on our unit.
To have more staff.
Ward volunteers to sit with patients to talk about their lives.
We need staff who can help with creativity for dementia patients. Need to have more availability of distraction techniques. Need to encourage patients to do activities like drawing, painting, ball playing and dominoes etc... Possibly need a day room facility to encourage them to watch tele/ listen to music.
Working in an emergency care setting, waiting for an assessment bed for a dementia patient for three days!! Sometimes more if patient out of the area!! Or self-funding. Generally there are no beds, its dreadful, but across the board for mental health, it's disgusting, and so upsetting for the client.

## Registered Nurses (Band 7 or above)

A ward specifically designed for patients with dementia is highly required such as our recently defunct Ward 4.
Allowing the patients more freedom to move about the wards. But this would require a higher number of supervising staff.
Better training for all staff as dementia and mental problems arise in all areas. Better support and advice from the experts in the field of mental health (this area is sadly lacking). Senior staff need to be seen to support their ward staff more by being more visible when patients are having a delusional/ psychotic/ behavioural episode.
By increasing the minimum staffing numbers. Also, by not moving staff off the ward, leaving shortages.
By providing on site accommodation for carers who may wish to be present 24/7.
Clear identification of their needs and ensuring that if necessary, arrangements for 1 to 1 are sorted prior to transfer to the ward.

## Registered Nurses (Band 7 or above)

Improve staffing resources to allow more time to be spent with patients with dementia.

John's Campaign. Diversional therapies.

More diversional activities/ therapy, especially for patients who become medically fit for discharge, but have no confirmed exit strategy.

More staff during mealtimes for feeding - volunteers could be an option for this.

More ward staff to spend more time with patients.

Provide a 24/7 specialist service for dementia care patients.

Some wards really are not conducive to provide the environment required. Adaptions are made within the constraints of the building, but only a new building will enable a truly dementia friendly environment to be created.

The prevalence of dementia is increasing within the local health economy (LHE) and as a LHE, there is much transformation going on to support the care overall. However, in the acute environment particular challenges persist: 1. Environments are not conducive to nursing dementia patients with little stimulation available and insufficient workforce in areas with a high ratio of dementia to support holistic needs. 2. Activity workers could be employed (or volunteers) to provide stimulating activities which will enhance wellbeing and outcomes for the patient and prevent deconditioning/ maintain, as much as possible, the usual level of physical and psychological function. 3. There is little support from the dementia experts at ward level and when there is, it is usually hyper critical instead of supportive and educative. 4. There is no dementia nurse specialist who is highly visible to the wards. 5. Initiatives to upskill workforce such as nursing assistant dementia expert training have been used - but they are not provided time on the wards to actually cascade their training to others. 6. There are a high level of dementia patients who are delayed transfers of care and are deconditioned by remaining in environments which are not dementia friendly. 7. There needs to be a focus on end stage dementia, and how we address this, often harrowing, period with the family to help support clear and meaningful decisions on end of life care and expectations.

Work to be done on dementia friendly environments, as community hospitals have championed.

## Healthcare Assistants

Being able to get one to one staff, when needed, for patients with dementia.

Could have an activities coordinator on ward to do things with patients - such as getting them round a table, have a tea party with music and sit with them as we don't have much time to do so on a busy ward. Extra staff are needed as we tend to have a few wandering dementia patients meaning a carer has to 1:1 them, leaving the ward short staffed.

More care staff so we have the time to spend with these patients.

More staff needed on shifts to assist with the needs of the patients.

More staff.

More staffing.

More support for patients who need 1:1 care/ support.

More training.

Provide more staff so we are able to provide the care they need.

We need additional staff for patients with cognitive impairments to ensure all needs are met for the complete care of each individual patient.

## Doctors

Basically, inpatient dementia patients usually receive adequate support in the hospital. However, on discharge, there will usually be issues on package of care, nursing home referrals and place of care forcing the patient to stay in the acute ward while waiting for these things to be sorted out. So, I think it would be better if we pour some more funds into community care for dementia patient.

By providing them with one to one care, more spacious wards where they can walk, environmental changes so that they are not panicked in new a environment.

Continue to provide training for all clinical staff on dementia, and make sure they know about "this is me".

Education on wards for those who are not in contact with dementia patients on a regular basis.

Limit the frequency of night time moves as this confuses and frightens the individual.

The staff on ward 78 are very well trained and sensitive to needs of dementia patients, but I would like to have more visual points of orientation, such as large clocks and less aural disturbance in the form of ward televisions and radios.

We should have more HCAs as very often dementia patients need constant assistance of 1 to 1.

## Allied Healthcare Professionals

Activities in the day room to engage patients - reminiscence therapy.

Additional training for staff and case studies. Additional training should include 'roleplay' e.g. assisting to feed and confusion.

Allow main carer of person with dementia to be present on ward as much as possible - more reassuring for patient, and less likely to need one to one staffing.

Dementia training.

Encourage patients to wear own clothes, sit out for meals - if possible in a dining area. Give out things to engage patient i.e. colouring or simple puzzles.

I feel that unfortunately those patients that require longer interventions or would benefit from extra input/ assistance/ time on the ward are not always getting this, due to staffing levels.

Increased staffing of healthcare's and nursing to be able to give more time to deliver care, especially during mealtimes and enable 1:1 nursing care when indicated, without compromising staffing for other patients.

More "about me" questionnaires in notes and maybe some groups and activity packs (i.e. fiddle cushions etc.) on the wards to help with boredom.

Provision of activities that patients can engage with, especially if their mobility is limited at that point e.g. cards, dominoes and patient specific areas where they can sit and read, play games, listen to music.

The multidisciplinary team ensuring the "this is about me" documentation is filled in on admission - currently rarely completed. Dementia symbol used for all patients with known dementia. Better access to dementia training. Improved rapid, assessment, intervention and discharge services, more visible on wards.

There is a lack of community services for dementia patients to support them at home which then keeps them in the acute beds for too long, or does not allow them the opportunity for a full assessment at home.

## Students

*No comments from students for your hospital.*

## **Therapy Assistants & Allied Healthcare Professional Assistants**

All staff should have an [insight to dementia] - it's important to be able to approach and care for dementia patients.

More activities for dementia patients.

## **Ward-based Administrators**

Have more staff.

## **Other / Unknown**

More capacity/ input from rapid, assessment, intervention and discharge team. More staff to provide support with patients with dementia.

Royal College of Psychiatrists' Centre for Quality Improvement
