Appendix P: References.....	89

Appendix A: List of Abbreviations

ADHD: Attention Deficit Hyperactivity Disorder

AFP-AN: Adolescent-Focused Psychotherapy for Anorexia Nervosa

ARFID: Avoidant Restrictive Intake Disorder

AWT: Access and Waiting Time

BED: Binge Eating Disorder

BMI: Body Mass Index

CBT-ED: Cognitive Behavioural Therapy for Eating Disorders

CBT-T: Cognitive Behavioural Therapy – Ten

CCQI: College Centre for Quality Improvement

CEDS: Community Eating Disorder Service

CEO: Chief Executive Officer

CAMHS: Child and Adolescent Mental Health Services

CMHT: Community Mental Health Team

CYP: Children and Young People

CYPMHS: Children and Young People Mental Health Service

ED: Eating Disorder

FPT: Focal Psychodynamic Therapy

FREED: First Episode Rapid Early Intervention for Eating Disorders

FT-ED: Family Therapy for Eating Disorders

ICB: Integrated Care Board

ICS: Integrated Care System

MANTRA: Maudsley Model of Anorexia Nervosa Treatment for Adults

NAED: National Audit of Eating Disorders

NCAPOP: National Clinical Audit and Patient Outcomes Programme

NES: Night Eating Syndrome

NG69: NICE Guideline 69

NHS: National Health Service

NHSE: National Health Service England

NICE: National Institute for Health and Care Excellence

QED: Quality Network for Eating Disorders

QNIC: Quality Network for Inpatient CAMHS

QNCC: Quality Network for Community CAMHS

SSCM: Specialist Supportive Clinical Management

SUCAG: Service User and Carer Advisory Group

VCSE: Voluntary, Community and Social Enterprise

Appendix B: Glossary of Key Terms

Access and Waiting Time (AWT) Standard: Children and Young People referred for an assessment or treatment of an eating disorder will access NICE concordant treatment within 1 week for urgent cases and 4 weeks for routine cases.

Adolescent-Focused Psychotherapy for Anorexia Nervosa (AFP-AN): AFP-AN is an individual therapy focused on eating symptoms in the context of common themes in adolescent development.

Aggregated Data: Data aggregation is a process where data from multiple sources (e.g. data submitted by each eating disorder team) is gathered and expressed in a summary form (e.g. by Trust, ICB, region or service type) for statistical analysis.

Anorexia Nervosa (AN): A person with AN limits how much they eat or drink due to fear of weight gain. It is not the same as anorexia, which means loss of appetite and is a symptom of illnesses such as depression and cancer.

Atypical Anorexia Nervosa: A person with Atypical Anorexia Nervosa will present similar to people with Anorexia Nervosa but one of the core features of Anorexia Nervosa will be absent e.g. extreme weight loss/low weight, fear of weight gain.

Atypical Bulimia Nervosa: A person with Atypical Bulimia Nervosa will present the same binge and purge behaviours as those with Bulimia Nervosa; however, the regularity of the episodes is far less frequent, or some other core feature is absent e.g. fear of weight gain.

Avoidant/Restrictive Food Intake Disorder (ARFID): A person with ARFID avoids certain foods or types of food, having restricted intake in terms of overall amount eaten, or both. The reason for food restriction is not due to concerns about body weight and shape.

Binge Eating Disorder (BED): A person with BED eats very large quantities of food without feeling like they're in control of what they're doing.

Body Mass Index (BMI): A method of adjusting someone's weight to take their height into consideration, since weight is height dependent. In Children, BMI needs to also be adjusted for age and sex.

Bulimia Nervosa (BN): Bulimia (or Bulimia Nervosa) involves a cycle of eating large quantities of food (binging) and then trying to compensate for that overeating through various means (purgung).

Cognitive Behavioural Therapy for Eating Disorders (CBT-ED): Individual CBT-ED is a psychological therapy focussed on current problems and how to change thoughts and behaviours that maintain an eating disorder. This therapy may be recommended as part of the treatment for all kinds of eating disorders.

Cognitive Behavioural Therapy Ten (CBT-T): A brief (ten-session) form of CBT-ED.

Community service: Community services are outpatient services with the aim of providing accessible, localised care within the community (and outside of hospital).

Day patient service: Step-down care from inpatient treatment or an alternative to admission. Intensive day patient treatment is provided on at least four to five days a week.

Documented ARFID care pathway: A detailed plan that outlines the steps and processes for caring for individuals with ARFID specifically, rather than a general pathway for all eating disorders.

Documented Binge Eating Disorder care pathway: A detailed plan that outlines the steps and processes for caring for individuals with BED specifically, rather than a general pathway for all eating disorders.

First Episode Rapid Early Intervention for Eating Disorders (FREED): FREED is First Episode Rapid Early Intervention for Eating Disorders. It is a service model and care package for 16 to 25-year-olds who have had an eating disorder for three years or less, with a focus on the difficulties young people face during these years of their life.

Focal Psychodynamic Therapy (FPT): FPT is a form of therapy that encourages people to explore early events that may have affected their mental health and helps them find healthier ways to cope with negative emotions.

Inpatient service: Inpatient services are for people who can no longer be supported at home and need to be admitted to a psychiatric ward due to the severity of their eating disorder.

Integrated Care Board (ICB): ICBs are NHS organisations responsible for planning and commissioning health services for their local population.

Intensive community service: Intensive community treatment may include a brief period of outreach support provided by a community eating disorder service and/or increased frequency of community treatment to maintain momentum towards progress, including supervised mealtimes and support for families around meals, for an agreed period of time.

Maudsley Model of Anorexia Nervosa Treatment for Adults (MANTRA): A specialist integrative therapy specifically designed for the treatment of Anorexia Nervosa which aims to address the cognitive, emotional, relational and biological factors which tend to keep people stuck in their illness.

Mean: Mean is a measure of central tendency, most commonly referred to as the average. It represents the sum of all values in a dataset divided by the total number of values.

National Institute for Health and Care Excellence (NICE): An independent organisation in the UK that provides national guidance and advice to improve the quality of health and social care.

NHS Futures dashboard: NHS Futures is a free, secure, online collaboration platform for everyone working in health and social care to connect, share knowledge, and work on projects across different organisations. NHS Futures hosts mental health data reporting dashboards, designed to help healthcare professionals, commissioners, and policymakers access, visualise, and interpret data related to mental health services across England.

NICE Guideline 69 (NG69): The NICE guideline for the recognition and treatment of eating disorders.

Night Eating Syndrome (NES): NES is characterised by excessive food intake in the evening or nighttime.

Outreach service: Outreach services include primary care, work around prevention and school/university outreach services.

Paired Outcome Measures: Outcome measures that are recorded at two time points or more during treatment time, e.g. start of treatment, follow-up second time point, or at the end of treatment.

Provider Collaboratives: Partnerships which bring two or more NHS Trusts to work together across multiple locations to deliver services at scale.

Purgung Disorder: Purging disorders involves recurrent purging after normal or small amounts of food.

Specialist Supportive Clinical Management (SSCM): A psychotherapy that integrates elements of psychoeducation, CBT and psychodynamic therapy to facilitate a patient's understanding of their eating disorder and helps them to develop coping strategies that promote recovery.

Voluntary, Community and Social Enterprise (VCSE): An umbrella term encompassing a range of organisations that help deliver services, shape their design and advocate for the voice of service users, and carers.

Appendix C: List of Registered Services and Teams

This appendix provides a comprehensive list of services and teams that registered for the National Audit of Eating Disorders. It includes both teams that completed the Organisational Surveys and those that registered but did not complete either survey.

To aid interpretation, the 'Team name' column includes abbreviations indicating the type of service each team provided:

CEDS: Community adult

CYP CEDS: Community children and young people

AA-CEDS: All age CEDS

CYP DP: Day patient service for children and young people

Adult DP: Day patient service for adults

CYP IP: Inpatient service for children and young people

Adult IP: Inpatient adult

U: Other (e.g. eating disorder charities, residential rehabilitation)

Appendix C1: List of Registered Services and Teams

Table 1: List of Registered Services and Teams

Region	Trust	Service name	Team name
East of England	Cambridgeshire and Peterborough NHS Foundation Trust	Cambridge and Peterborough Adult Community Eating Disorder Service	Cambridge and Peterborough Adult Community Eating Disorder Service (CEDS)
East of England	Cambridgeshire and Peterborough NHS Foundation Trust	Cambridgeshire and Peterborough CAMHS Eating Disorders Service	Cambridgeshire and Peterborough CAMHS Eating Disorders Service (CYP CEDS)
East of England	Cambridgeshire and Peterborough NHS Foundation Trust	Ward S3 Inpatient Service	Ward S3 Inpatient Service (Adult IP)
East of England	Cambridgeshire and Peterborough NHS Foundation Trust	Norfolk Community Eating Disorder Service	Norfolk Community Eating Disorder Service (CEDS)
East of England	Cambridgeshire and Peterborough NHS Foundation Trust	The Beacon	The Beacon (CYP DP)

East of England	Cambridgeshire and Peterborough NHS Foundation Trust	Darwin Centre for Young People	Darwin Centre for Young People (CYP IP)

Appendix C2: Services Offering Multiple Types of Care

For the purpose of analysis by service type, teams were categorised based on the service type allocated during registration. Although some teams indicated that they deliver multiple types of care in Survey 1, the categorisation reflects the main team they registered under. Additional details on teams providing multiple types of care are outlined below.

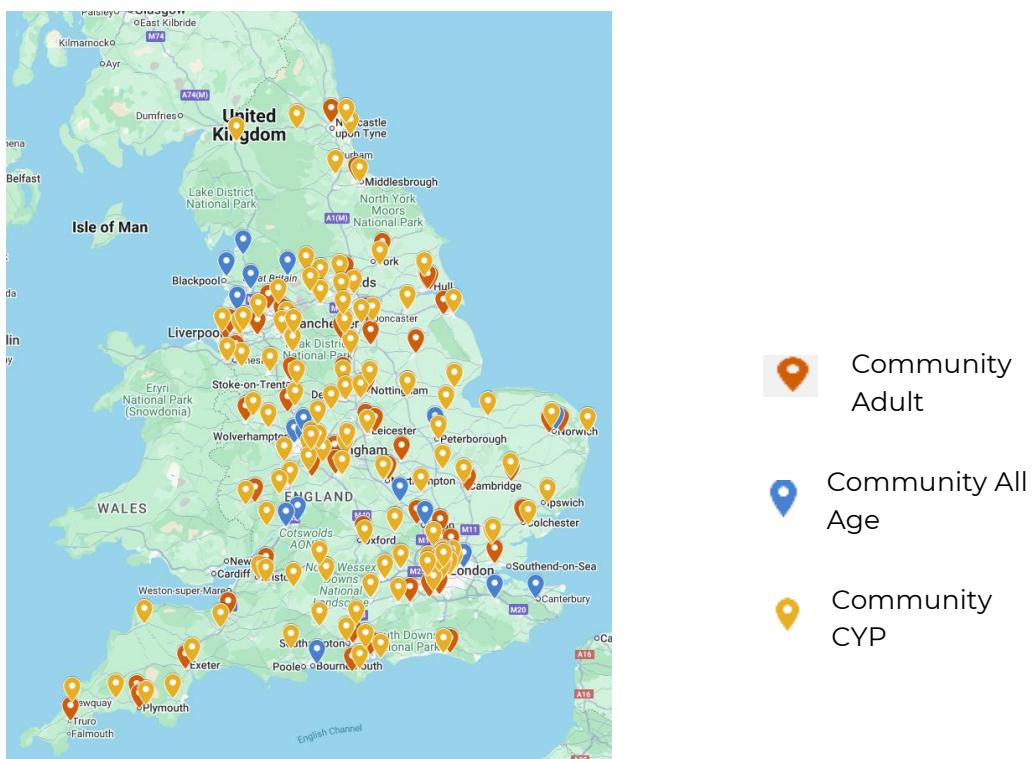

Team Type	Subgroup	Service Configuration	Number of Teams
Community Teams	Adult	Community only	35
		Community + intensive community care	20
		Community + intensive community + day patient care	6
		Intensive community care only	2
	CYP	Community only	25
		Community + intensive community care	54
		Community + intensive community + day patient care	5
		Intensive community care only	3
Inpatient Teams	Adult	Inpatient only	29
		Inpatient + day patient care	3
		Inpatient + intensive community care	1
	CYP	Inpatient only	34
		Inpatient + day patient care	10
		Inpatient + intensive community care	1
Day Patient Teams	Adult	Day patient only	11
		Day patient + intensive community care	5
	CYP	Day patient only	6
		Day patient + intensive community care	2

CYP services who also reported to provide care for patients aged 18-25

Service Type	Number of Teams
Community	8
Day patient	1
Inpatient	3

Appendix C3: Map of Community Eating Disorders Services Across England

Figure 1: Map of all age, adult and CYP community services providing eating disorders treatment across England

Appendix C4: List of Services Holding Accreditation for the Quality Network for Community CAMHS (QNCC) at the Time of Audit

Table 2: List of services holding accreditation for the Quality Network for Community CAMHS (QNCC), including those undergoing re-accreditation

Region	Trust	Service Name	Accreditation Status for QNCC
London	North East London NHS Foundation Trust	NELFT All Age Community Eating Disorder Service (London)	Yes, undergoing re-accreditation
North East and Yorkshire	Northumbria Healthcare NHS Foundation Trust	North Tyneside CAMHS Eating Disorder Pathway	Accredited
North West	Cheshire and Wirral Partnership NHS Foundation Trust	Cheshire & Merseyside Adolescent Community Eating Disorder Service (CHEDS)	Yes, undergoing re-accreditation
South East	North East London NHS Foundation Trust	Kent & Medway Eating Disorders Service	Accredited
South East	Surrey and Borders Partnership NHS Foundation Trust	Eating Disorder Service for Children and Young People	Yes, undergoing re-accreditation
South West	Oxford Health NHS Foundation Trust	All Age Eating Disorders Service (BSW)	Yes, undergoing re-accreditation

Appendix C5: List of Services Holding Accreditation for the Quality Network for Inpatient CAMHS (QNIC)

Table 3: List of services holding accreditation for the Quality Network for Inpatient CAMHS (QNIC), including those undergoing re-accreditation

Region	Trust	Service Name	Accreditation Status for QNIC
London	Great Ormond Street Hospital NHS Foundation Trust	Mildred Creak Unit	Yes
London	North East London NHS Foundation Trust	Brookside Adolescent Inpatient Unit	Yes, undergoing re-accreditation
Midlands	Northamptonshire Healthcare NHS Foundation Trust	CAMHS INPATIENTS and CAMHS Intensive Outreach Team	Yes
North East and Yorkshire	Riverdale Grange Independent Hospital	Riverdale Grange Hospital	Yes, undergoing re-accreditation

North West	Alder Hey Children's NHS Foundation Trust	Sunflower House Alder Hey Hospital NHS Trust	Yes
North West	Cheshire and Wirral Partnership NHS Foundation Trust	Cheshire & Merseyside Adolescent Eating Disorder Service (CHEDS)	Yes, undergoing re-accreditation
North West	Greater Manchester Mental Health NHS Foundation Trust	Phoenix Ward, Junction 17	Yes, undergoing re-accreditation
North West	Pennine Care NHS Foundation Trust	Hope Unit	Yes
South West	Cornwall Partnership NHS Foundation Trust	Sowenna Ward	Yes, undergoing re-accreditation

Appendix C6: List of Services Holding Accreditation for the Quality Network for Eating Disorders (QED)

Table 4: List of services holding accreditation for the Quality Network for Eating Disorders (QED), including those undergoing re-accreditation

Region	Trust	Service Name	Accreditation Status for QED
East of England	Newmarket House Clinic	Newmarket House Healthcare Limited	Yes
London	Cygnet Health Care Limited	Sunrise Ward	Yes
London	North London NHS Foundation Trust	St Ann's Eating Disorder Service	Yes
London	Orri Ltd.	Orri Limited	Yes
London	Priory Group	Priory Hospital Hayes Grove	Yes
Midlands	Coventry and Warwickshire Partnership Trust	Coventry & Warwickshire Eating Disorder Service	Yes
Midlands	Leicestershire Partnership NHS Trust	Leicestershire Adult Eating Disorders Service	Yes
Midlands	Midlands Partnership University NHS Foundation Trust	Adult Eating Disorder Community Service	Yes
Midlands	Priory Group	Priory Hospital Woodbourne	Yes
North East and Yorkshire	Cumbria, Northumberland, Tyne and Wear NHS Foundation Trust	Richardson Eating Disorder Service and Community Adult Eating Disorder Service	Yes

North East and Yorkshire	Leeds and York Partnership NHS Foundation Trust	CONNECT Inpatients	Yes, undergoing re-accreditation
North East and Yorkshire	Riverdale Grange Independent Hospital	Riverdale Grange Hospital	Yes
North West	Cheshire and Wirral Partnership NHS Foundation Trust	Oaktrees ward inpatient eating disorder unit	Yes, undergoing re-accreditation
North West	Priory Group	Priory Hospital Cheadle Royal	Yes
North West	Priory Group	Priory Hospital Preston	Yes
South East	Oxford Health NHS Foundation Trust	Cotswold House Oxford	Yes
South East	Priory Group	Priory Hospital Marlow	Yes
South East	Priory Group	Priory Hospital Southampton	Yes
South West	Oxford Health NHS Foundation Trust	Cotswold House Marlborough	Yes

Appendix D: Eating Disorder Service Type and Structure

Further analysis was conducted to examine the types of services provided across regions, as well as the structure of these services.

Appendix D1: Eating Disorder Services Provided by Region

Table 5: Regional breakdown of eating disorder service provision across England.

Service Type	East of England (n = 34)	London (n = 39)	Midlands (n = 49)	North East and Yorkshire (n = 51)	North West (n = 36)	South East (n = 34)	South West (n = 33)	National (n = 276)
Outreach Service	20.6% (7/34)	10.3% (4/39)	16.3% (8/49)	25.5% (13/51)	2.8% (1/36)	11.8% (4/34)	24.2% (8/33)	16.3% (45/276)
Community Service	50.0% (17/34)	46.2% (18/39)	61.2% (30/49)	58.8% (30/51)	72.2% (26/36)	55.9% (19/34)	63.6% (21/33)	58.3% (161/276)
Intensive Community Service	23.5% (8/34)	25.6% (10/39)	44.9% (22/49)	52.9% (27/51)	19.4% (7/36)	35.3% (12/34)	48.5% (16/33)	37.0% (102/276)
Day Patient Service	23.5% (8/34)	28.2% (11/39)	16.3% (8/49)	17.6% (9/51)	2.8% (1/36)	23.5% (8/34)	18.2% (6/33)	18.5% (51/276)
Inpatient Service	29.4% (10/34)	35.9% (14/39)	28.6% (14/49)	25.5% (13/51)	27.8% (10/36)	29.4% (10/34)	24.2% (8/33)	28.6% (79/276)
Other Service	20.6% (7/34)	12.8% (5/39)	24.5% (12/49)	17.6% (9/51)	22.2% (8/36)	23.5% (8/34)	21.2% (7/33)	20.3% (56/276)

NB: This table shows the percentage of each type of service offered out of all teams in each region. For example, 20.6% of all eating disorder teams in the East of England offer an outreach service.

Appendix D2: Structure of Eating Disorder Service Provision

Figure 2: Services provided and the percentage that are eating disorder specific, general with an eating disorder pathway, general with no eating disorder pathway, or other

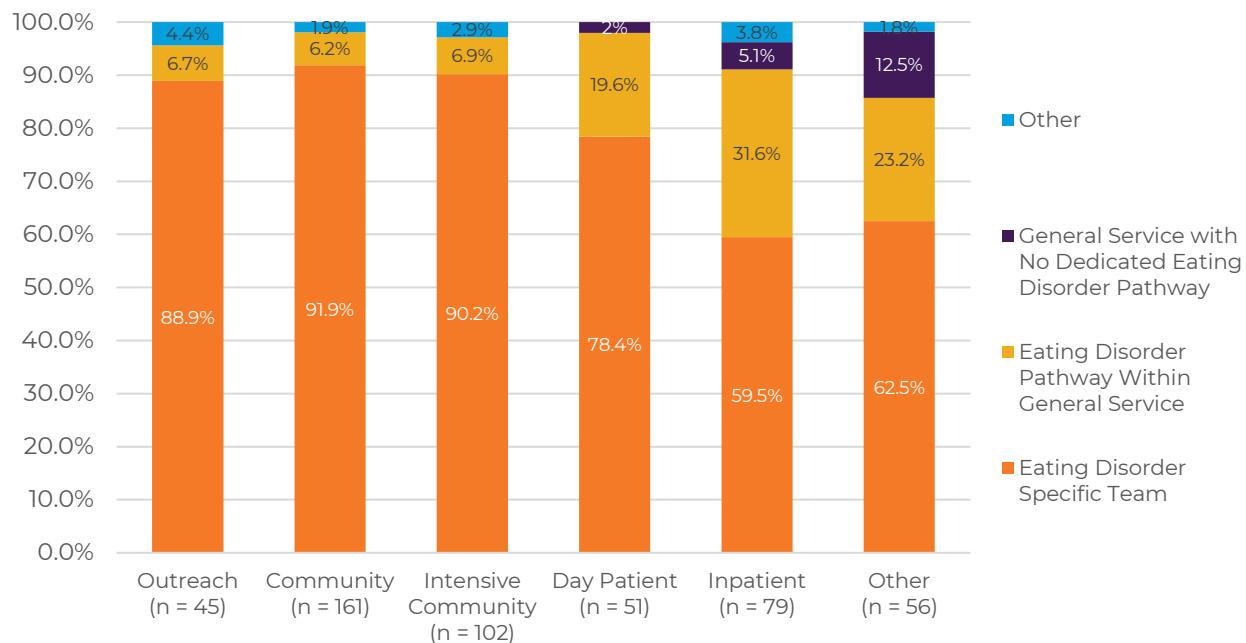

Figure 3: Percentage of community, day patient and inpatient teams, provided by age group, that are an eating disorder specific service, a general service with an eating disorder pathway, a general service with no eating disorder pathway, or an other service

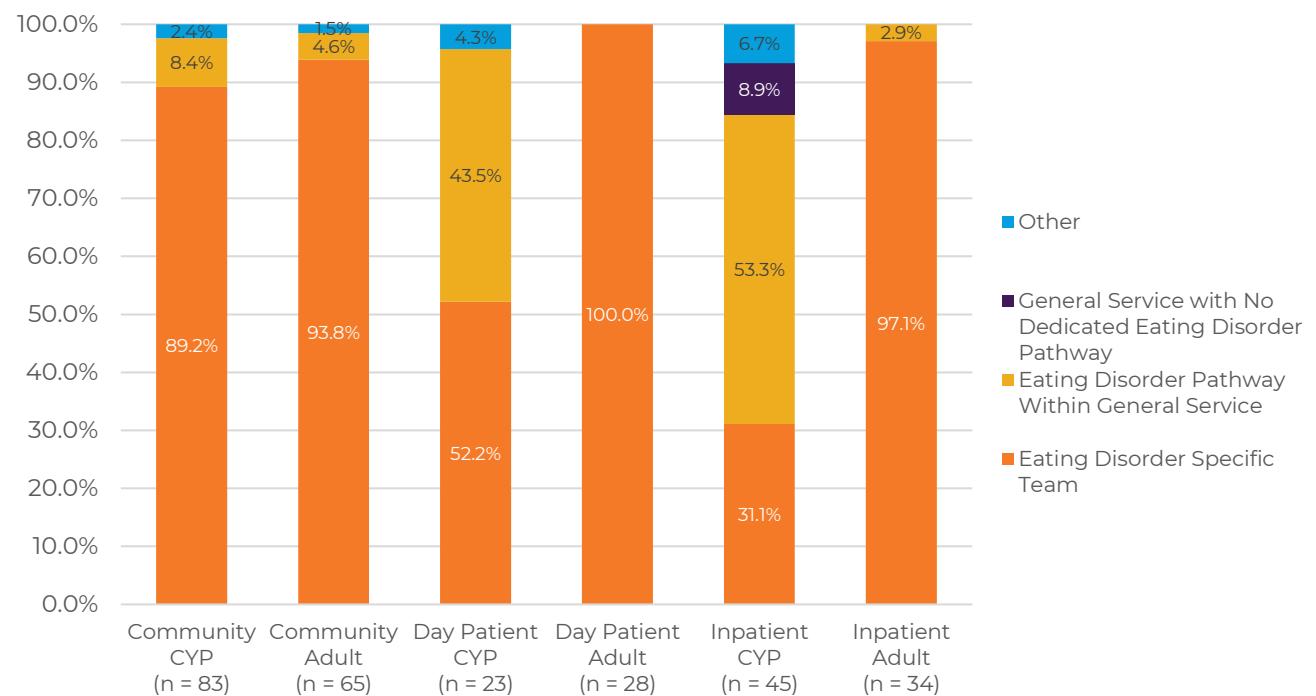

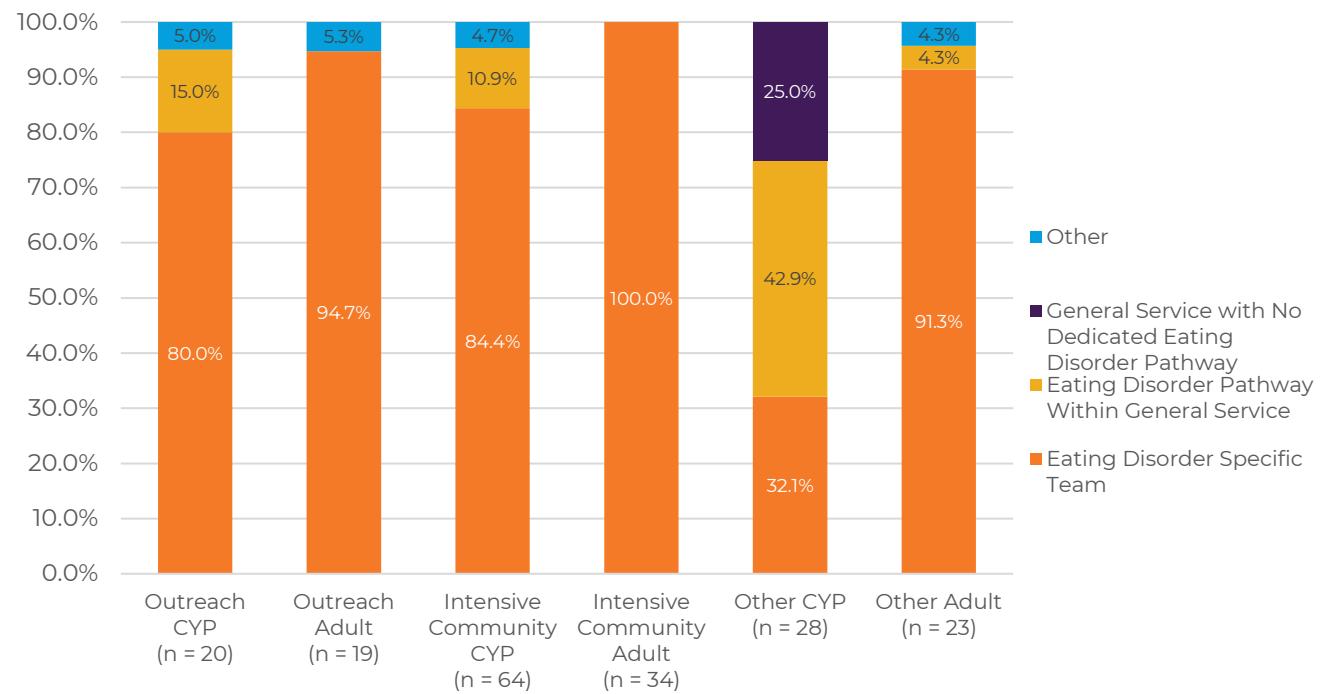

Figure 4: Percentage of outreach, intensive community and other teams, provided by age group, that are an eating disorder specific service, a general service with an eating disorder pathway, a general service with no eating disorder pathway, or an other service

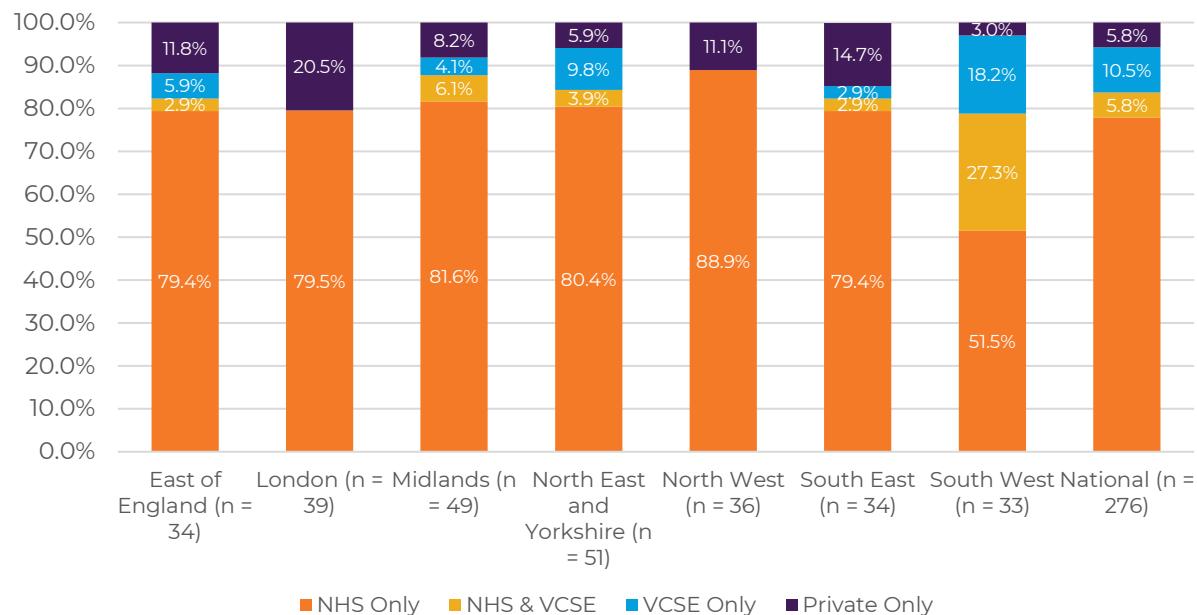

Appendix E: Eating Disorder Service Providers

Further analysis of service providers was conducted to examine providers across regions and service types.

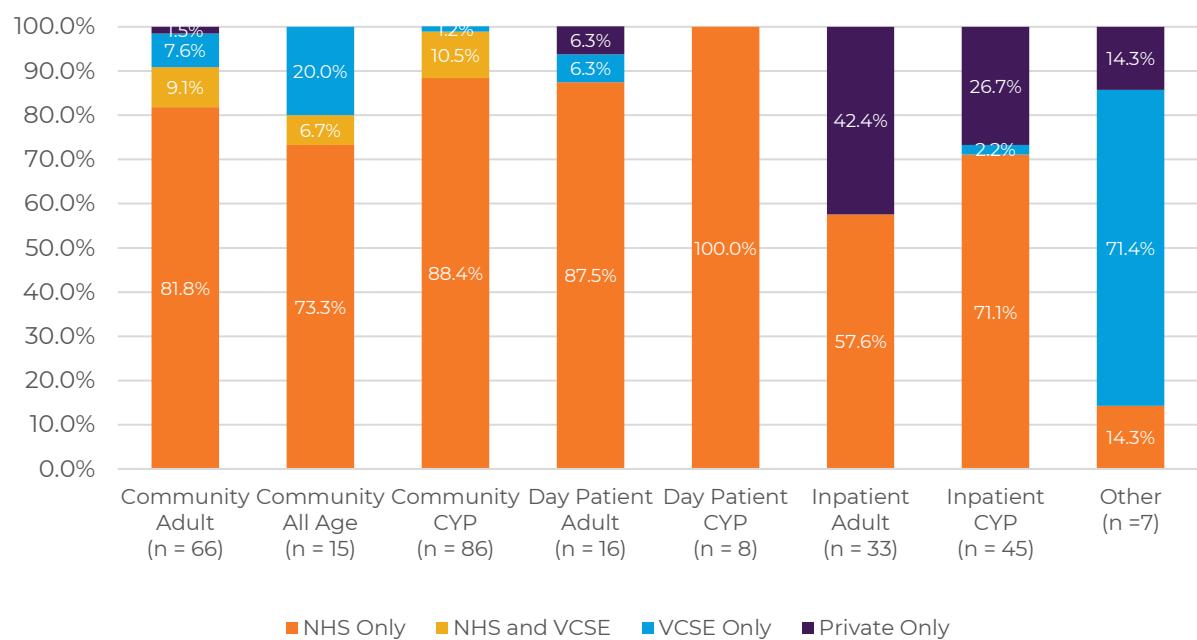

Appendix E1: Eating Disorder Service Providers by Region

CEDS	77.0% (47/61)	86.7% (13/15)	81.0% (68/84)	80.0% (12/15)	100.0% (8/8)	70.0% (21/30)	81.4% (35/43)	100.0% (7/7)
Medical ward	83.6% (51/61)	80.0% (12/15)	88.1% (74/84)	6.7% (1/15)	12.5% (1/8)	26.7% (8/30)	27.9% (12/43)	28.6% (2/7)
Inpatient psychiatric unit	73.8% (45/61)	73.3% (11/15)	75.0% (63/84)	20.0% (3/15)	25.0% (2/8)	23.3% (7/30)	55.8% (24/43)	28.6% (2/7)
Educational institution	27.9% (17/61)	93.3% (14/15)	77.4% (65/84)	0.0% (0/15)	0.0% (0/8)	0.0% (0/30)	0.0% (0/43)	71.4% (5/7)
Other	23.0% (14/61)	6.7% (1/15)	14.3% (12/84)	33.3% (5/15)	0.0% (0/8)	33.3% (10/30)	20.9% (9/43)	0.0% (0/7)

Appendix H: Exclusion Criteria

Further analysis was conducted to examine exclusion criteria across service types.

Appendix H1: Exclusion Criteria by Service Type

Figure 31: The percentage of teams using each exclusion criterion for accessing services, by service type

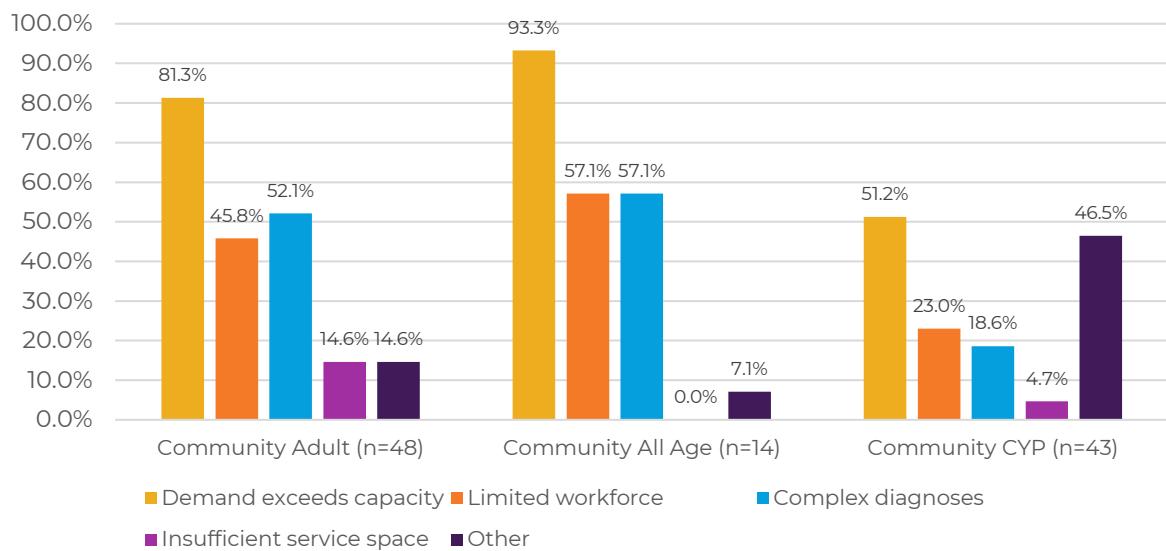

Appendix I: Access and Waiting Times

Further analysis was conducted to examine the how long people were waiting for an assessment and treatment across regions and service types, as well as the reasons why.

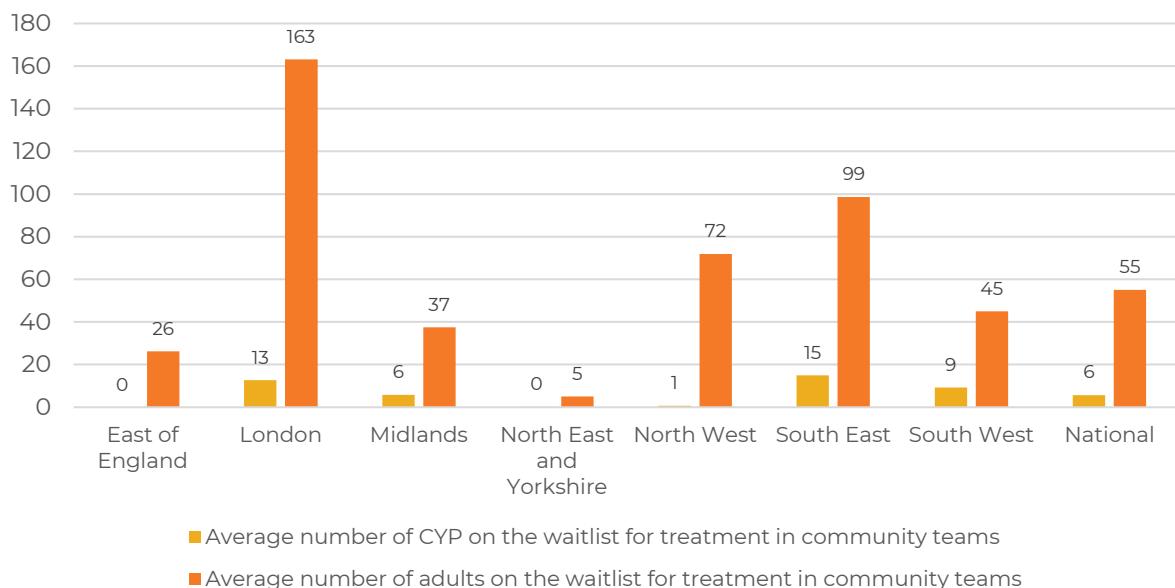

Appendix II: Waitlist Reasons in Community Services

Figure 32: The percentage of community teams reporting primary reasons for waitlists (out of teams that reported having people on their waiting lists)

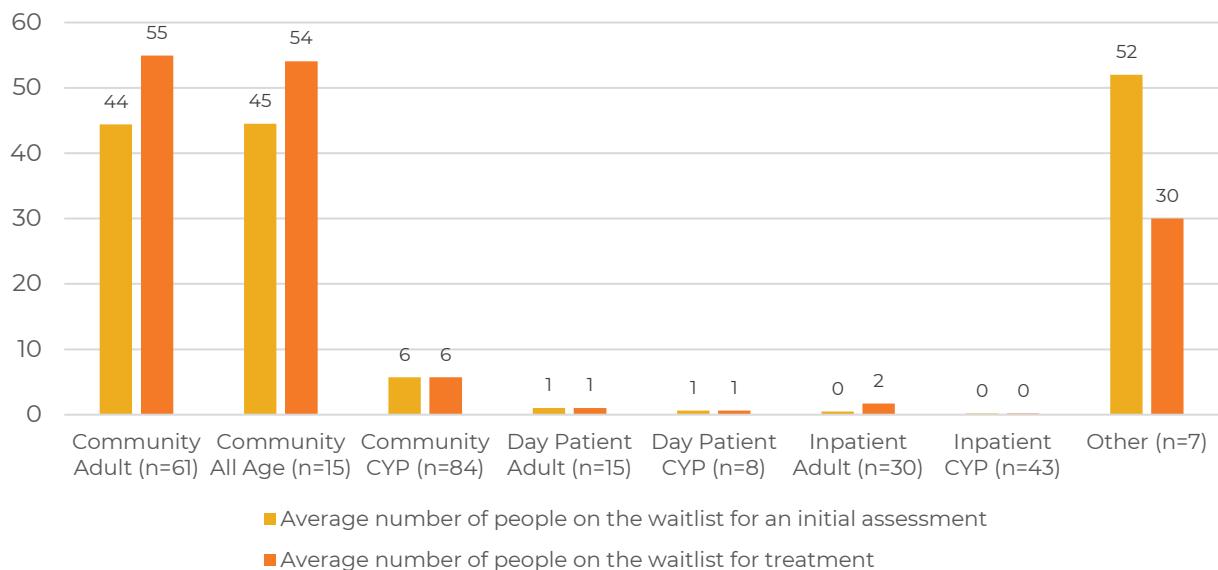

Appendix I2: Waiting Lists in Community Services by Region

Figure 33: The average number of people, reported by services, on waiting list for treatment for an eating disorder in community services, by age and region

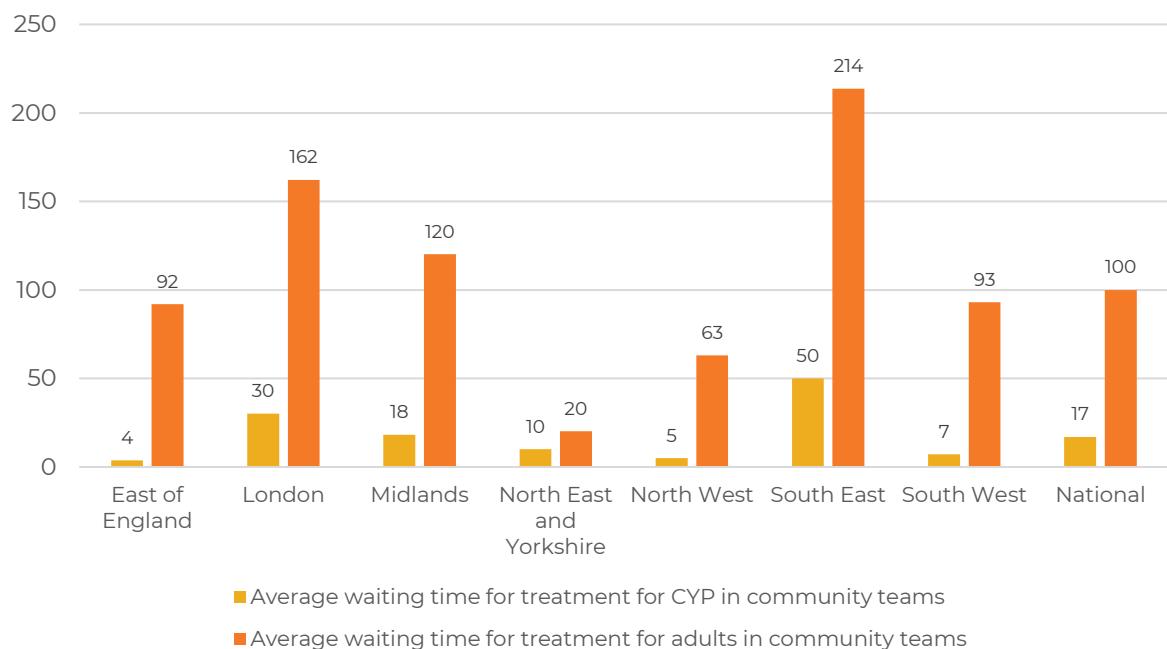

Appendix I3: Waiting Lists by Service Type

Figure 34: The average number of people, reported by services, on waiting list for an initial assessment and treatment for an eating disorder, by service type

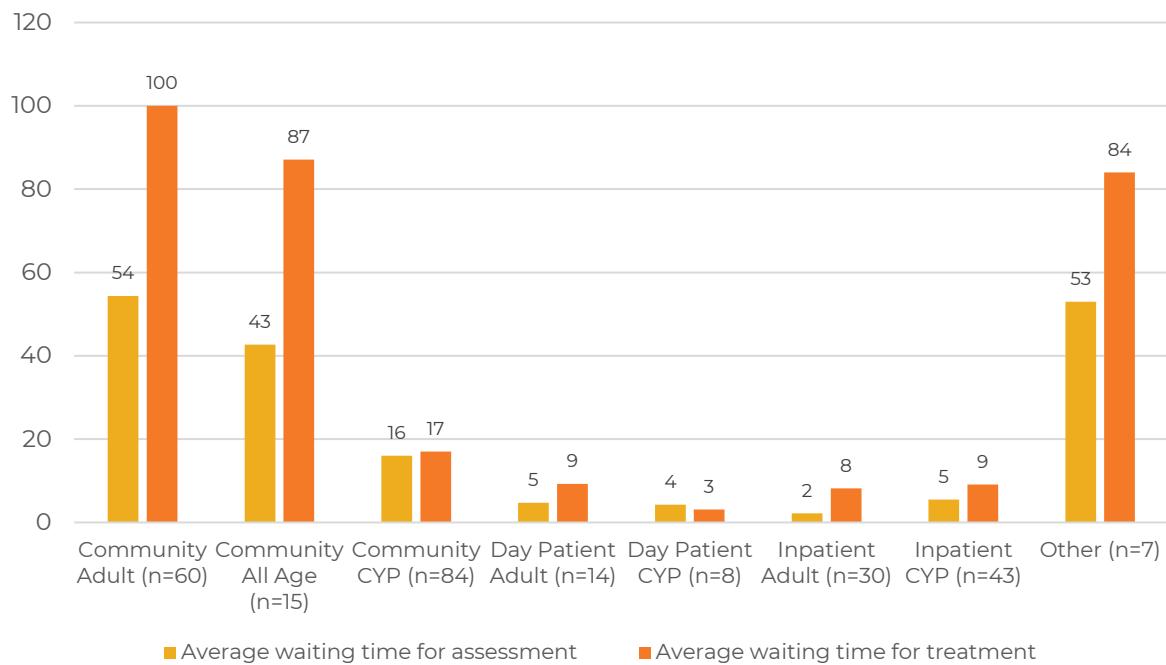

Appendix I4: Waiting Times in Community Services by Region

Figure 35: The average waiting time (in days), reported by services, for treatment for an eating disorder in community services, by region

Appendix I5: Waiting Times by Service Type

Figure 36: The average waiting time (in days), reported by services, for initial assessment and treatment for an eating disorder, by service type

Appendix J: Staffing

Further analysis was conducted to examine staff within each profession, staff vacancies, primary reasons for these vacancies and the caseloads of therapists in services across regions and service types.

Appendix J1: Staff within Each Profession in Community Teams, by Age

Figure 37: The percentage of community adult teams that have staff members within each profession

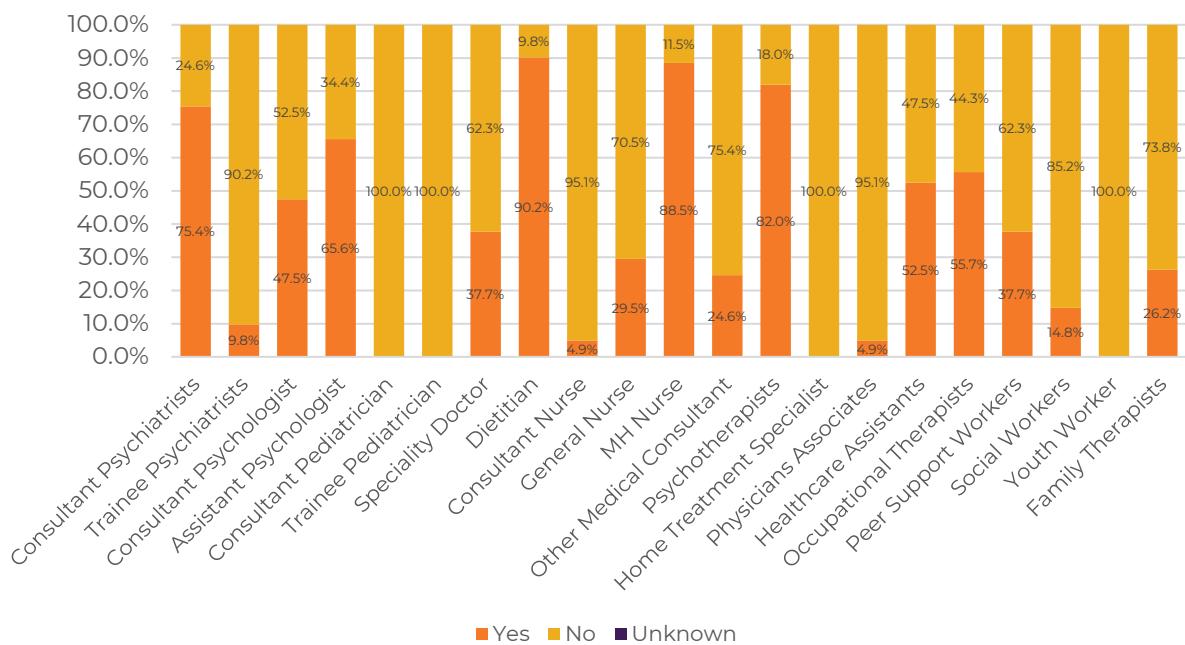

Figure 38: The percentage of community CYP teams that have staff members within each profession

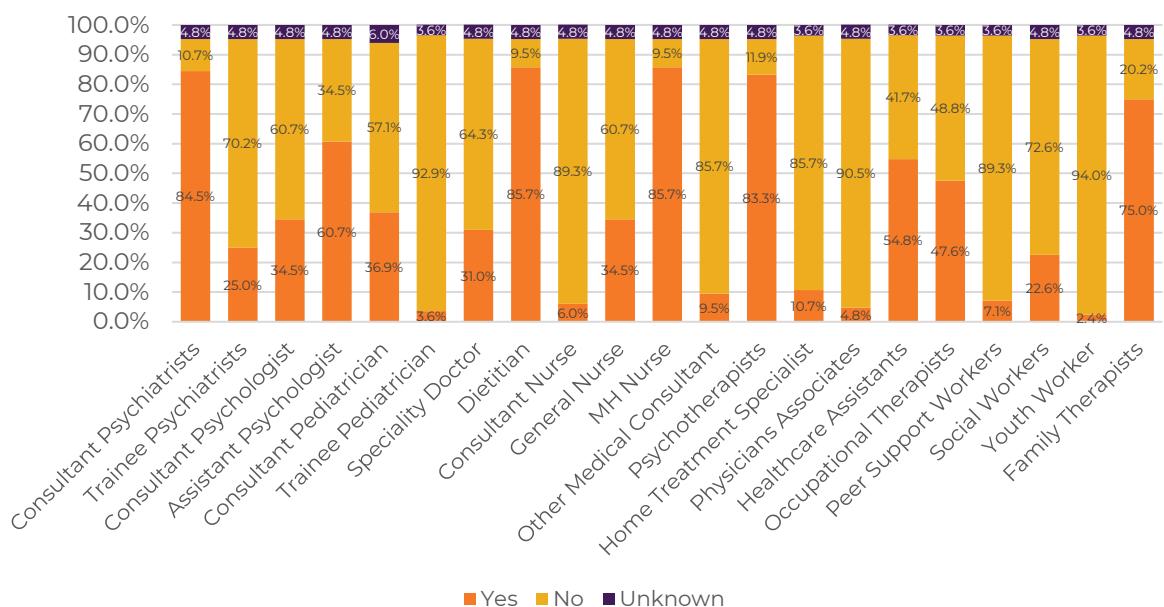

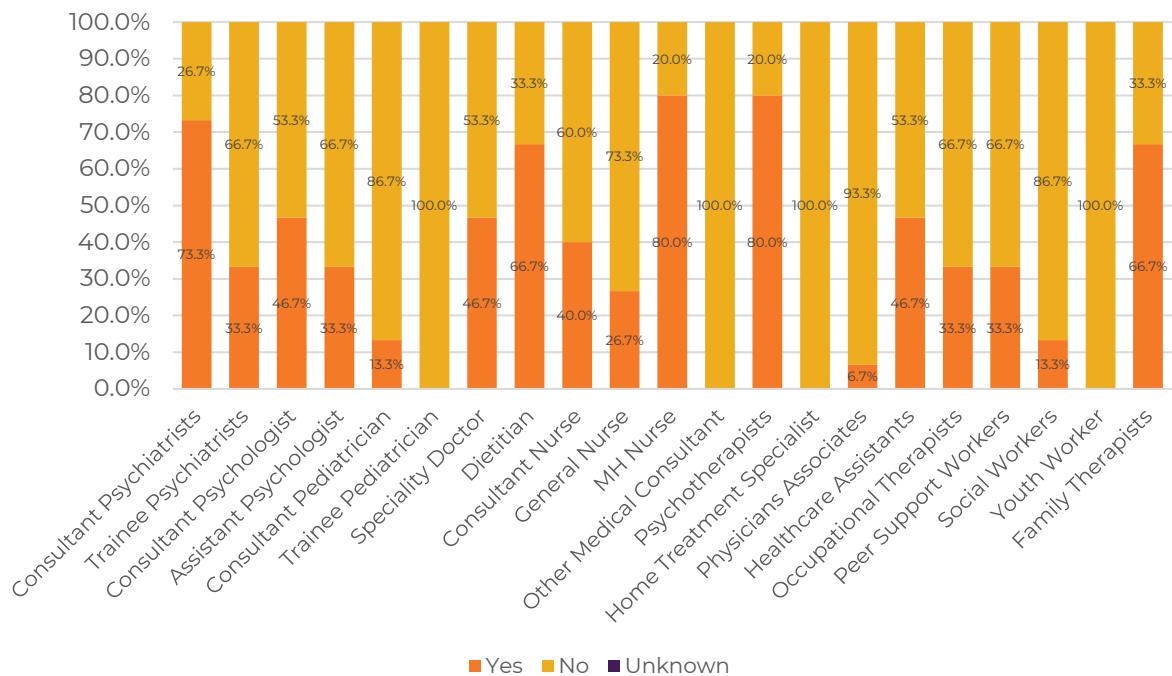

Figure 39: The percentage of community all age teams that have staff members within each profession

Appendix J2: Staff within Each Profession in Day Patient Teams, by Age

Figure 40: The percentage of day patient adult teams that have staff members within each profession

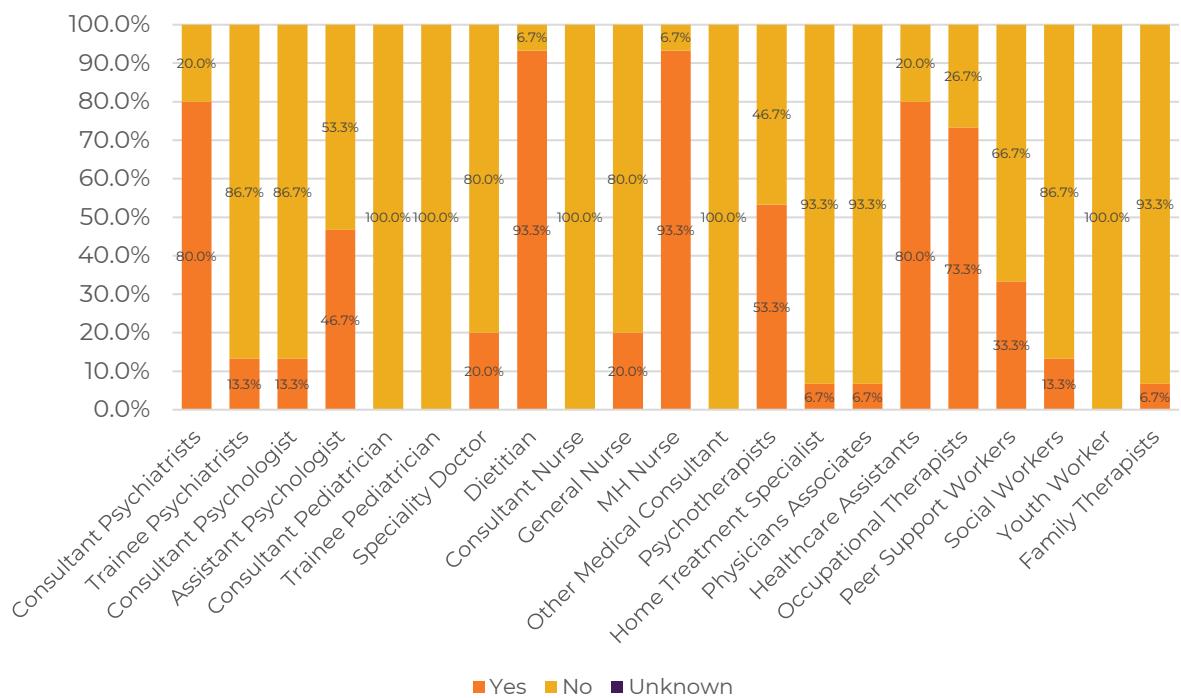

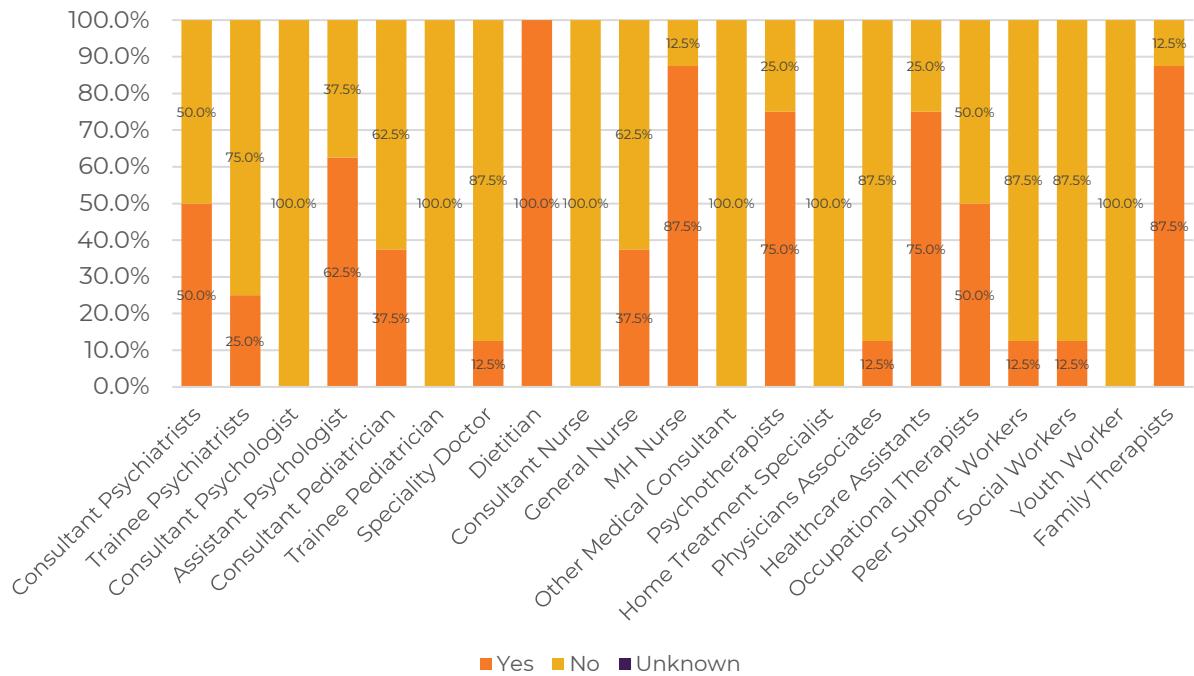

Figure 41: The percentage of day patient CYP teams that have staff members within each profession

Appendix J3: Staff within Each Profession in Inpatient Teams, by Age

Figure 42: The percentage of inpatient adult teams that have staff members within each profession

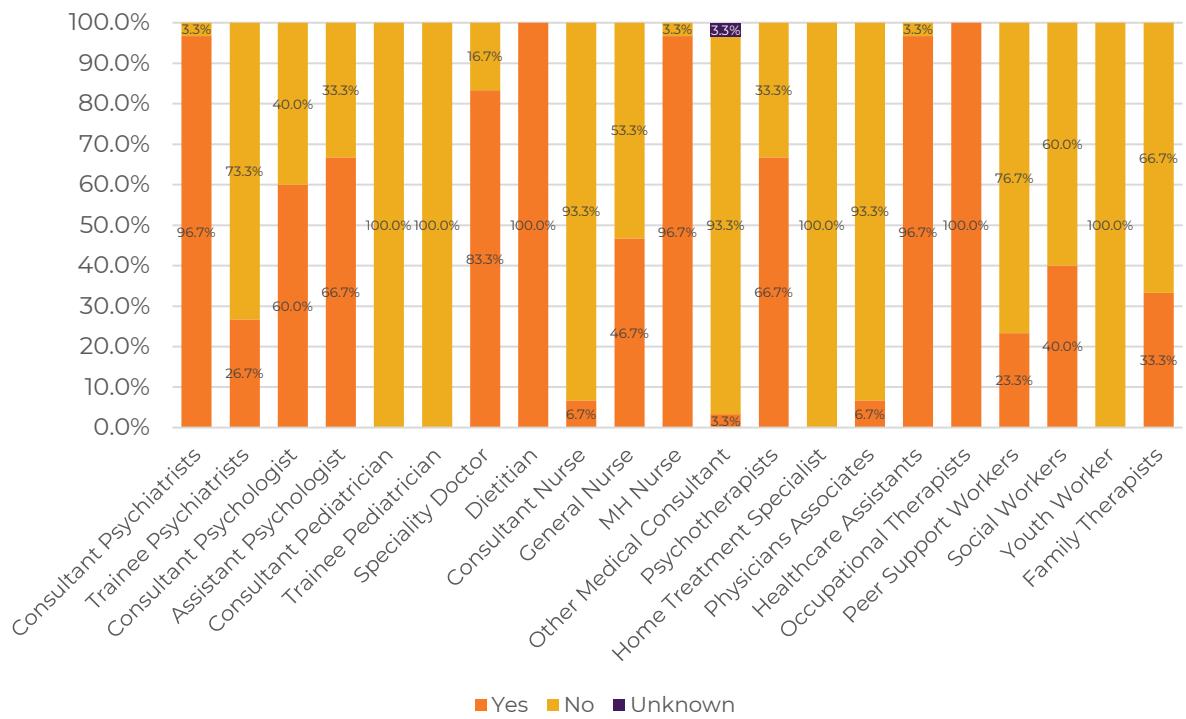

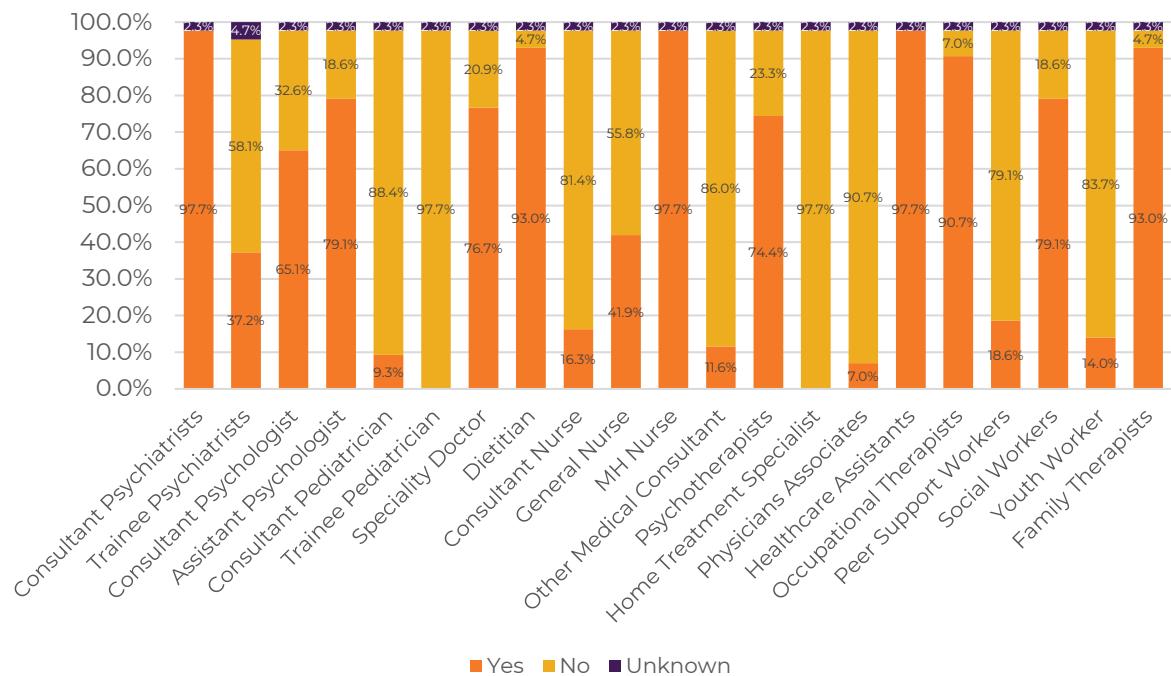

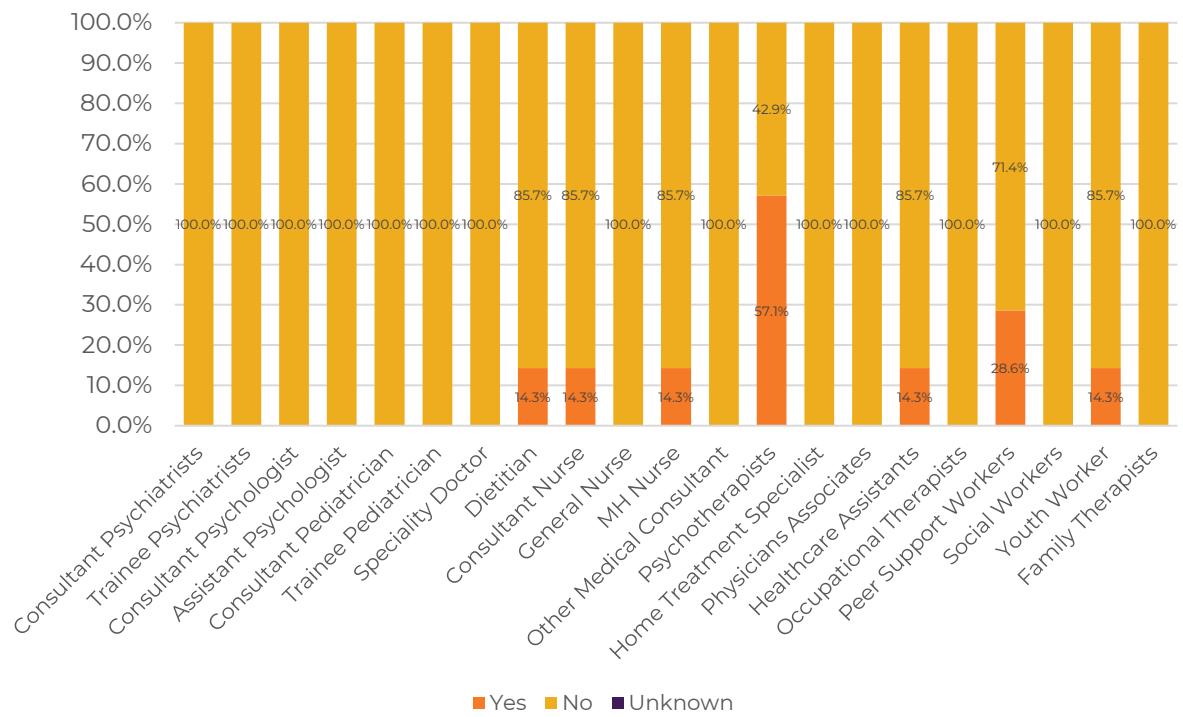

Figure 43: The percentage of inpatient CYP teams that have staff members within each profession

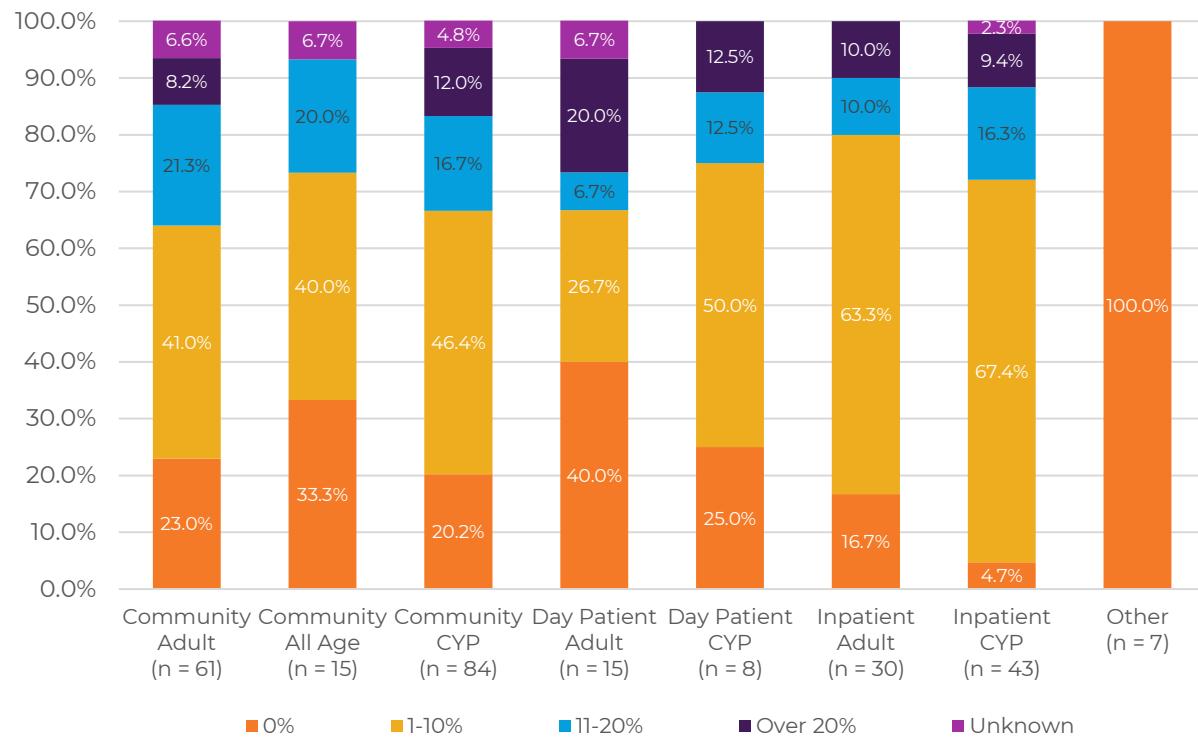

Appendix J4: Staff within Each Profession in Other Teams, by Age

Figure 44: The percentage of other teams that have staff members within each profession

Appendix J5: Staff Vacancies by Service Type

Figure 45: The percentage of teams reporting staff vacancies, by service type

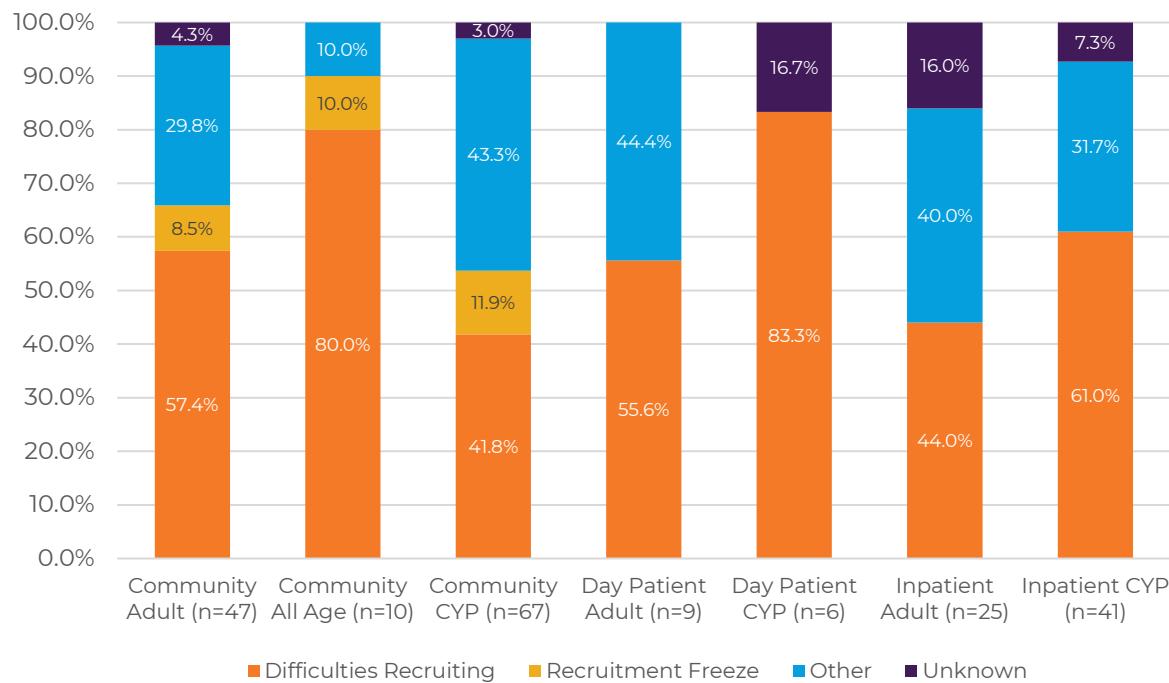

Appendix J6: Reasons for Staff Vacancies by Region

Figure 46: The percentage of teams reporting primary reasons for staff vacancies, by region

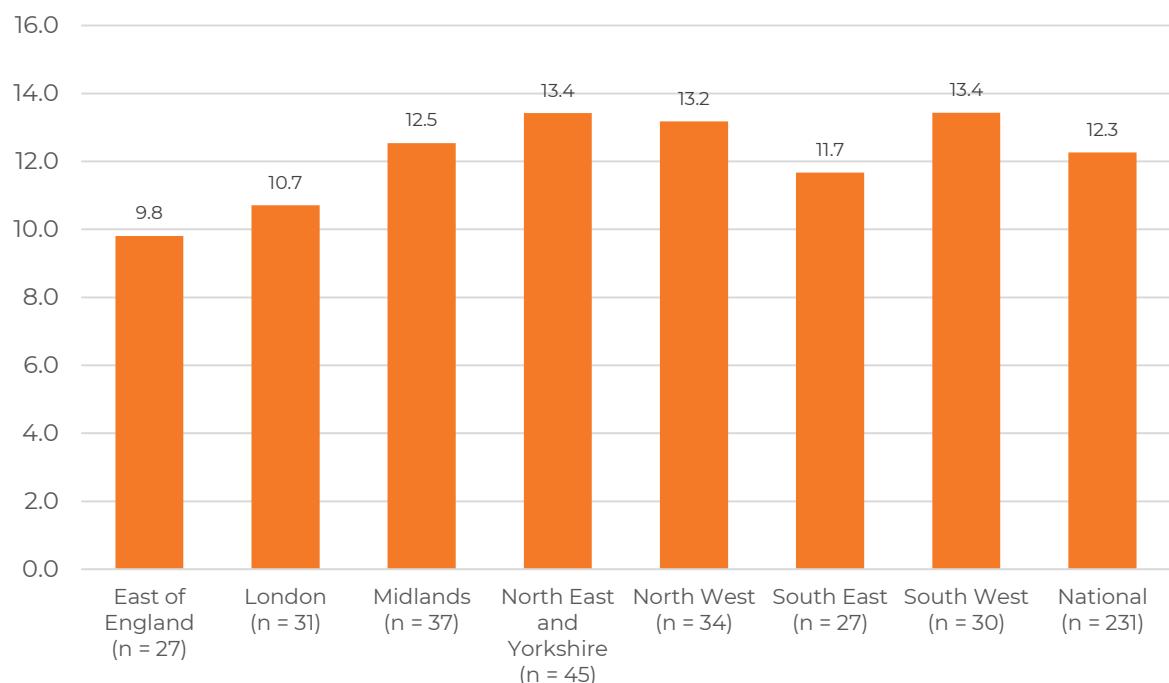

Appendix J7: Reasons for Staff Vacancies by Service Type

Figure 47: The percentage of teams reporting primary reasons for staff vacancies, by service type

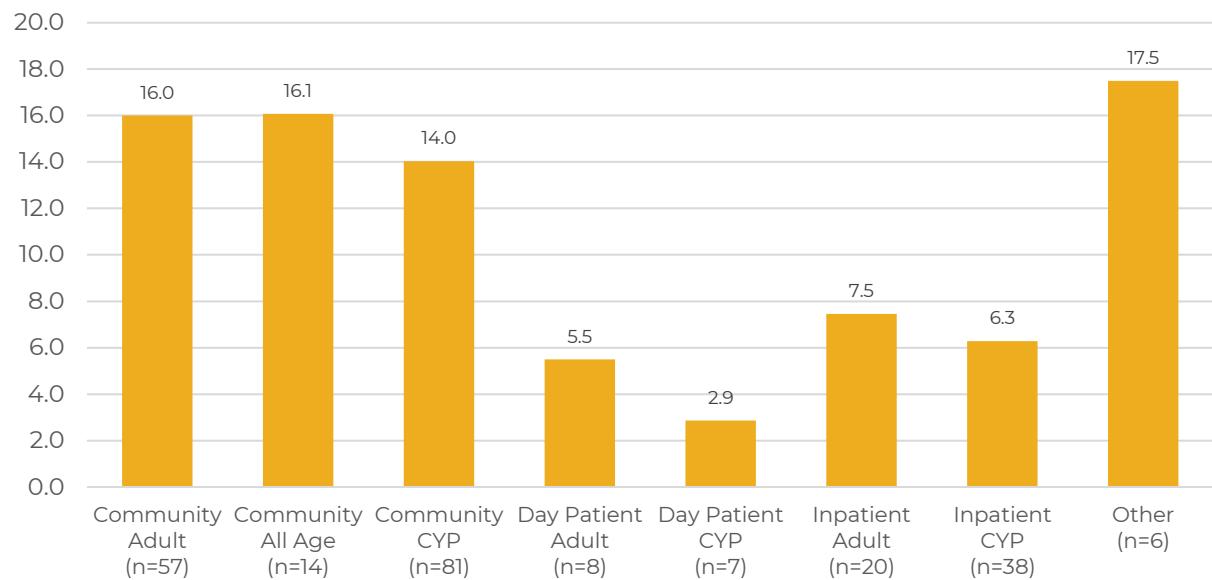

Appendix J8: Therapist Caseload by Region

Figure 48: The average caseload of therapists, by region

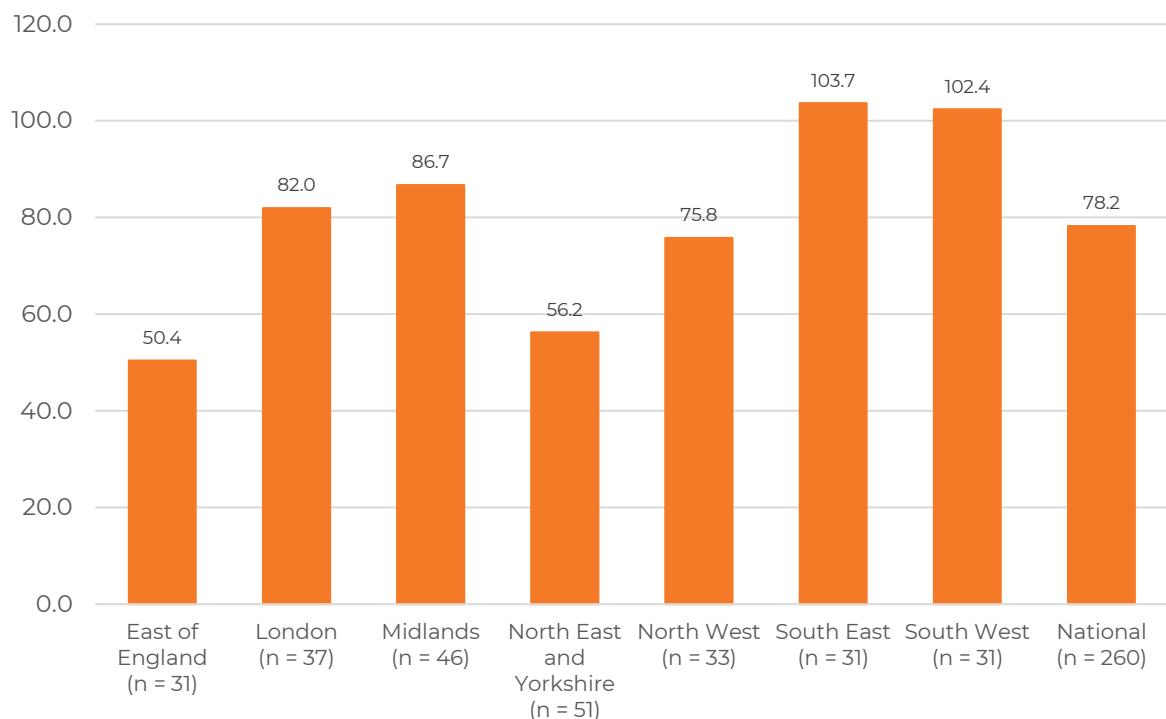

Appendix J9: Therapist Caseload by Service Type

Figure 49: The average caseload of therapist, by service type

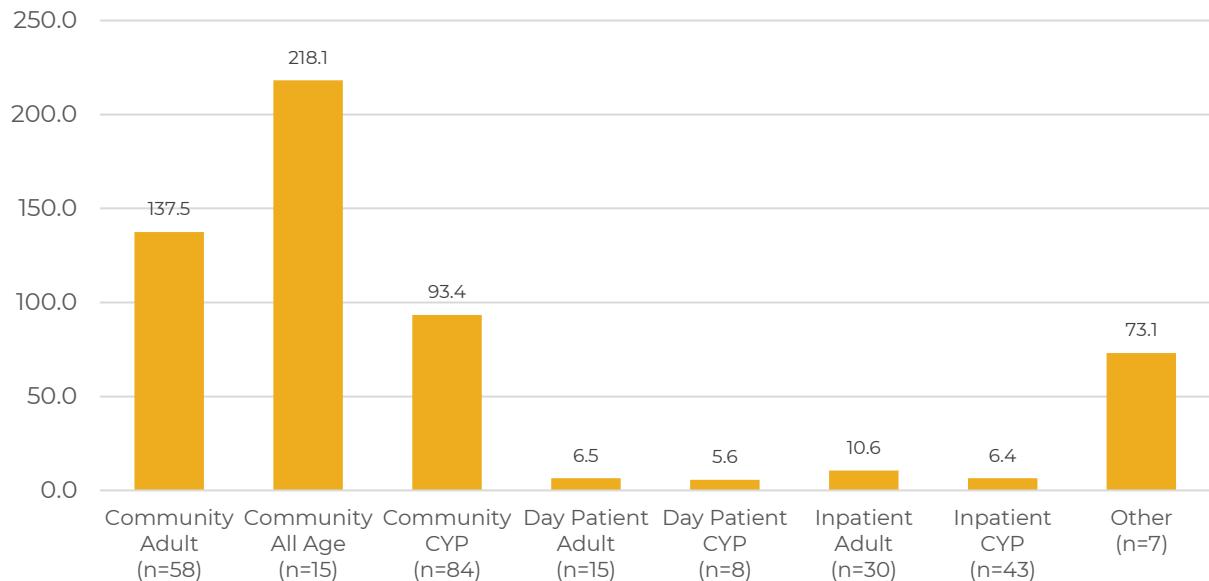

Appendix J10: Team Caseload by Region

Figure 50: The average number of people under treatment (of any type) per team, by region

Appendix J11: Team Caseload by Service Type

Figure 51: The average number of people under treatment (of any type) per team, by service type

Appendix K: Psychological Interventions

Further analysis was conducted to examine the percentage of staff trained to deliver each type of intervention across regions and service types.

Appendix K1: Recommended Psychological Interventions for Each Eating Disorder and Age Group

Table 8: Recommended psychological intervention for each eating disorder in adults, children, and young people according to NICE guidelines

Eating Disorder	Age Group	Recommended Psychological Intervention(s)
Anorexia Nervosa	Adults	<ul style="list-style-type: none">• Individual Cognitive Behavioural Therapy for Eating Disorders (CBT-ED)• Maudsley Anorexia Nervosa Treatment for Adults (MANTRA)• Specialist Supportive Clinical Management (SSCM) <p>If others unsuitable:</p> <ul style="list-style-type: none">• Eating Disorder Focused Focal Psychodynamic Therapy (FPT)
	Children & Young People	<ul style="list-style-type: none">• Family Therapy for Eating Disorders (FT-ED) <p>If FT-ED unsuitable:</p> <ul style="list-style-type: none">• CBT-ED• Adolescent-focused psychotherapy for Anorexia Nervosa (AFP-AN)
Bulimia Nervosa	Adults	<ul style="list-style-type: none">• Guided self-help <p>If guided self-help unsuitable:</p> <ul style="list-style-type: none">• CBT-ED
	Children & Young People	<ul style="list-style-type: none">• FT-ED <p>If FT-ED unsuitable:</p> <ul style="list-style-type: none">• CBT-ED (if FT-ED unsuitable)
Binge Eating Disorder	Adults	<ul style="list-style-type: none">• Guided self-help <p>If guided self-help unsuitable:</p> <ul style="list-style-type: none">• Group CBT-ED
	Children & Young People	<ul style="list-style-type: none">• Guided self-help <p>If guided self-help unsuitable:</p> <ul style="list-style-type: none">• Group CBT-ED

Appendix K2: Psychological Interventions in Adult Community Teams, by Region

Figure 52: Percentage of community adult teams in each region that have staff trained to deliver individual cognitive behavioural therapy for eating disorders (CBT-ED), cognitive behavioural therapy – ten (CBT-T), and group CBT-ED

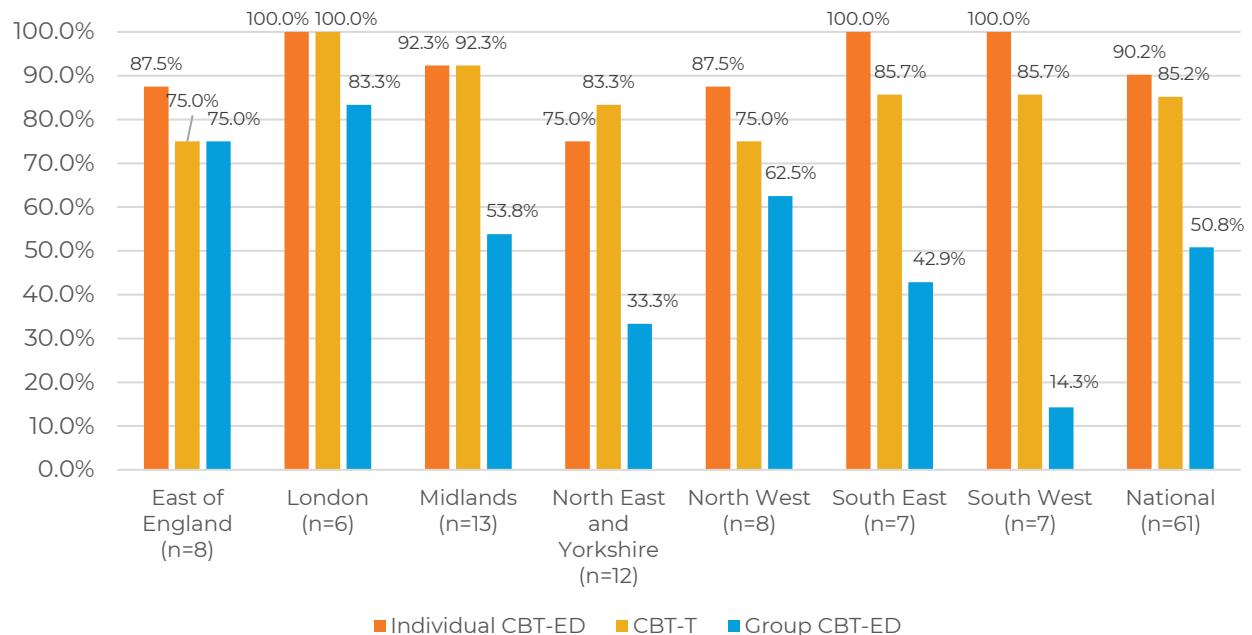

Figure 53: Percentage of community adult teams in each region that have staff trained to deliver Maudsley Anorexia Nervosa Treatment for Adults (MANTRA), specialist supportive clinical management (SSCM), and eating-disorder-focused focal psychodynamic therapy (FPT)

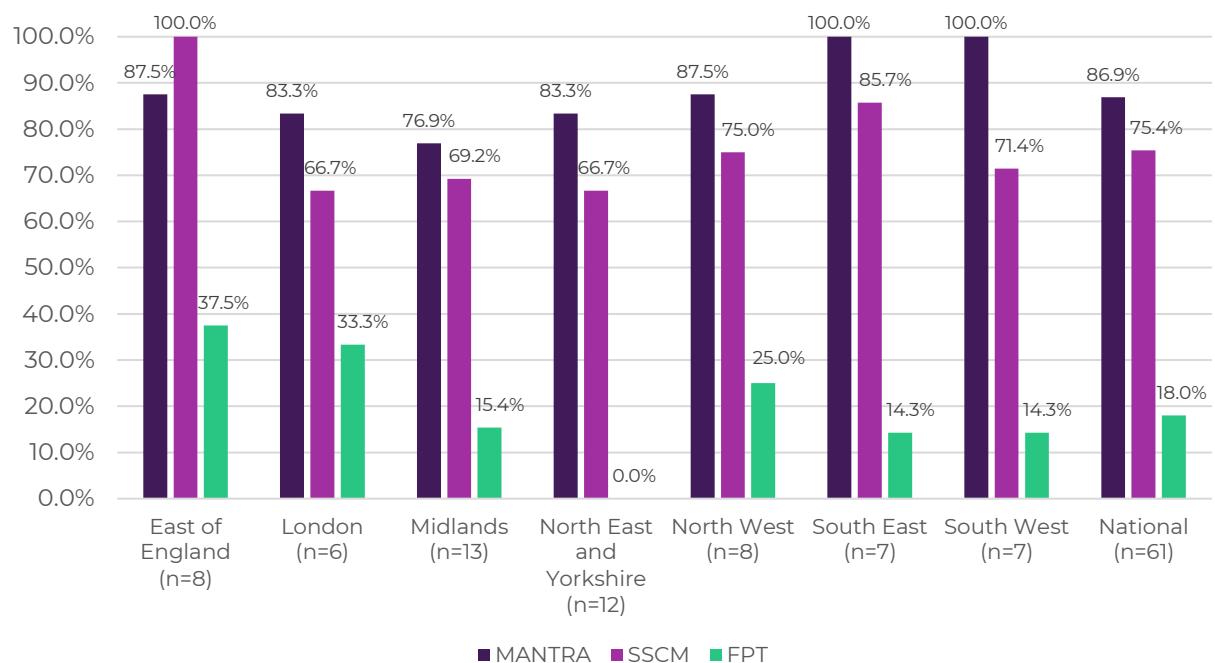

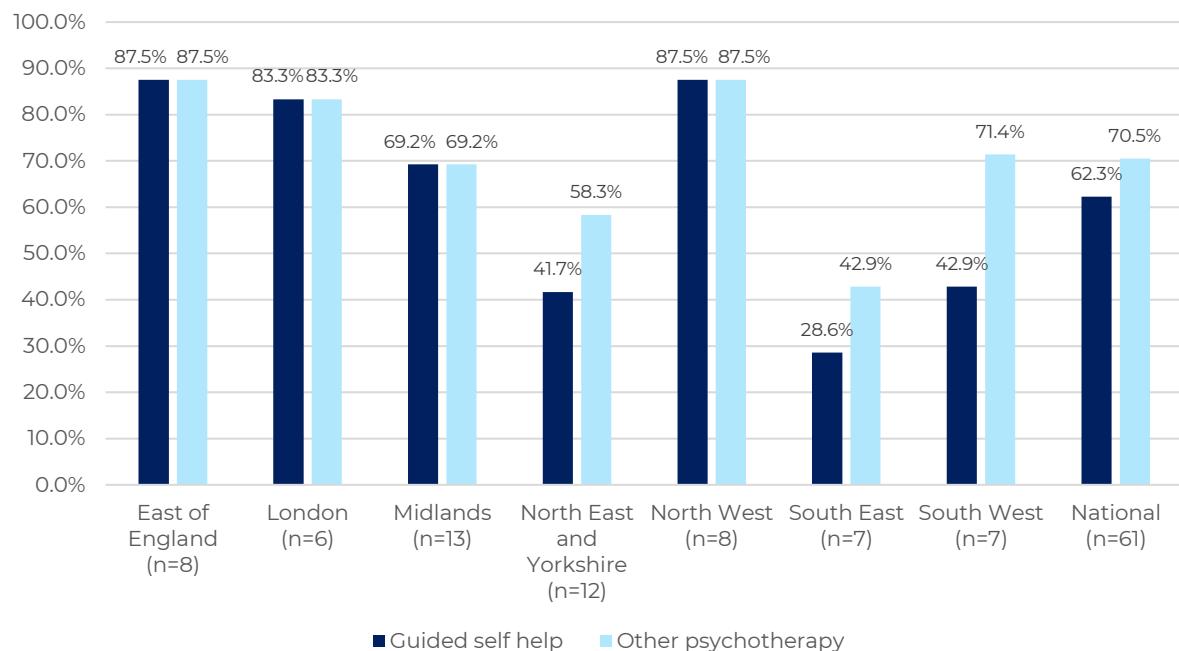

Figure 54: Percentage of community adult teams in each region that have staff trained to deliver guided self-help and other psychotherapy

Appendix K3: Psychological Interventions in CYP Community Teams, by Region

Figure 55: Percentage of community CYP teams in each region that have staff trained to deliver CYP eating-disorder-focused family therapy (CYP FT ED), individual cognitive behavioural therapy for eating disorders (CBT-ED), and adolescent-focused psychotherapy for anorexia nervosa (AFP-AN)

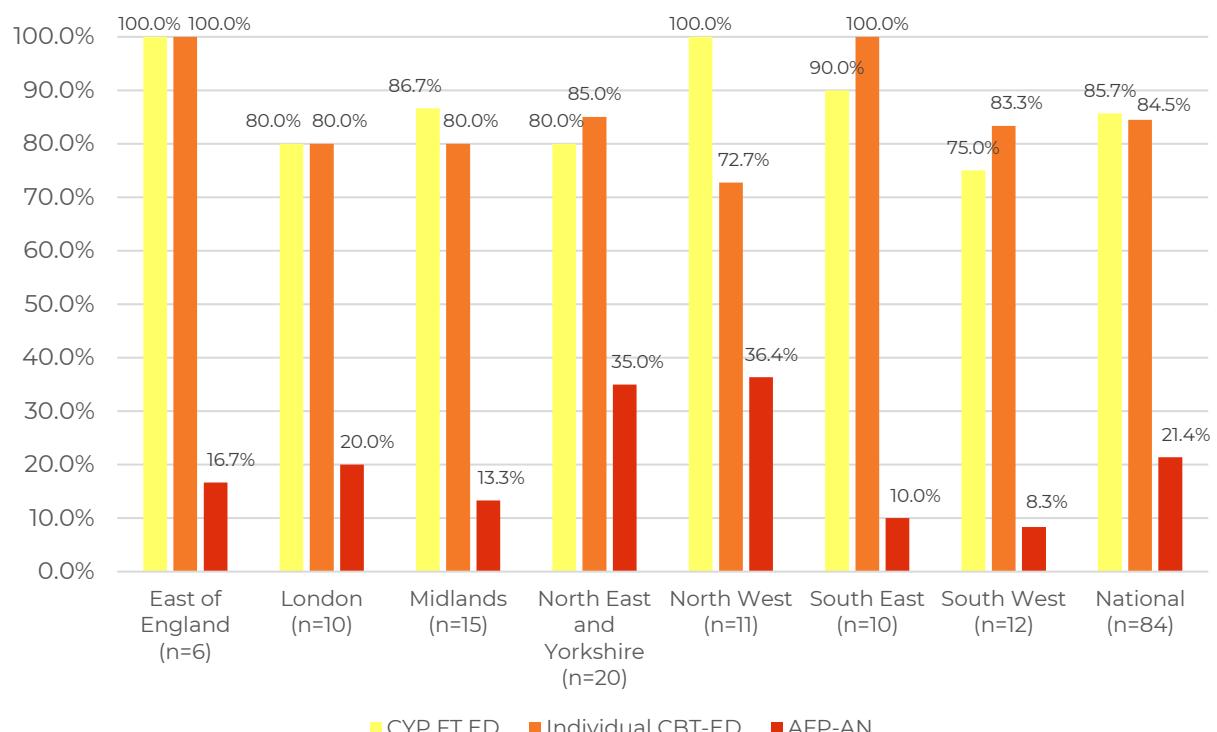

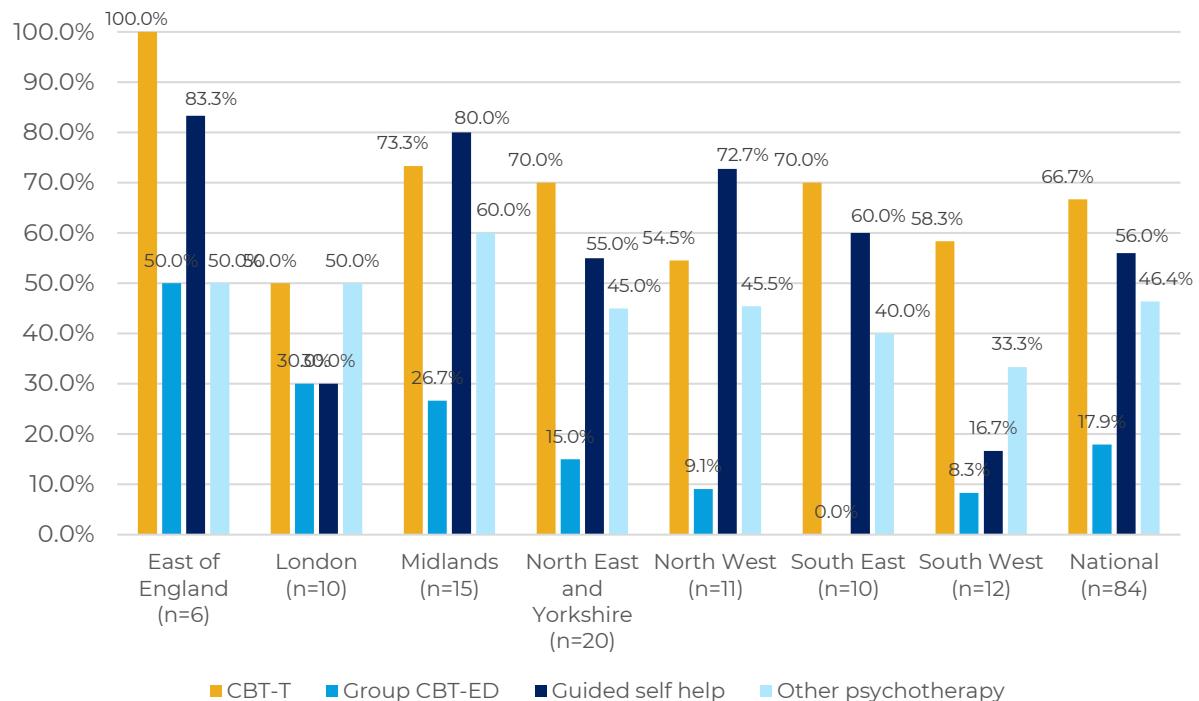

Figure 56: Percentage of community CYP teams in each region that have staff trained to deliver Maudsley Anorexia Nervosa Treatment for Adults (MANTRA), specialist supportive clinical management (SSCM), and eating-disorder-focused focal psychodynamic therapy (FPT) (Note: these are NICE-recommended adult interventions and would not be expected to be delivered within CYP teams unless considered appropriate for someone with a longstanding disorder.)

Figure 57: Percentage of community CYP teams in each region that have staff trained to deliver cognitive behavioural therapy – ten (CBT-T), group cognitive behavioural therapy for eating disorders (CBT-ED), guided self-help and other psychotherapy

Appendix K4: Psychological Interventions in All Age Community Teams, by Region

Figure 58: Percentage of community all age teams in each region that have staff trained to deliver individual cognitive behavioural therapy for eating disorders (CBT-ED), cognitive behavioural therapy – ten (CBT-T), and group CBT-ED

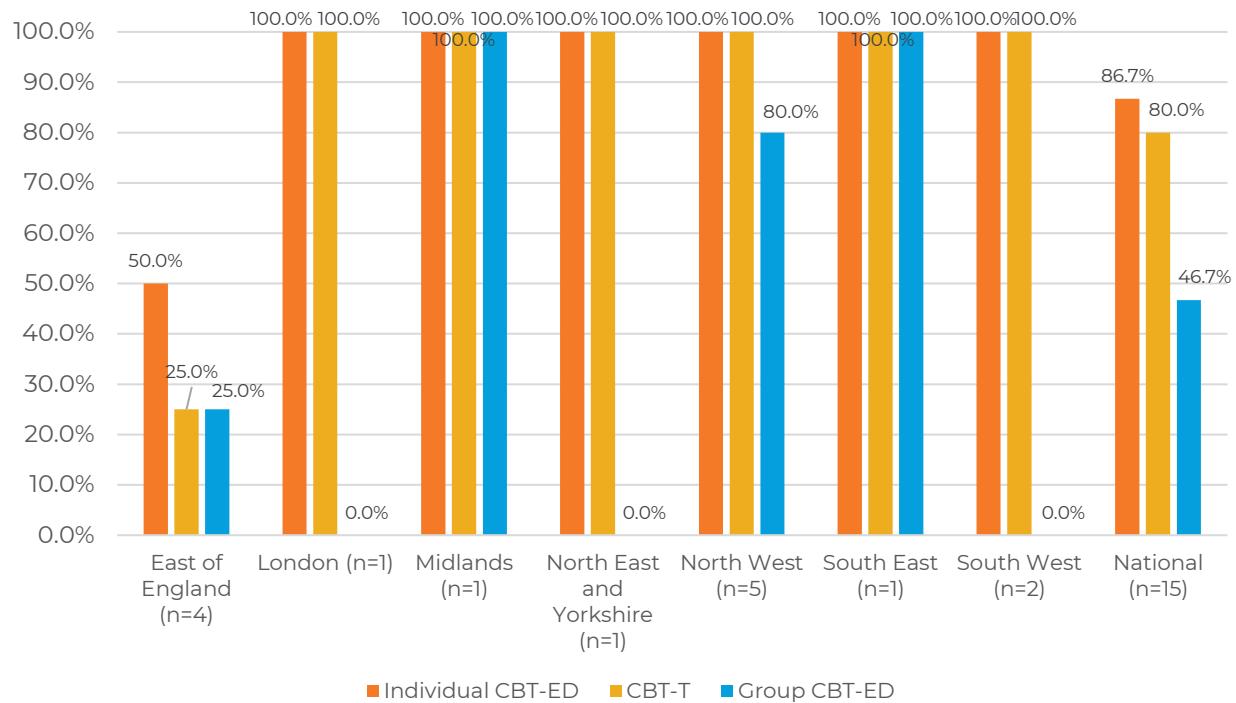

Figure 59: Percentage of community all age teams in each region that have staff trained to deliver Maudsley Anorexia Nervosa Treatment for Adults (MANTRA), specialist supportive clinical management (SSCM), and eating-disorder-focused focal psychodynamic therapy (FPT)

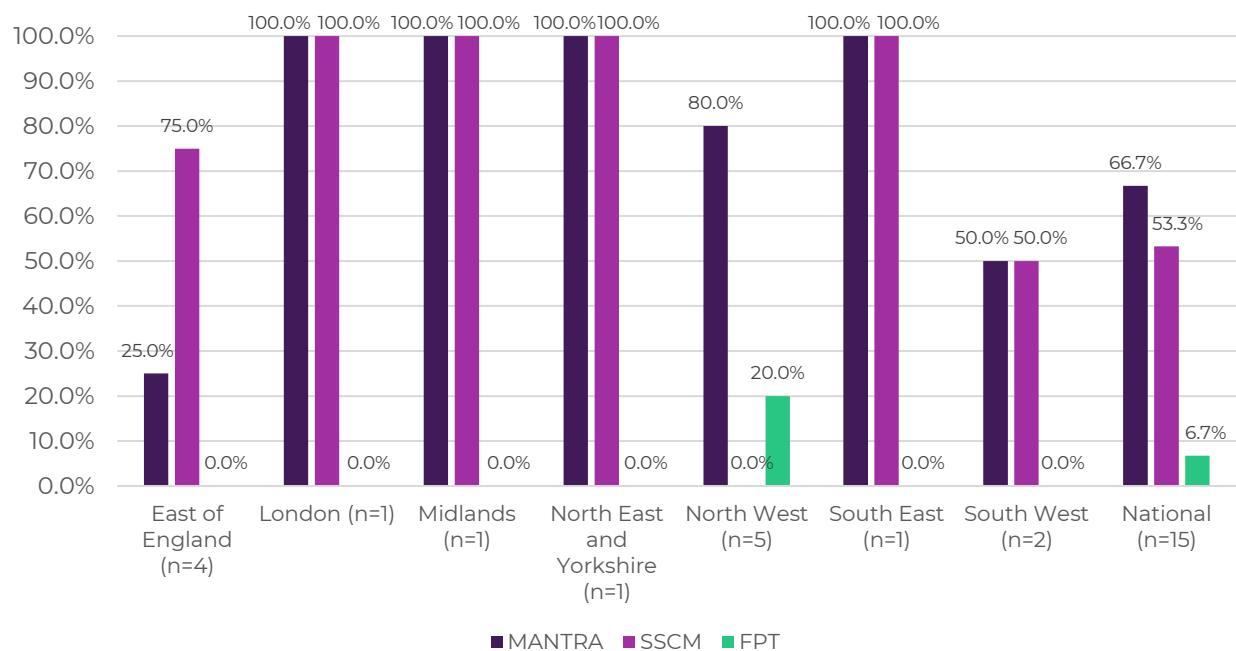

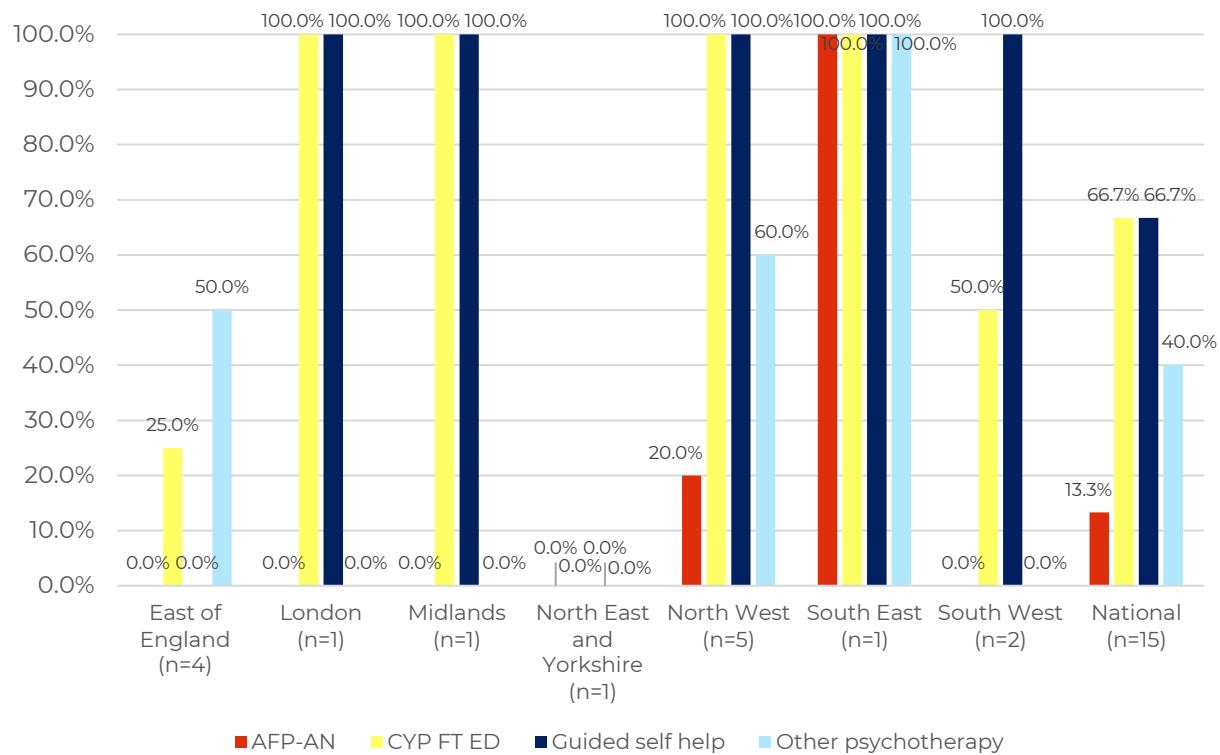

Figure 60: Percentage of community all age teams in each region that have staff trained to deliver adolescent-focused psychotherapy for anorexia nervosa (AFP-AN), CYP eating-disorder-focused family therapy (CYP FT ED), guided self-help and other psychotherapy

Appendix K5: Psychological Intervention by Service Type

Figure 61: Percentage of teams that have staff trained to deliver individual cognitive behavioural therapy for eating disorders (CBT-ED), cognitive behavioural therapy – ten (CBT-T), and group CBT-ED, by service type

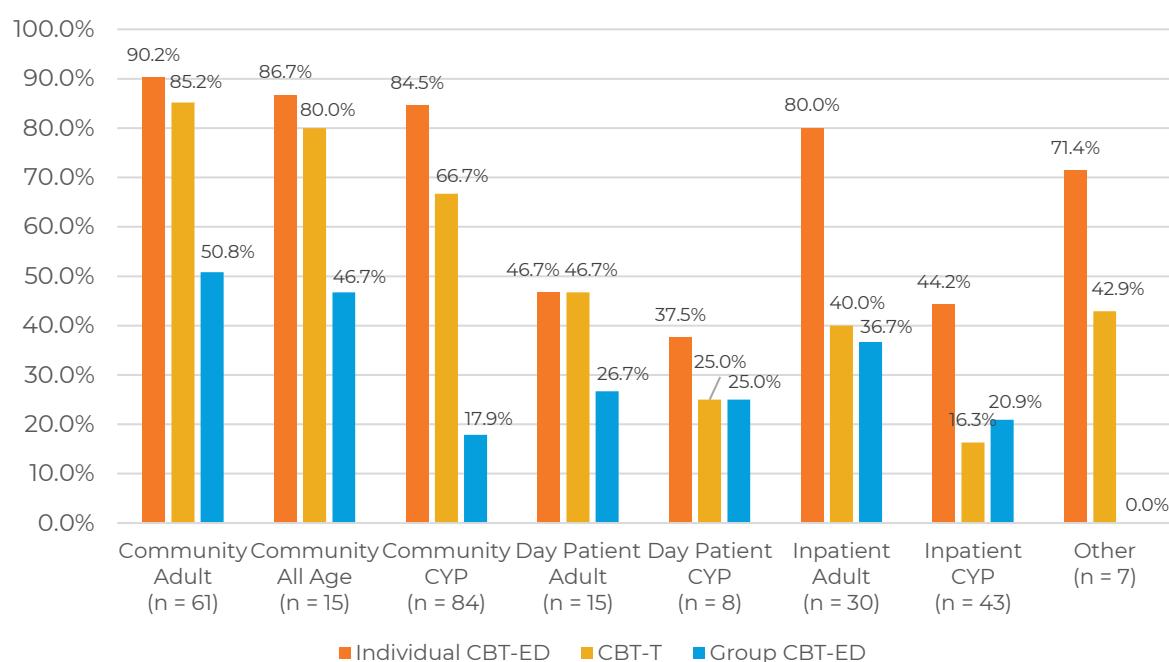

Figure 62: Percentage of teams that have staff trained to deliver Maudsley Anorexia Nervosa Treatment for Adults (MANTRA), specialist supportive clinical management (SSCM), and eating-disorder-focused focal psychodynamic therapy (FPT), by service type

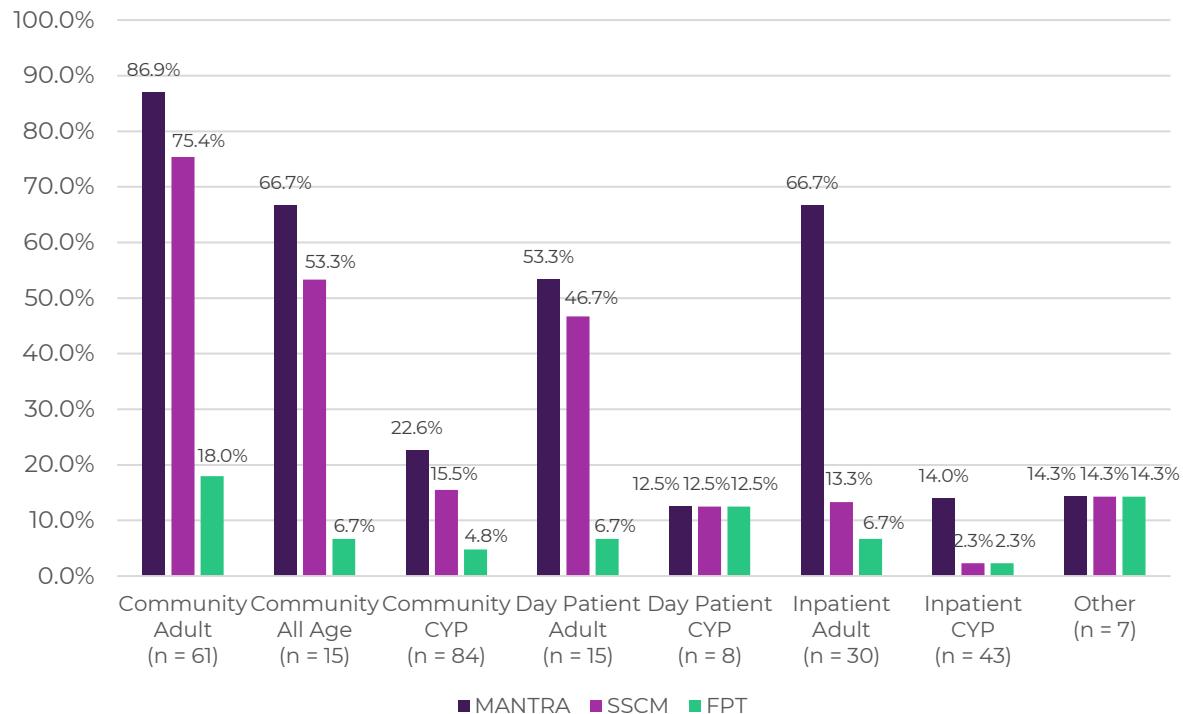

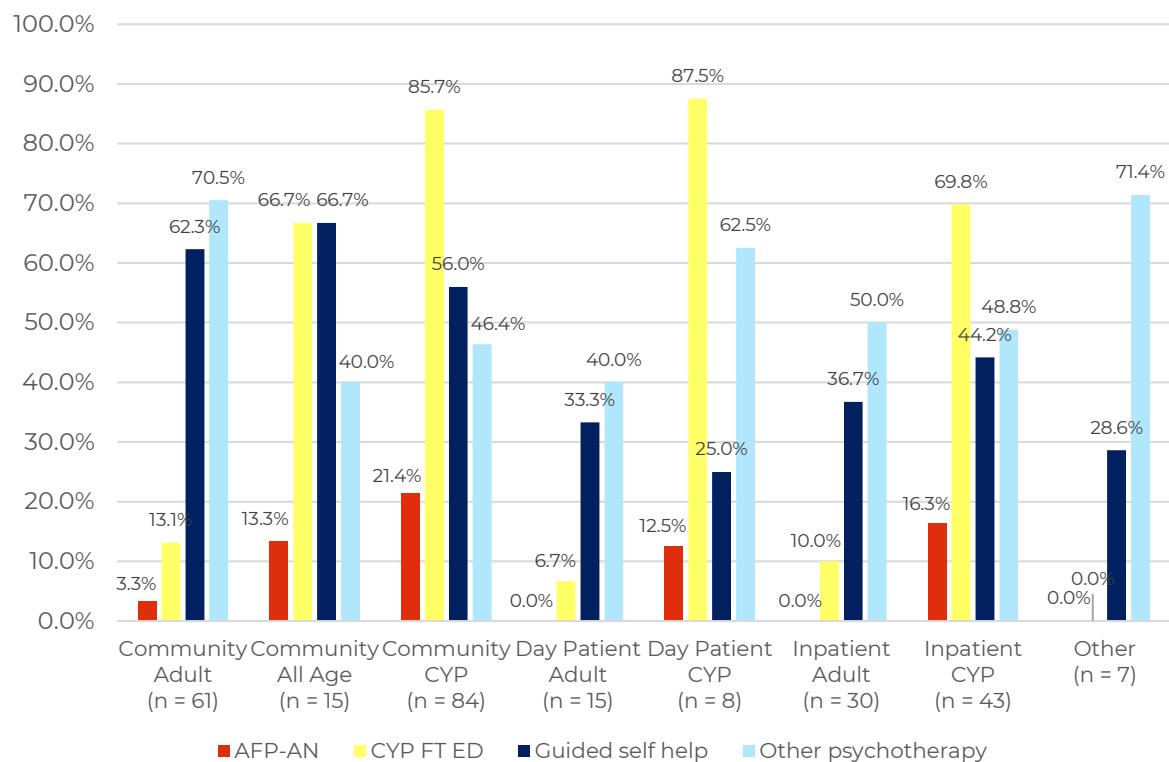

Figure 63: Percentage of teams that have staff trained to deliver adolescent-focused psychotherapy for anorexia nervosa (AFP-AN), CYP eating-disorder-focused family therapy (CYP FT ED), guided self-help and other types of interventions, by service type

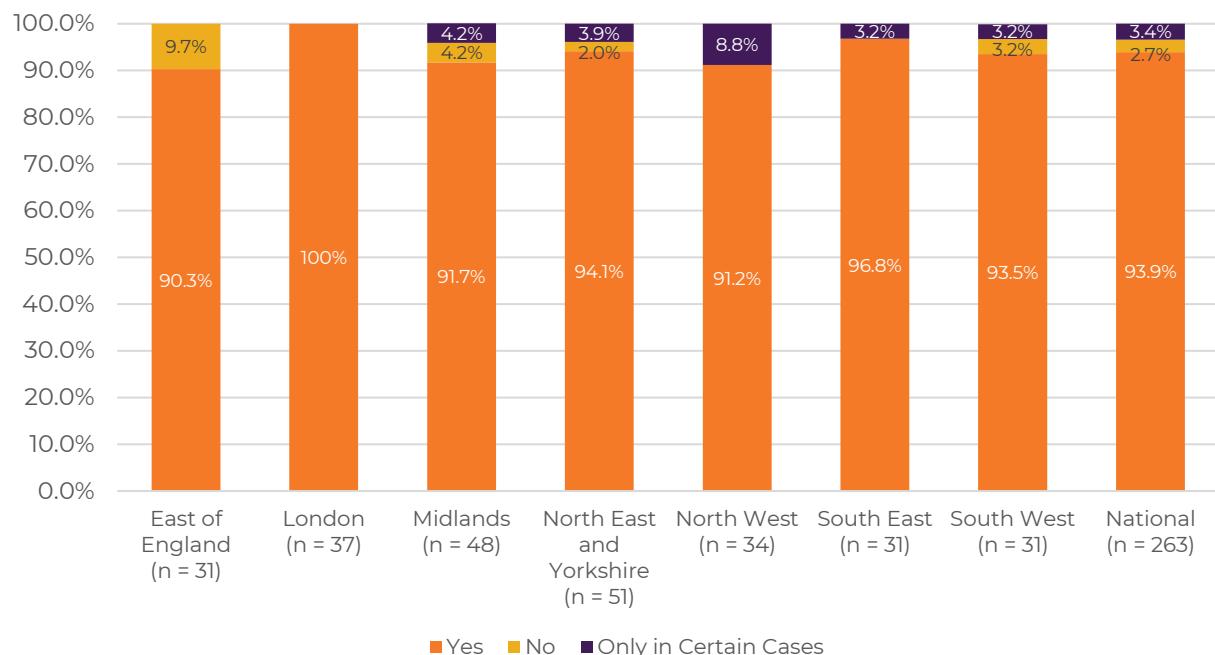

Appendix L: Discussion of Psychological Treatment Options

Further analysis was conducted to examine the percentage of teams that have an option for patients to discuss their options for psychological treatment with a healthcare professional across regions and service types.

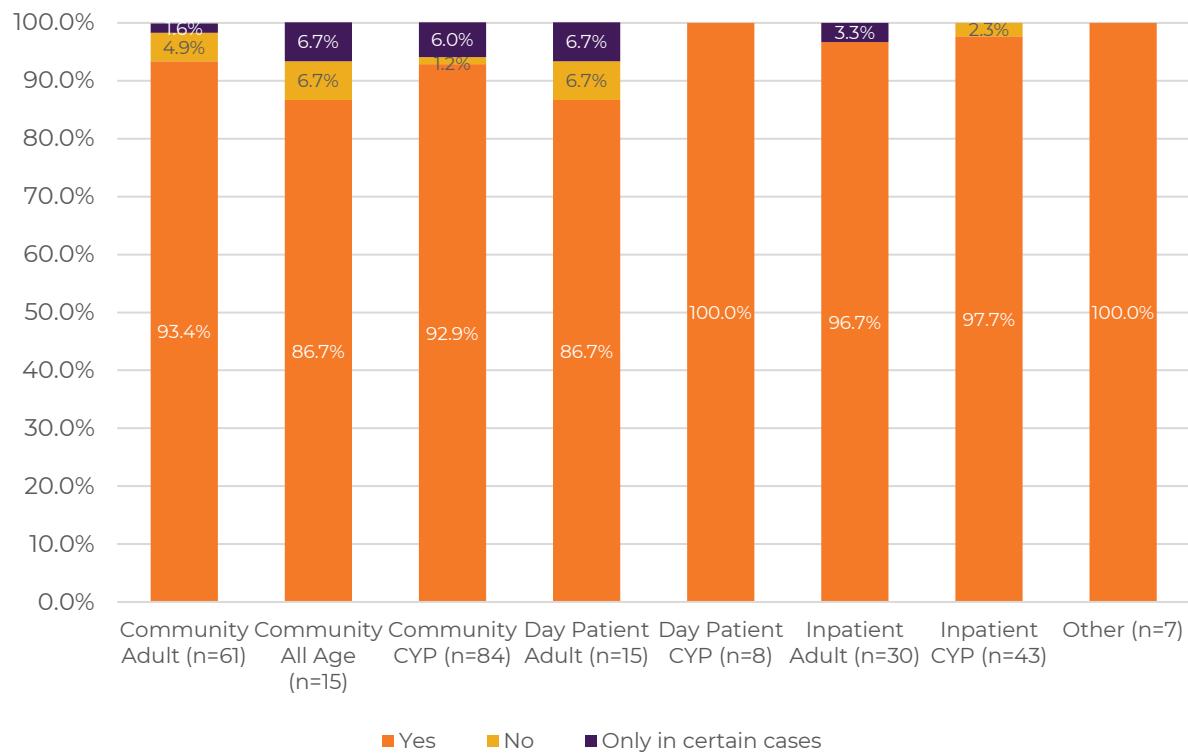

Appendix L1: Discussion of Psychological Treatment Options by Region

Figure 64: Percentage of teams that have an option for patients (and their parent or carer as appropriate) to have a discussion with a healthcare professional about their options for psychological treatment, by region

Appendix L2: Discussion of Psychological Treatment Options by Service Type

Figure 65: Percentage of teams that have an option for patients (and their parent or carer as appropriate) to have a discussion with a healthcare professional about their options for psychological treatment, by service type

Appendix M: Joint Working Arrangements

Further analysis was conducted to examine teams that have a protocol for shared care of disordered eating behaviour across various contexts within the different service types.

Appendix M1: Shared Care Protocols by Service Type

Figure 66: Percentage of teams that have a protocol for shared care of disordered eating behaviour in the context of other psychiatric comorbidities, by service type

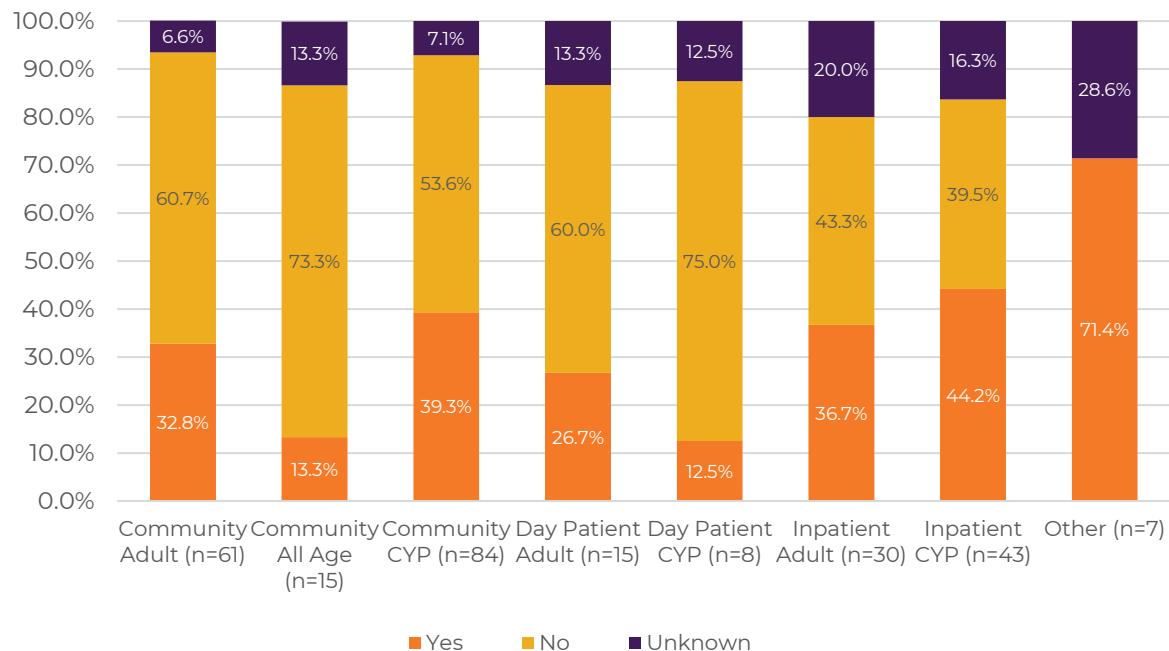

Figure 67: Percentage of teams that have a protocol for shared care of disordered eating behaviour in the context of other physical comorbidities, by service type

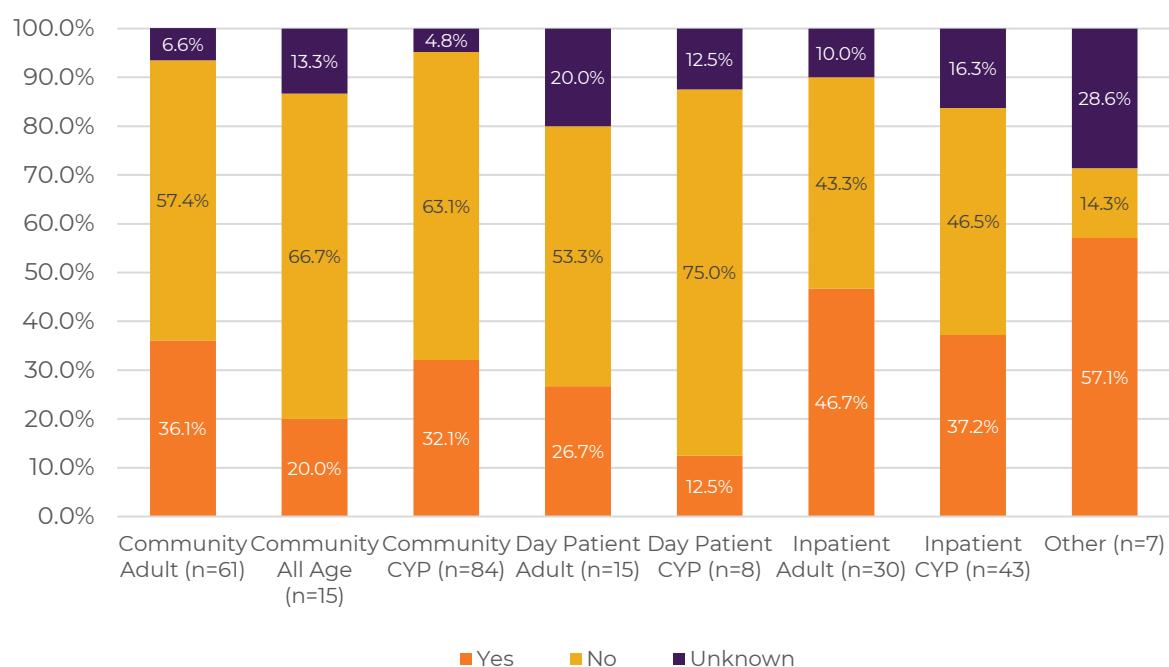

Figure 68: Percentage of teams that have a protocol for shared care of disordered eating behaviour in the context of neurodivergence, by service type

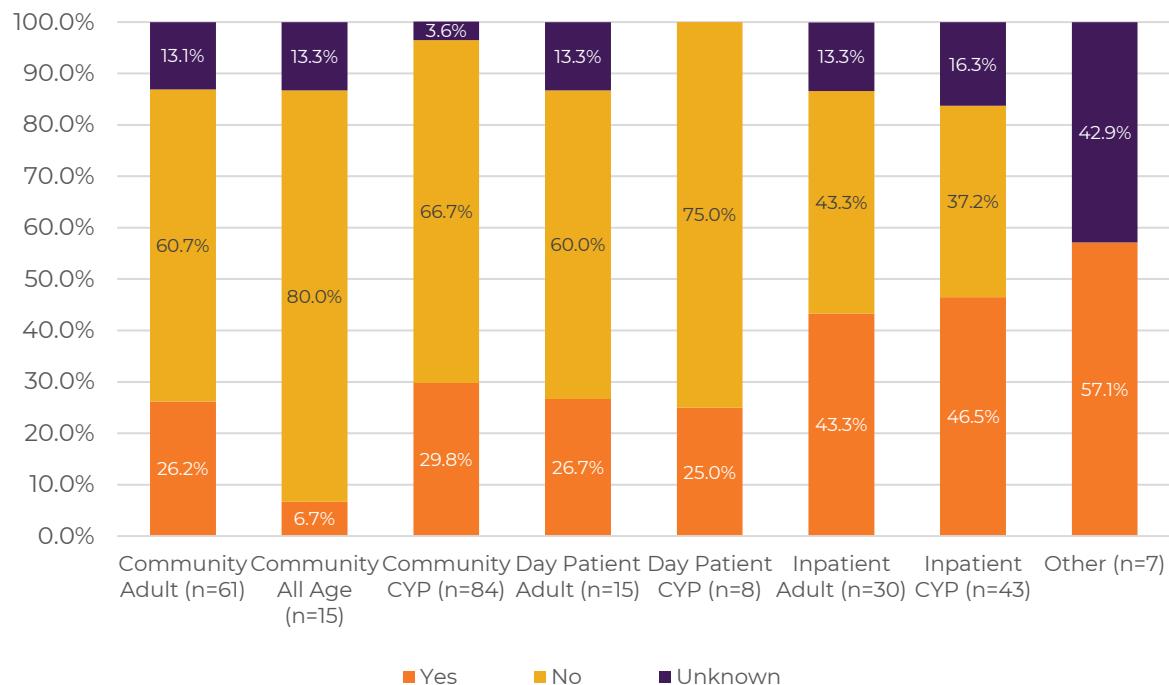

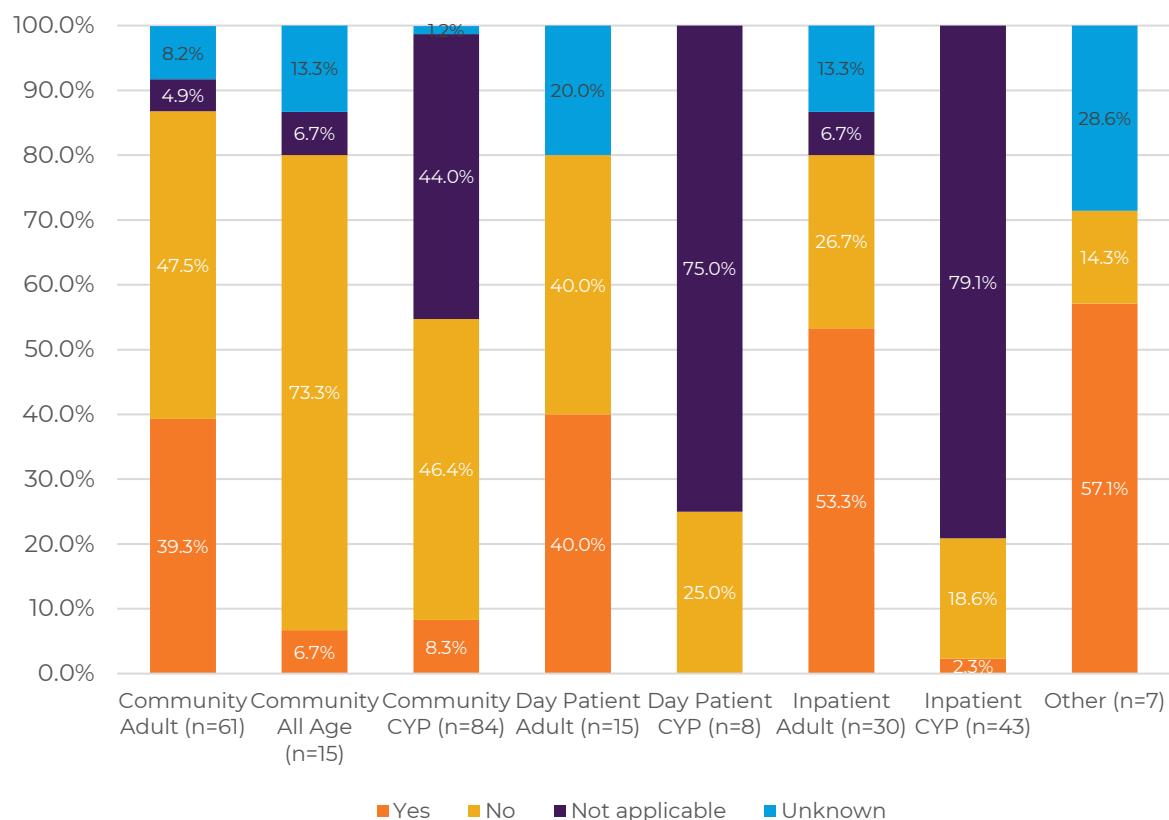

Figure 69: Percentage of teams that have a protocol for shared care of disordered eating behaviour in perinatal women, by service type

Appendix N: Routinely Collected Outcomes

Further analysis was conducted to examine the percentage of teams that routinely collect different outcome measures across regions and service types.

Appendix N1: Outcomes Measured by Region

Figure 70: Percentage of teams that routinely collect patient and parent reported outcome measures, by region

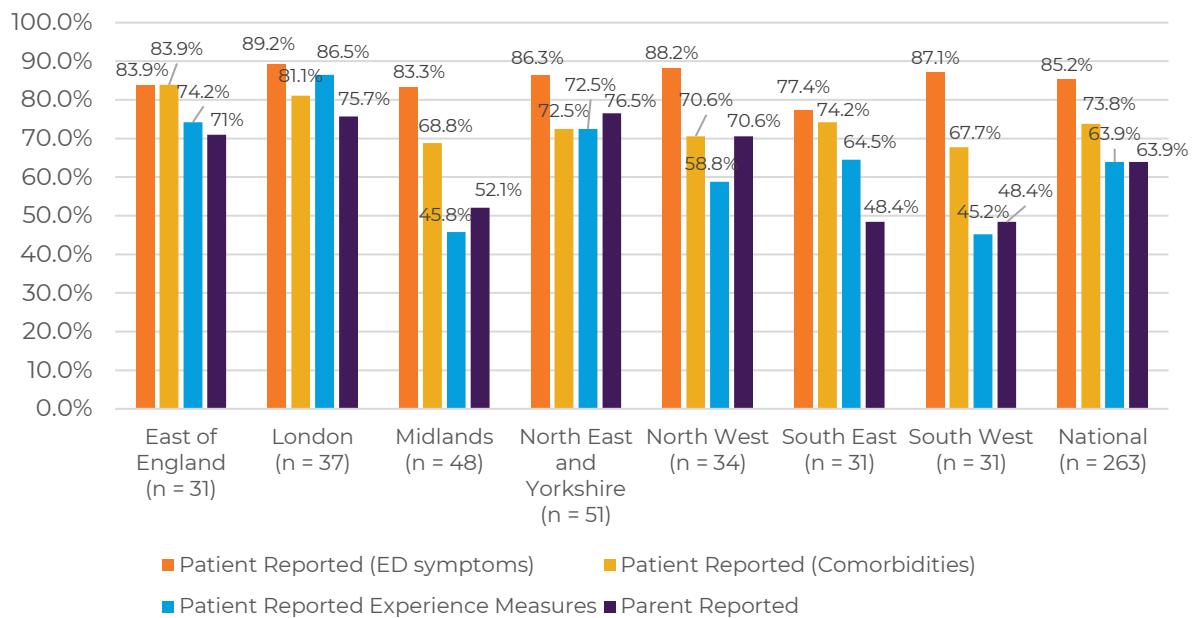

Figure 71: Percentage of teams that routinely collect clinician reported outcomes, physical health outcomes, and paired outcome measures, by region

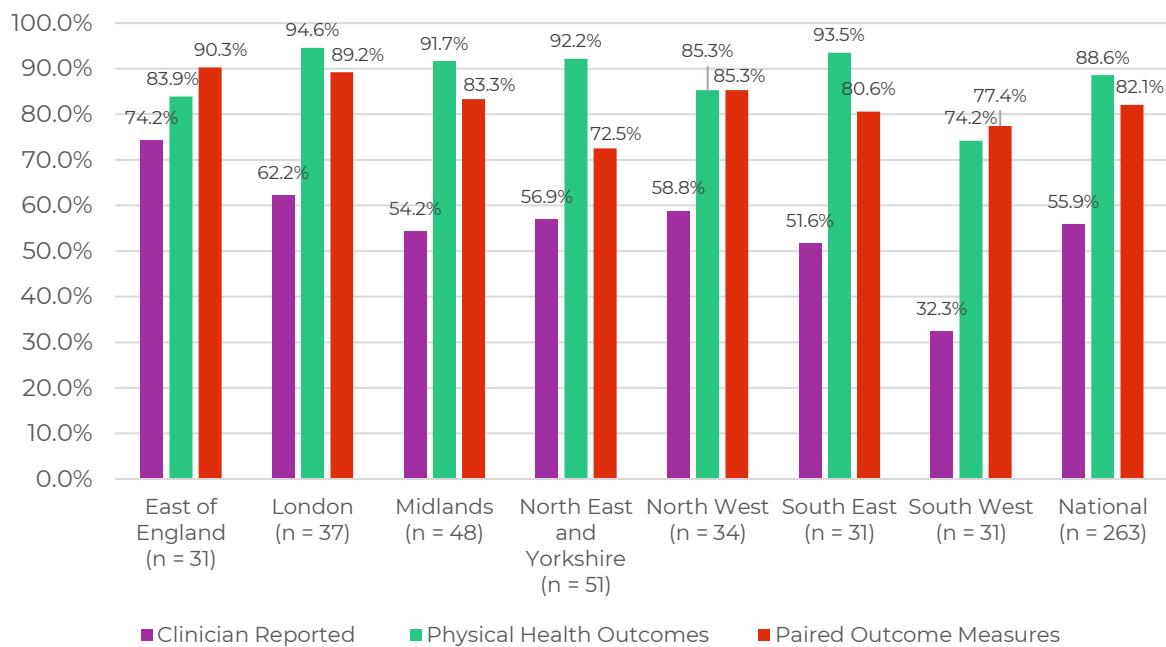

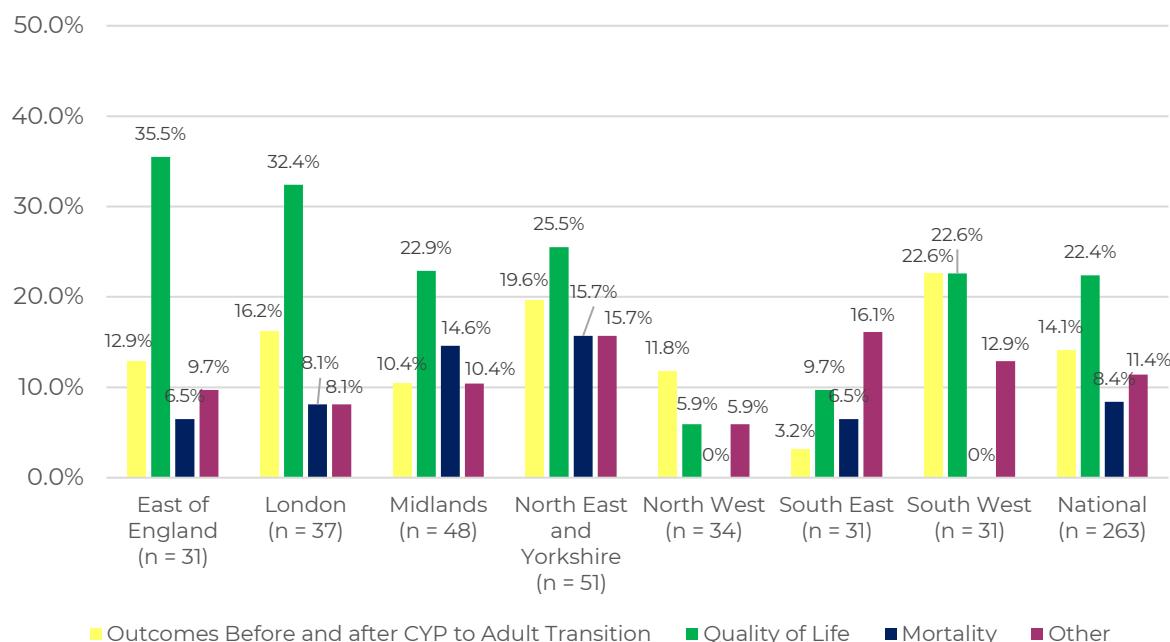

Figure 72: Percentage of teams that routinely collect: outcomes before and after transition from a CYP service to an adult service, quality of life, mortality, and other outcome measures, by region

Appendix N2: Outcomes Measured by Service Type

Figure 73: Percentage of teams that routinely collect patient and parent reported outcome measures, by service type

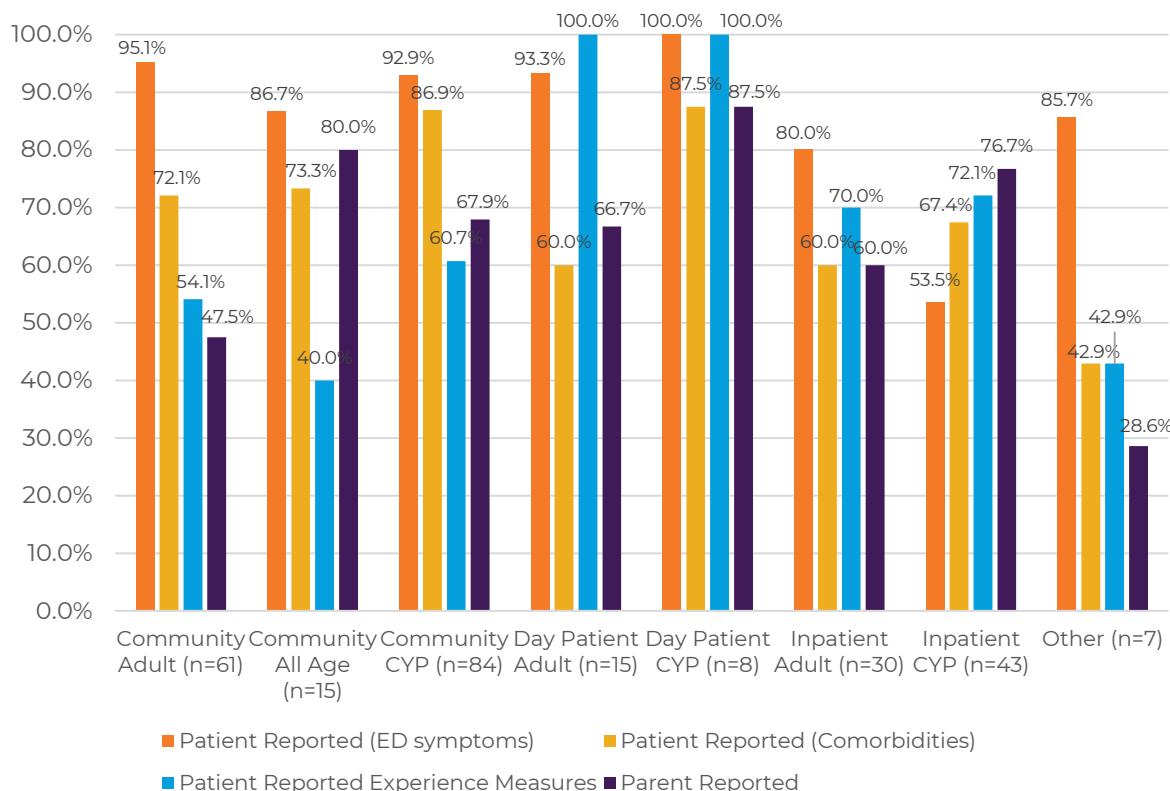

Figure 74: Percentage of teams that routinely collect clinician reported outcomes, physical health outcomes, and paired outcome measures, by service type

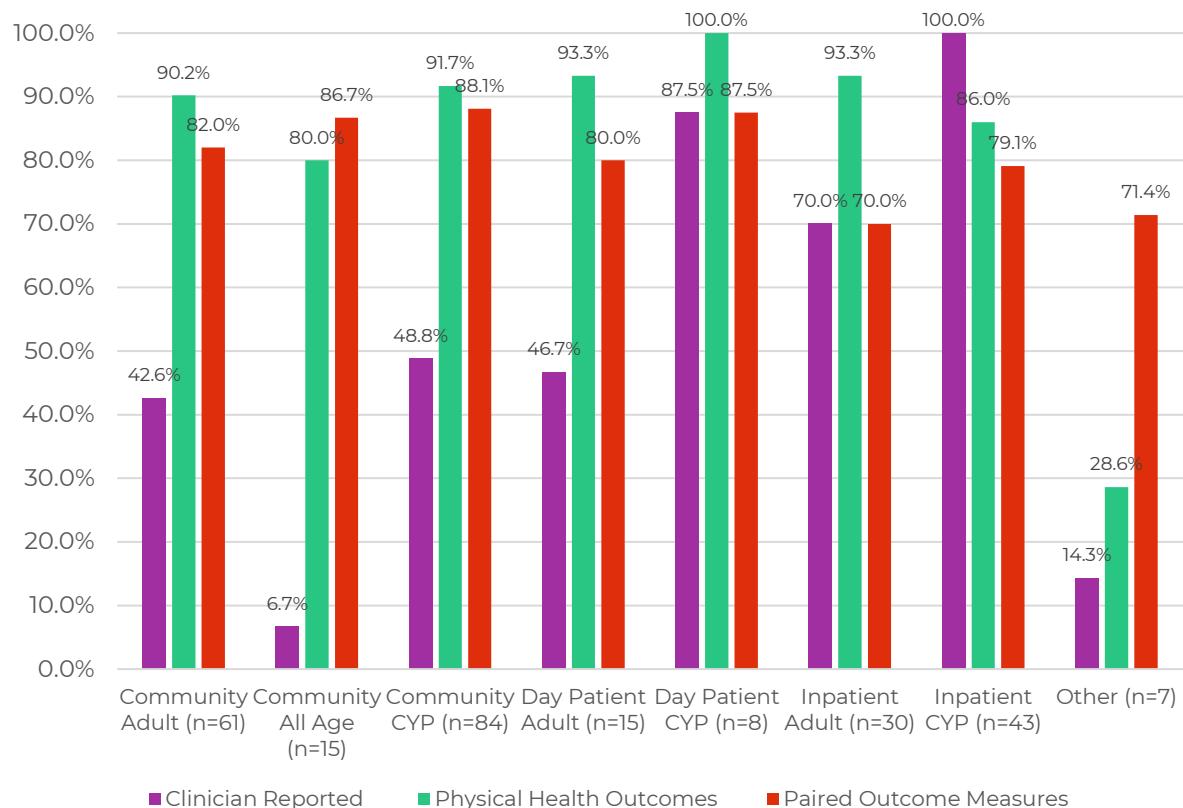

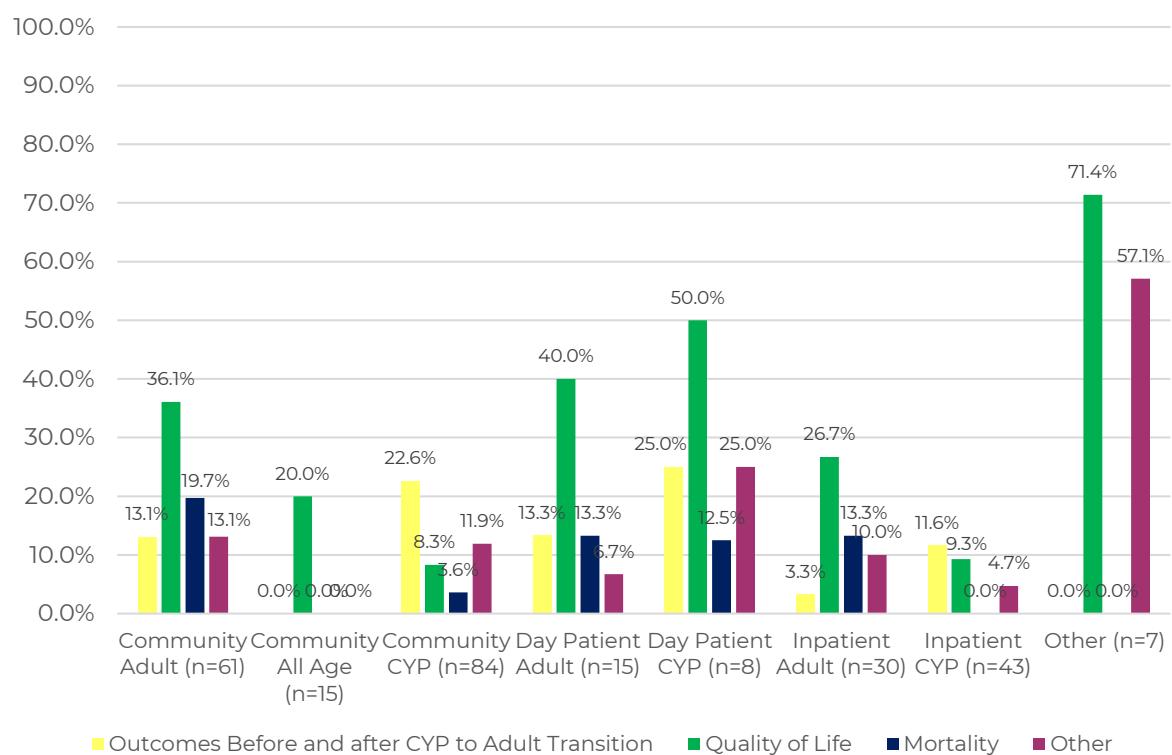

Figure 75: Percentage of teams that routinely collect outcomes before and after transition from a CYP service to an adult service, quality of life, mortality, and other outcome measures, by service type

Appendix O: Discharge Readiness

Further analysis was conducted to examine how teams determine whether a patient is ready to be discharged across regions and service types.

Appendix O1: Discharge Readiness by Region

Figure 76: Percentage of teams that report using medical stability, nutritional stability and psychological readiness to determine whether a patient is ready to be discharged, by region

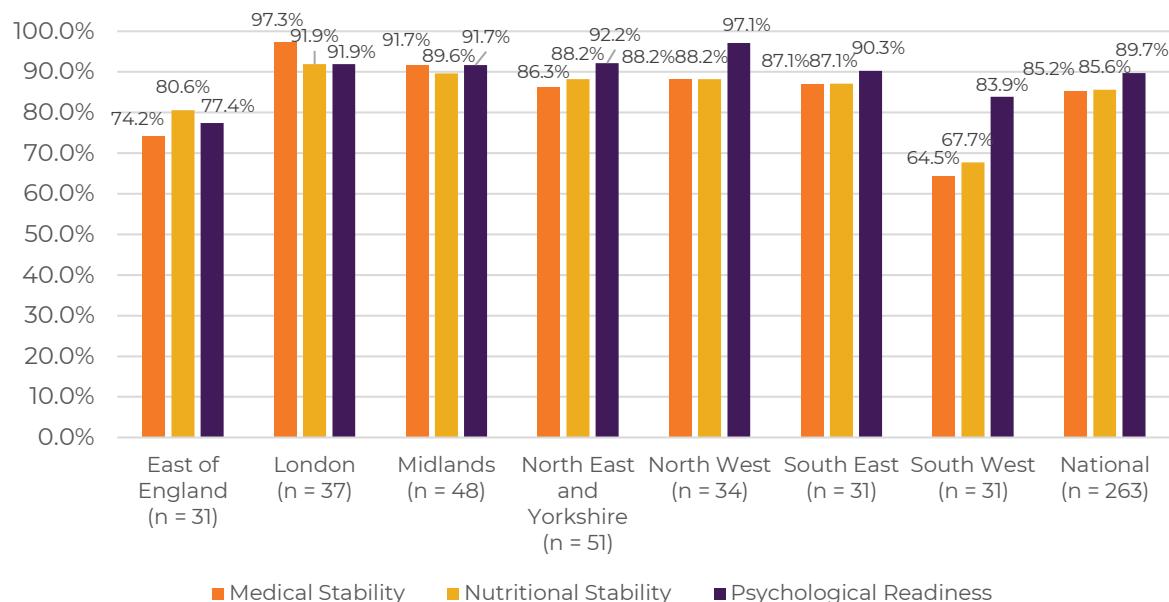

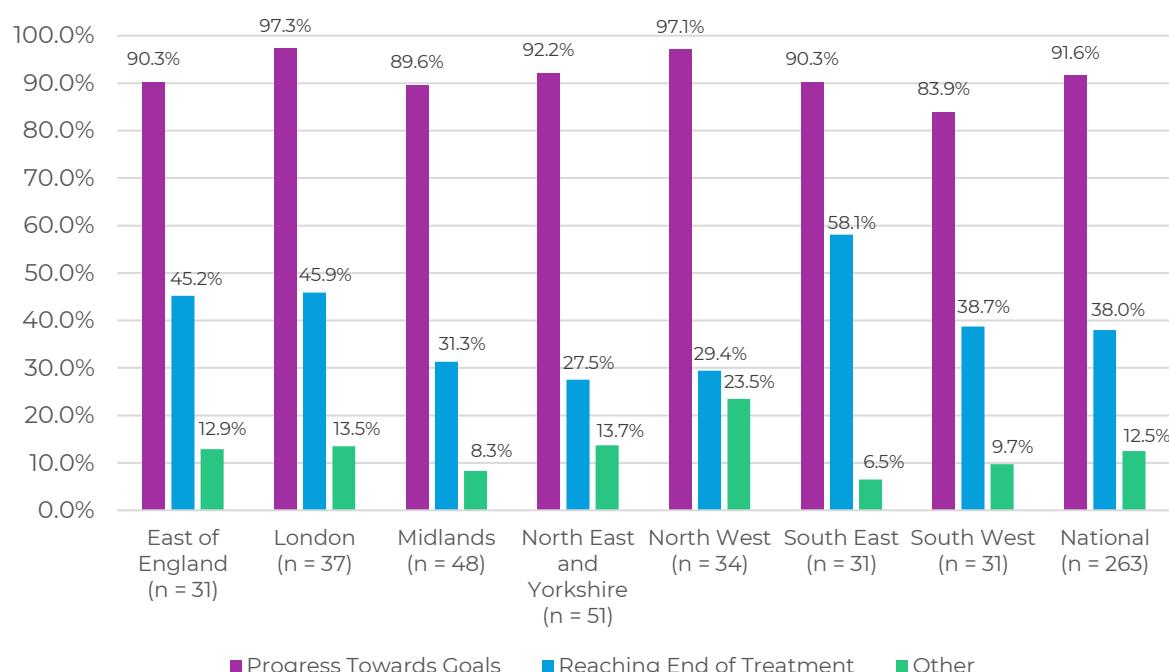

Figure 77: Percentage of teams that report using progress towards goals, reaching end of treatment and other reasons to determine whether a patient is ready to be discharged, by region

Appendix O2: Discharge Readiness by Service Type

Figure 78: Percentage of teams that report using medical stability, nutritional stability and psychological readiness to determine whether a patient is ready to be discharged, by service type

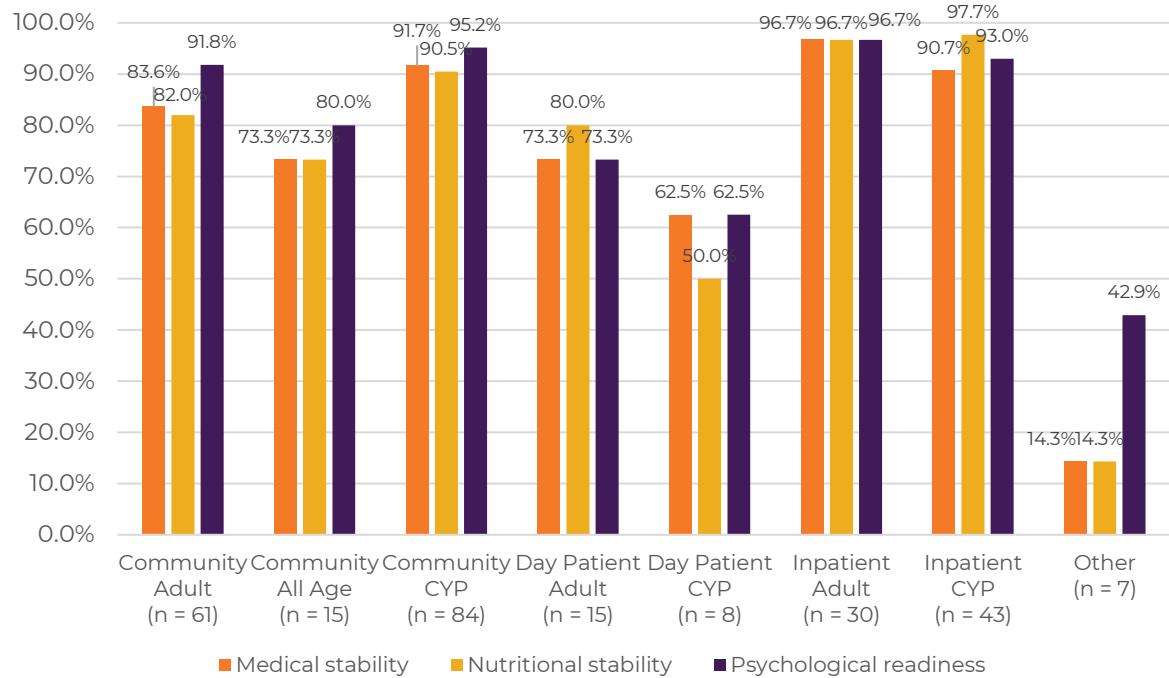

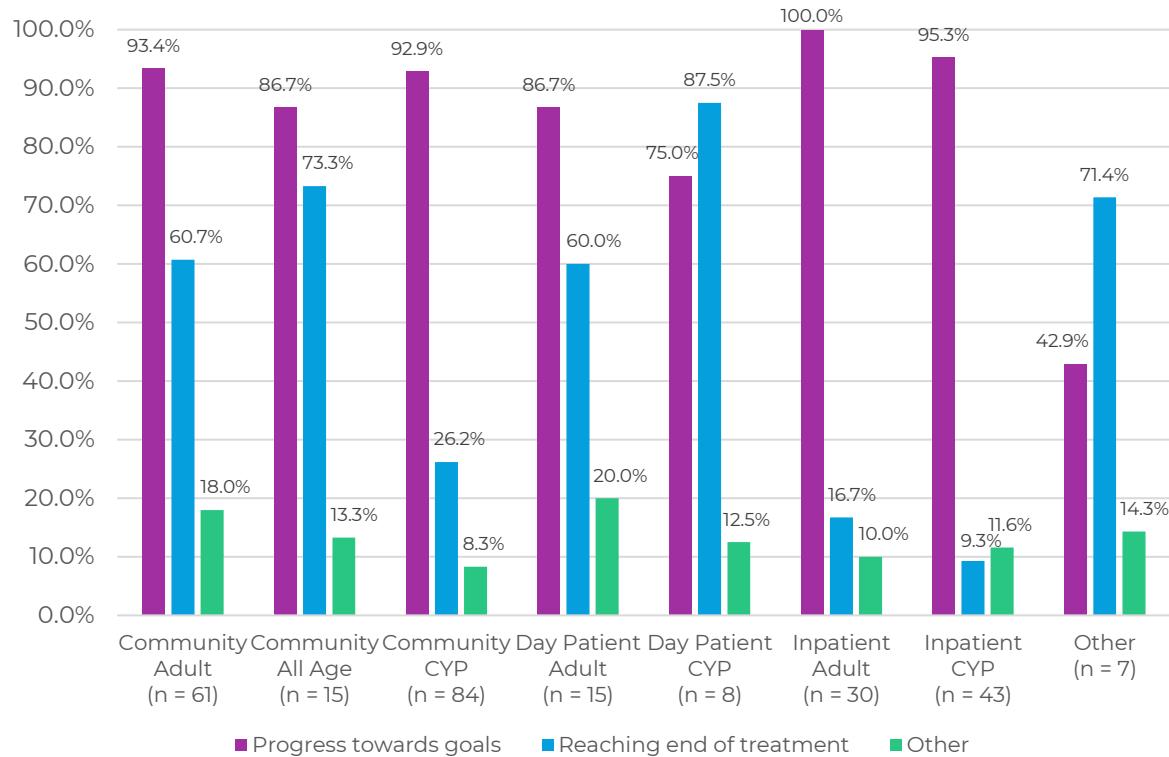

Figure 79: Percentage of teams that report using progress towards goals, reaching end of treatment and other reasons to determine whether a patient is ready to be discharged, by service type
