

## **NCAP State of the Nation Report 2026:**

### **Additional Acknowledgements**

The main report includes acknowledgements for the individuals and groups who contributed to the development of the NCAP State of the Nation Report 2026. The acknowledgements below recognise the additional support provided during NCAP's transition to routine data collection and reporting.

We would like to thank the staff from participating Trusts and Health Boards for their continued engagement throughout NCAP's transition to routine data and their commitment to ensuring data submissions meet NCAP requirements.

NCAP is the first mental health audit to transition to using routine data from the Mental Health Services Dataset (MHSDS), and we are grateful to participating teams for their flexibility, patience and constructive engagement in navigating the varied systems and processes involved in implementing this new approach. Our work would not be possible without their engagement, feedback and willingness to adapt to this new methodology.

We are grateful for the efforts made to improve the quality and completeness of submitted data, which support a better understanding of care delivery and outcomes for people receiving EIP care. We would also like to thank the Healthcare Quality Improvement Partnership (HQIP) team for their continued guidance and throughout the development of this report.
