A close-up photograph of a public telescope mounted on a metal frame. The telescope's eyepieces and coin slot are visible. The background is a blurred city skyline at night, with various lights creating a bokeh effect. A blue vertical bar is on the left side of the image.

What is the point of observation?

EMMA, PEA AND LEAH

What is the point of observations?

—— What is the point of observation?

Therapeutic engagement

Physical observations

Whereabouts

Opportunity for care

Availability

Connection

Mental state

Liability

Accountability

Intervention

— Reflections from lived and learned experience

- Are you asking people anything?
- Observing or just knowing?
- Surveillance systems
 - Who is monitoring? Checking? Dismissing alert?
 - Complacency
- Continuous observations* – ‘how would you like to use your time?’ versus policies on non-engagement
- Accountability
- 10 mins observations or 6 observations an hour?
- Skilled intervention – training?
- Night observations
- Relationship-building moments
- Opportunity for gathering good information to help you make sensible care decisions

What's one action or change you plan to take forward from today's session, and what will be your first step?
