National Neurodevelopmental
Conditions Conference

Call for Posters

Dyfodol National Neurodevelopmental Conditions Conference
12th November | Principality Stadium, Cardiff

We are inviting delegates to be part of the programme by displaying an academic poster, whilst we have also a number of opportunities for oral presentations during our rapid-fire presentation session.

Please do consider submitting an abstract this conference.

All submissions will be reviewed ahead of the conference.

If your poster/oral presentation is accepted, we regret that we cannot provide you with a free place at the conference, however the conference has been heavily subsidised.

- Abstracts can be in English or Welsh. Abbreviations may be used only if they are defined (spelled out in full text at first mention) followed by abbreviation in brackets.
- The abstract must not exceed 400 words including subtitles and formulas.
- The abstract must not contain bibliographical references, tables, diagrams or appendices. If accepted for presentation at the conference these can be added at a later date.
- Abstracts must be presented in five headed paragraphs in the following order: Aims and hypothesis, Background, Methods, Results, and Conclusions.
- Abstracts could present either novel findings or new interpretations of existing data; Quality Improvement or Education and Training projects, Research, Service Evaluation/Audit or Case Studies. They should include brief details of the rationale for the research and the methods used, including, if appropriate, the statistical approach. The major findings should be stated; it will not be acceptable, for example, to state merely that the "results will be discussed"
- The title of the abstract must be clearly coherent with the data included in the abstract and the conclusions must be warranted by information included in the results section.
- Authors are encouraged to state their hypotheses and frame their conclusions accordingly.
- For studies of service users, patients or populations, the number of people studied should be explicitly stated in the methods section.
- Submissions are accepted on the understanding that the work has been performed with the permission of any relevant ethical or legislative body. The authors should therefore ensure the work was conducted with appropriate ethical and governance safeguards.
- All sources of financial sponsorship of the study should be stated at the end of the abstract.
