Royal College of Psychiatrists – MPAC Review Task and Finish Group

1. Purpose

The Multi-Professional Approved/Responsible Clinician (MPAC) Task and Finish Group has been established to undertake a review and to create guidance on how Multidisciplinary teams, which involve MPACs (Multi Professional Approved Clinicians) can work best in the delivery of good quality safe mental healthcare to patients.

It is acknowledged that the term Non-Medical Approved Clinicians (NMACs) and Non-Medical Responsible Clinicians (NMRCs) are also in use to refer to MPACs. NHSE, Approval Panels and Employers use the term MPACs. Hence, for the purpose of this group we will use the term MPAC to enable consistent communication with wider stakeholders

2. Objectives

The purpose of the Task and Finish Group is as follows:

1. To review the role of MPACs and how they can safely contribute to the work of the multi-disciplinary teams (MDT) with their profession specific clinical expertise along with the statutory approval in delivery of Mental Health care.
2. To review the scope of practice and limitations of MPACs working in Mental Health to clarify legal/clinical lines of responsibility and supervision
3. To review and clarify supervision arrangements for Resident Doctors who work in teams which involves MPACs in RC (Responsible Clinician) Role.
4. To review and clarify the position regarding intersection with roles/responsibility of Psychiatrists and other doctors while working with MPACs, particularly regarding safe evidence based prescribing practices and provision of physical health care for patients under their care
5. To develop an action plan for the College's future work regarding MPACs practice, development and sharing of review outcomes with stakeholders.

3. Membership

The group shall consist of the following members:

- Associate Dean for Advanced Learning: Dr Abdul Raoof (Chair)
- Associate Registrar for Policy: Dr Mayura Deshpande
- Associate Dean for Curriculum: Dr Indira Vinjamuri
- PRDC Chair: Dr Nermeen Ahmed
