Dear Colleagues

Sophia Frangou
Chair

One of the key objectives of my term as chair of the division is to enhance the membership experience. Working together with the International Office of the College we have prepared a very brief on-line survey to find what it is you value and about the division and elicit suggestions about additional activities and resources. **You will all receive a link to the survey and 5 respondents will be randomly selected to receive \$20 amazon vouchers as a token of appreciation for your time and contribution.**

Kenneth Kaufman
Acting Vice-Chair

In the USA, the opioid epidemic has been dominating both medical and lay news. The Journal of the American Medical Association features a thoughtful [viewpoint](#) article by Kolodny and Frieden with 10 suggestions for preventing opioid addiction among people not currently addicted and for the care of addicted individuals. The [Commission on Combating Drug Addiction and the Opioid Crisis](#), chaired by New Jersey Gov. Chris Christie, was also published last week and makes 56 recommendations aiming to increase federal funding for addiction prevention programs, improve coordination between all federal programs and agencies that target the opioid crisis, expand the nationwide prescription drug monitoring program to include a data-sharing hub with the Department of Justice, expand federal drug courts and devise new law enforcement strategies to reduce opioid supply and increase the development of alternative pain management treatments to replace opioids. In addition the plan envisages expanded access to telemedicine services to better serve remote locations, accelerated hiring for medical professionals working on opioids and the use of funds in programs for dislocated workers and people with HIV/AIDS to treat their addictions. Further, the commission called on the president to declare a national emergency under either the Public Health Service Act or the Stafford Act as this would release funds for treatment, access to the anti-overdose drug naloxone and for improve monitoring of opioid prescriptions.

We hope you find this information relevant to your work and as always, we are looking forward to your comments and ideas.
