

Donepezil

Medication for Dementia

Your medication

Donepezil

What is this leaflet for?

This leaflet is to help you understand more about your medicine.

Your medicine could look different to the pictures on this leaflet.

Donepezil is also called Aricept.

Donepezil is available as tablets.

What is Donepezil used for?

This medication is used in dementia.

Medication is useful but not a cure.

It only slows the dementia down.

Donepezil

How and when do I take Donepezil?

The label on your Donepezil packet should tell you when and how much you should take

When to stop taking your Donepezil?

You should carry on taking your medicine unless your doctor asks you to stop.

What are the side effects of Donepezil?

Side effects are the unwanted effects of any medicine on the body.

Not everyone taking a medicine will get side effects.

Many side effects will go away with time. But some side effects may last for longer.

Some side effects can be serious.

You should tell your doctor if you have any side effect.

Donepezil

What are the side effects?

Loose stools

Feeling sick

Headache

Muscle cramps

Feeling tired

Difficulty in sleeping

Feeling dizzy

Having a rash or feeling itchy

Losing appetite

Pain in tummy

Other side effects which are rare include:
