## Standards

| S1* | Service users with first episode of psychosis start treatment in early intervention in psychosis services within two weeks of referral (allocated to, and engaged with, an EIP care coordinator). |
| S2  | Service users with first episode psychosis take up Cognitive Behavioural Therapy for psychosis (CBTp) |
| S3  | Service users with first episode psychosis and their families take up Family Interventions. |
| S4  | Service users with first episode psychosis who have not responded adequately to or tolerated treatment with at least two antipsychotic drugs are offered clozapine. |
| S5  | Service users with first episode psychosis take up supported employment and education programmes. |
| S6  | Service users receive a physical health review annually. This includes the following measures:  
  - Smoking status  
  - Alcohol intake  
  - Substance misuse  
  - BMI  
  - Blood pressure  
  - Glucose  
  - Cholesterol |
| S7  | Service users are offered relevant interventions for their physical health for the following measures:  
  - Smoking cessation  
  - Harmful alcohol use  
  - Substance misuse  
  - Weight gain/obesity  
  - Hypertension  
  - Diabetes/high risk of diabetes  
  - Dyslipidaemia |
| S8  | Carers take up or are referred to carer-focused education and support programmes. |

## Outcome indicator

| I.1  | Clinical outcome measurement data for service users (two or more outcome measures from HoNOS/HoNOSCA, DIALOG, QPR) is recorded at least twice (assessment and one other time point). |

* data will not be collected for this standard, the Early Intervention in Psychosis Waiting Times data published by NHS England will be used.
