Dear Colleagues

The end of the year is a time to reflect on the past and to form goals for the New Year ahead. Last month we sent out a brief on-line survey to find what it is you value and about the division and elicit suggestions about additional activities and resources. The results are presented in the figures shown further below.

About 7% of our members completed the survey and we hope that their responses are representative of the general trends amongst the entire Division. About half of the respondents added individual comments that are very useful in sharpening the focus of the Division as we move forward. Our respondents (in descending numerical order) are based in Canada, USA, Brazil, Chile and Trinidad & Tobago. Half of the respondents are hospital based, about 40% are affiliated with academic institutions and about 10% are in private practice. We thank all of them for taking the time to complete the survey.

Our respondents told us that they value many aspects of their membership; access to the College’s journals was rated highest (85% rated this important/somewhat important), followed by networking opportunities (66% rated this important/somewhat important) and access to the College’s and Divisional Newsletters (64% rated this important/somewhat important). Our respondents showed a clear preference for CME-accredited material from the College covering Psychopharmacology (80% rated this important/somewhat important), Early Intervention for Psychosis (76% rated this important/somewhat important), Psychological Treatments and Clinical Pathways (each as important/somewhat important by 73% of respondents). There was also substantial interest for information about how to maintain an active clinical license in the UK (53% rated this important/somewhat important). There was also significance interest in obtaining Divisional endorsement for national and local education events organized by individual members (65% rated this important/somewhat important). The respondents were nearly divided about the value of social media, with half of the respondents indicating that they were not important to them.

We hope you find this information relevant to your work and as always, we are looking forward to your comments and ideas.

With very best wishes for Happy Holidays and a Healthy and Successful New Year

Sophia Frangou         Kenneth Kaufman
Membership Survey 2017

What do you value about your membership of the Pan American Division of the Royal College of Psychiatrists?

- Very Important
- Somewhat Important
- Not Important
- Not Sure

What would enhance our membership experience?

- Very Important
- Somewhat Important
- Not Important
- Not Sure

Importance of Social Media (e.g., Divisional Twitter Account)

- Very Important
- Somewhat Important
- Not Important
- Not Sure
Divisional Endorsement of local and national activities organized by the members

- Very important: 42%
- Somewhat important: 23%
- Not important: 19%
- Not sure: 16%
The Job Board can be accessed at http://jobs.rcpsych.ac.uk/home/index.cfm?site_id=16082. The site accepts job postings from employers and allows job seekers to search for jobs and create personalized alerts based on their interests. Please note that the postings are international (not just UK) and include clinical and academic posts at all levels of seniority.

The book club features books (recommended by our members). The topic has to be relevant to psychiatry and neuroscience from either a scientific, literary or societal perspective. Self-nominations by authors who are college members are welcome. Please provide a brief comment for each recommendation but this is optional. Any ideas? Please send them in at panamericandivision@rcpsych.ac.uk! NB: Inclusion of a book in the PanAm Book Club does not imply endorsement or promotion by the RCPsych.
