Dear Colleagues

Diagnostic classification is arguably one of the most contentious topics in psychiatry. Some believe that current nosological approaches should be discarded. Implicitly (although often very explicitly) these views reject current psychiatric practice as unscientific thus allowing the perpetuation of cultural views of psychiatry as the Cinderella of Medicine. Others embrace the notion of that psychiatric disorders are complex and that multi-comorbidity is the rule. In support of the latter, we highlight a recent mega-meta-analysis of task-related functional magnetic imaging studies published in the last 15 years on schizophrenia, bipolar disorder, major depressive disorder, OCD and anxiety disorders (Sprooten et al., Human Brain Mapping; DOI: 10.1002/hbm.23486). The study shows that these mental disorders implicate overlapping brain regions thus providing biological evidence for multi-comorbidity. This supplements a previous study by Goodkind and colleagues that found that brain structural changes are also shared amongst disorders. The core message is that we need to embrace the complexity of psychiatry and work within the biological evidence that is emerging in front of us and is attested by our direct patient-experience. And to paraphrase Martin Henry Fischer “this is how Cinderella will become Queen”.

_job board_

The Job Board can be accessed at http://jobs.rcpsych.ac.uk/home/index.cfm?site_id=16082. The site accepts job postings from employers and allows job seekers to search for jobs and create personalized alerts based on their interests. Please note that the postings are international (not just UK) and include clinical and academic posts at all levels of seniority.

_RCPsych PanAm book club_

The book club features books (recommended by our members). The topic has to be relevant to psychiatry and neuroscience from either a scientific, literary or societal perspective. Self-nominations by authors who are college members are welcome. Please provide a brief comment for each recommendation but this is optional. Any ideas? Please send them in at panamericandivision@rcpsych.ac.uk! NB: Inclusion of a book in the PanAm Book Club does not imply endorsement or promotion by the RCPsych.

Book of the Month

This month’s recommendation was sent by Dr. David Kopacz who responded to our call to “rediscover the soul of daily practice” and to connect with more members of our Division. Dr. Kopacz is a psychiatrist working in Primary Care Mental Health Integration at the Puget Sound Veterans Affairs in Seattle, Washington, US. He is the author of our two books of the month:
